

InterMapper Network Monitoring Software

Thank you for your interest in our InterMapper network monitoring software.
The enclosed .dmg file contains an installer for the current version of InterMapper.

As a special offer for MacAddict readers, we also provide a free, non-expiring license that allows you to monitor up to five devices. You may use it for:

- % The computers on your home network and the DSL/Cable connection, too
- % A small project at work
- % Non-profit or community networks that need to monitor a few critical resources
- % Monitoring a remote site with a separate license of InterMapper
- % [Tip your friends off to this deal, too!](#)

To use this license, install InterMapper by double-clicking the .dmg file, then click the "Enter your serial number" link and paste the license certificate below.
