**Please see product's web page for the most up-to-date information:**

**<http://www.ecamm.com/mac/iglasses>**

### **説明:**

iGlass は iChat AV や他のビデオソフトを iSight の設定をフルコントロールする事ができます。すでに組み込まれているプリセット設定は手動で設定する事ができます。また、iSight を G3 等の 600MHz 等のアップルの動作環境より低いものでも起動する事ができます。

### **動作環境:**

\* Mac OS X 10.3 以上または QuickTime 6.4 がインストールされた Mac OS X 10.2.

\* iChat AV (2.0 以上) または iSight、iBot FireWire ビデオカメラが入っているもの

### **特徴:**

*iGlasses* の設定:

カメラアイコンをクリックしてプレビューウィンドウを開いてください。  
プリセット設定を *iGlasses* のメニューより選択してください。  
ビデオメニューより「iGlass の設定」を選択してください。

presets.jpg "

スタンダード: 初期設定に戻す場合

より明るく: より明るさが必要な場合

さらに明るく: さらに明るさが必要な場合

強調する: よりはっきりしたイメージにしたい場合

白黒: 白黒に設定したい場合

セピア: セピアカラーに設定したい場合

クレージーカラー: 様々な色のフィルターを一定の周期でかけたい場合

ナイトバージョン: 完全に真っ暗な時に iSight を使いたい場合

マクロフォーカス: 近距離のものを写す場合

**NOTE:** Some cameras will display a different set of available presets. The presets are based on camera capability. For example, the "built-in iSight" does not have "Macro Focus" because that camera doesn't have the ability to control focus.

1. iChat が起動している場合は終了してください。
2. iGlasses インストーラーを起動してください。
3. インストールボタンをクリックして指示に従ってください。
4. iSight が確認されましたら iGlasses のウィンドウが表示されます。

#### アンインストール:

1. iChat が起動している場合は終了してください。
2. iGlasses インストーラーを起動してください。
3. アンインストールボタンをクリックして指示に従ってください。

#### Details:

The iGlasses Installer does not modify the iChat program directly. Files are installed at the following locations:

/Library/InputManagers/Ecamm  
/Library/Components/

#### Modification History

3/28/06 - v1.3.3: Adds the ability to use iGlasses in non-native applications running on an Intel-based Mac. Fixes a problem with using iGlasses in combination with both ShowMacster and the built-in iSight. Fixes a problem which could cause a crash when using iGlasses on a MacBook Pro. Fixes a problem where the iGlasses window could not be accessed during capture from iSight when using iMovie 6. Fixes a problem where Crazy Colors would stop cycling during capture from iSight when using iMovie 6.

2/15/06 - v1.3.2: Fixes a problem which could cause a crash when using iGlasses with aMSN. Fixed a problem which could cause flickering when using iGlasses with BTV or BTV Pro.

2/14/06 - v1.3.1: Fixes a problem which prevented the iGlasses Settings menu item from appearing in some applications. Fixes a problem which could cause a crash in BTV. Fixes a problem with using the external iSight on an Intel based Mac.

2/13/06 - v1.3: Adds universal support for Macs with an Intel processor. Adds rotate option to allow for turning your image 90 degrees. Adds Colorize setting and Sepia option for built-in iSight. Adds iGlasses support for aMSN, Mercury, and MülleSight. Other bug fixes and improvements. iGlasses v1.3 Demo resets the demo period, allowing for users who tried earlier versions to have a new trial.

12/23/05 - v1.2.2: Fixes a problem where the picture from the "built-in iSight" may appear different from how it looked when not running iGlasses. Fixes a minor issue with selecting custom presets.

12/16/05 - v1.2.1: Fixes an incompatibility with ShowMacster.

12/16/05 - v1.2: Adds support for "built-in iSight". Adds support for Upside Down and Mirror to all supported video applications.\* Adds support for PhotoBooth. Adds White Balance adjustment slider for original iSight. Fixes some problems with remembering whether the iGlasses window was opened or closed. Adds new settings for Threshold effect, SW Brightness, and SW Contrast. Adds support for WuffCam, Blog.Mac, iStopMotion, and iVeZeen. iGlasses v1.2 demo resets the v1.1 trial, allowing for a new trial period.

7/11/05 - v1.1.4: Fixes bug where iGlasses caused EvoCam and other programs not to save preference settings. Removes support for Delicious Library because it was causing problems for some users.

6/10/05 - v1.1.3: Adds check-mark next to currently selected setting in iGlasses menu. Adds better compatibility with ShowMacster. Adds iGlasses settings support for iMovie HD, QuickTime 7 Pro recording, ohphoneX, Delicious Library, ineen, BTV, BTV Pro, and SecuritySpy. Fixes a bug where iChat new user setup could hang when a camera is attached. Fixes a problem where G3 computers that fall below the minimum system requirements for video conferencing would not be enabled when running OS X 10.4 and iChat 3. Fixed a bug where recording in EvoCam could cause iGlasses to stop working. Adds Japanese README file. Fixes a problem with the installer which caused it to not work on some systems. Fixes a bug which could cause video settings to not be restored between application

launches.

1/30/05 - v1.1.2: Adds support for iCamShare. Adds Japanese and Danish (Dansk) language. A more thorough fix for a bug which caused iGlasses to crash or hang after using iMovie. Fixes a bug which caused Safari to crash if iChat AV was not installed. Fixes a problem which caused Cocoa applications running as root with the user bit set to fail to launch when iGlasses is installed. Fixes a problem where the iGlasses window position could be off-screen. Fixes a problem with the installer which caused it to not work on some systems.

1/4/05 - v1.1.1: Adds support for vChat. Adds support for web-based video chats in Safari. Adds Italian, Dutch (Nederlands) , Finnish (Suomen), Swedish (Svenska), and Spanish language. Fixes a bug which caused iGlasses to crash or hang when in iChat after using iMovie.

11/17/04 - v1.1: Adds support for the following video applications: iMovie 4, QuickTime Broadcaster, iSpQ, Yahoo! Messenger, GCam, iVisit, and EvoCam. Adds new presets for the iBot FireWire camera. Crazy Colors now cycles through the rainbow of colors. Adds the ability to flip the video image upside down or mirrored (iChat only). Adds German localization. Fixes a bug where the presets showed up as French in all non-English languages. Fixes a bug where the iGlasses window did not show up correctly in the Windows menu. Changed the behavior of the demo messages. Fixed a bug where the installer would not work correctly if you're logged in as root. Fixes a problem where video settings might not have worked as expected. For iSight, White Balance has been removed from the feature menu. Auto White Balance is in effect unless Temperature is turned on. Also, the Exposure slider has been removed. The same effect can be achieved using the Shutter and Gain controls. If Shutter and Gain controls are turned off, then manual exposure will take over. Fixes an interface problem with OS X 10.2. iGlasses v1.1 resets the v1.0 trial, allowing for a new trial period.

10/1/04 - v1.0.1: Fixes a UI issue which caused iGlasses to incorrectly report that "Video source is not an iSight" in some situations.

10/1/04 - v1.0: Initial release.
