Application Wizard 1.6

shareware

MaBaSoft, info@mabasoft.net, <http://www.mabasoft.net>

Requirements: Mac OS 10.2 or later

Application Wizard makes working with applications in Mac OS X easier and quicker by letting you open, quit, show, and hide single applications or groups of applications, open applications automatically at startup, force applications to open using Rosetta or in Classic mode, force applications to quit and relaunch them, and quit background-only applications.

BBEdit 8.2.5

demo

Bare Bones Software, sales@barebones.com, <http://www.barebones.com>

Requirements: Mac OS 10.3.5 or later

BBEdit is a professional HTML and text editor that provides an abundance of features for editing, searching, and manipulation of text.

DayChaser 2.0

demo

Econ Technologies, jjapes@econtechnologies.com,

<http://www.econtechnologies.com>

Requirements: Mac OS 10.3 or later

DayChaser is a calendar and scheduling application that not only allows you to organize not only your personal time but also your work habits. DayChaser lets you create and manage multiple calendar documents simultaneously. Each calendar document contains its own unique set of scheduled entries and To-Do items that can be customized so your personal organizer is truly personal. Features include repeating entries, customizable filters, user-definable categories, color-coded entries, customizable views, Contextual Menus, date-range queries, automatic email generation, calendar/itinerary printing, and executable tasks.

Digital Alarm Clock 2.6

trial

Acutus Trading, chris@acutus.ca, <http://acutus.ca>

Requirements: Mac OS 10.3 or later

Digital Alarm Clock is a small Mac timekeeping and alarm-clock application. Its authentic-looking LED clock illuminates Mac desktops in reassuring primary colors to tell time the seventies way. Digital Alarm Clock features digital and analog chimes and an option to launch any application or file. Alarms can also launch iTunes to play tracks and playlists.

Dossier 2.1.1

trial

Vortimac Software, <http://www.vortimac.com>

Requirements: Mac OS X or later

Dossier is a full-featured information organizational tool for the Mac, good for keeping and organizing notes, to-do lists, passwords, or virtually anything else.

EntourageABMenu 1.2

shareware

Jonathan Nathan, jonn8@mac.com, <http://homepage.mac.com/jonn8/eabm>

Requirements: Mac OS 10.3.9 or later, Microsoft Entourage v.X or 2004

EntourageABMenu is a convenient and intuitive way to utilize your Microsoft Entourage address book data through a system-wide menu. The application provides quick access to your contacts' phone numbers, email, and postal addresses.

iUnit 3.2.0

demo

Black Cat Systems, csmolinski@erols.com, <http://www.blackcatsystems.com>

Requirements: Mac OS 10.1 or later

iUnit converts 1,580 different units of measurement in 51 categories, including distance, mass, volume, velocity, density, currency, and more. iUnit is perfect for students, engineers, scientists, and other professionals who need to quickly, easily, and accurately convert between various units of measurement. iUnit also contains 80 commonly used constants.

MapMemo 2.5

demo

Alexander Stengel, info@mapmemo.com, <http://www.mapmemo.com>

Requirements: Mac OS 10.3 or later

MapMemo allows you to organize all types of files on a map (image, scan, photo, drawing, and more) via drag and drop. Files get linked as aliases to that map and leave a red pin there. Clicking on such a pin means opening the related file in its original application.

Mens PumpOne Fitness

demo

PumpOne, info@PumOone.com, <http://www.pumppod.com>

Requirements: Mac OS 10.2.8 or 10.3.4 or later, iTunes 4.7 or later, iPhoto, iPod with color display

PumpOne Trainers are easy to use on your iPod. Just take a look at the simple, attractive interface; the bright, clear images; and the easy-to-follow exercise tips. Each image exercise in PumpOne Trainers includes a start position and an end position. The clear interface shows you which body part you're working, the exercise name, and the proper form. With just a glance, you'll know exactly how to do an exercise correctly and effectively to achieve maximum results.

OmniGraffle 4.1.1

trial

The Omni Group, omniweb@omnigroup.com, <http://www.omnigroup.com>

Requirements: Mac OS 10.3 or later

Move your white board to your Mac. OmniGraffle helps you draw beautiful

diagrams, family trees, flow charts, org charts, layouts, and other directed or nondirected graphs. If you want to organize anything graphically using boxes and lines, OmniGraffle is your tool.

OmniOutliner 3.5

trial

The Omni Group, omniweb@omnigroup.com, <http://www.omnigroup.com>

Requirements: Mac OS 10.3.9 or later

OmniOutliner is a flexible program for creating, collecting, and organizing information. Give your creativity a kick start by using an application that's actually designed to help you think. It's like having an extra brain -- one that doesn't keep losing the car keys.

pdf-DocPro 4.0

trial

Universe Software, <http://www.pdf-office.com>

Requirements: Mac OS X or later

Up to now, PDF files you created could only be used by the same version of Adobe Acrobat or a later version. In particular, there was no guarantee that the file would be shown properly in Acrobat Reader. There is now a simple, cost-effective solution for restoring compatibility between the various Acrobat versions: the pdf-DocPro software solution.

Reunion 8

demo

Leister Productions, <http://www.leisterpro.com>

Requirements: Mac OS 10.1.3 or later

Reunion helps you to document, store, and display information about your family -- your ancestors, descendants, cousins, and so on. It records names, dates, places, facts, plenty of notes, sources of information, pictures, sounds, and videos.

Screen Calipers

shareware

Iconico, us@iconico.com, <http://www.iconico.com>

Requirements: Mac OS 10.2 or later

Screen Calipers provides an accurate way to measure anything on your display, at any angle, in pixels, inches, or any unit.

Screen Compass

shareware

Iconico, us@iconico.com, <http://www.iconico.com>

Requirements: Mac OS 10.2 or later

Measure circular or polygonal areas on your screen with this digital draftsman's tool.

Screen Protractor 3.3

shareware

Iconico, us@iconico.com, <http://www.iconico.com>

Requirements: Mac OS 10.2 or later

The Screen Protractor allows you to measure any angle on your Mac's screen to the nearest degree or radian.

TaskTime 4.1.5

shareware

ToThePoint Software, customers@ttpsoftware.com <http://www.ttpsoftware.com>

Requirements: Mac OS X or later

TaskTime4 provides a straightforward method of tracking time spent on jobs you do for your clients. It can generate personalized invoices which can be emailed, printed, and saved to disk. Other important features include: project status tracking, Address Book integration for adding clients, linking of related resources to projects for easy reference, project expenses tracking, ability to bill for flat rate items, scheduled and manual data backup, minimizing of project windows to small floating time controllers, and more.

Ten Thumbs Typing Tutor 4.1

demo

Runtime Revolution, <http://www.tenthumbstypingtutor.com>

Requirements: Mac OS 10.1.3 or later

Ten Thumbs Typing Tutor 4.1 is your personal typing trainer that features the Five Habits of Highly Effective Touch Typing.

TextSpresso 3.0b1

demo

Taylor Design, <http://www.taylor-design.com>

Requirements: Mac OS 10.2 or later

TextSpresso comes bundled with over 250 filters for common and not-so-common text and data tasks. Clean emails, sort lines, extract URLs, convert Mac and PC files, prepare text for publishing, and even search the Web, all with the built-in filters.

VelaClock 1.5.1

shareware

Vela Design Group, info5@veladg.com, <http://www.veladg.com>

Requirements: Mac OS 10.4 or later

VelaClock is a world clock widget with a highly configurable user interface. Besides displaying local times, you can quickly display the time of sunrise, sunset, or twilight, duration of daylight, current phase of moon, time zone information, and much more. The interface can easily be configured to use a minimum amount of screen space or, if you wish, multiple lower panes can be opened to display more information and take up more screen space.

Yojimbo 1.1

trial

Bare Bones Software, sales@barebones.com, <http://www.barebones.com>

Requirements: Mac OS 10.4.3 or later

Yojimbo empowers Mac users to manage, effortlessly and securely, the onslaught of

information encountered every day at work and at home, even across multiple computers. Yojimbo stores different data types: text notes, passwords, Web bookmarks, product serial numbers, PDFs, and Web archives. Data input into Yojimbo follows familiar Mac User Interface gestures such as copy-and-paste, drag-and-drop, a Quick Input Panel, or PDF Services from the Print menu. Searching and retrieval are instantaneous, using either Yojimbo's built-in search or the Spotlight search system in Mac OS 10.4 (Tiger).
