A Better Finder Attributes 4.0.2

demo

Publicspace.net, reiff@publicspace.net, <http://www.publicspace.net>

Requirements: Mac OS 10.3.9 or later

A Better Finder Attributes allows you to change file information that the Finder won't let you touch: creation and modification dates, file flags, and so on. It also provides the ability to set creation dates according to the EXIF shooting date embedded in your digital photo files.

Cee Pee You 1.1.3

freeware

Unsanity, <http://www.unsanity.com>

Requirements: Mac OS 10.2 or later

Cee Pee You is a Menu Extra that displays your CPU's (or CPUs') load in your menu bar. The load averages are updated every second. Simple as that!

ChronoSync 3.2.1

demo

Econ Technologies, jjapes@econtechnologies.com, <http://www.econtechnologies.com>

Requirements: Mac OS 10.3 or later

ChronoSync is the easy way to synchronize or back up files and folders. Synchronize folders on your Mac, other Macs, PCs, external drives, or iPods. Set up a sync document to schedule and automatically mount volumes so your syncs and backups are never missed. Archive your data and go back in time to restore and view older files. With ChronoSync, you can do a lot more than just copy data, you can manage data, too. Exclude files and folders, check the current sync status of files, even run trial synchronizations to see what will happen before it happens.

Disk Order 2.1

trial

LikeMac Group, support@likemac.ru, www.likemac.ru/english

Requirements: Mac OS 10.4 or later

Disk Order is an advanced Finder replacement with built-in FTP client and ability to handle archives like plain folders.

DiskTracker 2.3.3 (Classic)

shareware

Portents, support@portents.com, <http://www.portents.com>

Requirements: System 7.5.3 (with Appearance Manager 1.3) or later

This powerful cataloging utility helps you keep track of what's on your CDs, Jaz disks, Zip disks, external hard drives, iPod, servers, and more. Plus, it features a handy disk-labeling system to create and print professional disk labels. A truly excellent program, especially if you have a number of removable media disks. You'll need this to view the *MacAddict* Disc catalog, which was created with this program. Don't forget to send in your shareware fee if you use it.

DiskTracker 2.3.3 (Mac OS X)

shareware

Portents, support@portents.com, <http://www.portents.com>

Requirements: Mac OS X or later

This powerful cataloging utility helps you keep track of what's on your CDs, Jaz disks, Zip disks, external hard drives, iPod, servers, and more. Plus, it features a handy disk-labeling system to create and print professional disk labels. A truly excellent program, especially if you have a number of removable media disks. You'll need this to view the *MacAddict* Disc catalog, which was created with this program. Don't forget to send in your shareware fee if you use it.

InterMapper 4.4.3

demo

Dartware, Richard.E.Brown@dartware.com, <http://www.intermapper.com>

Requirements: Mac OS 10.2.8 or later

InterMapper is a network-monitoring application. It continually tests the performance of your networked equipment (routers, switches, servers, workstations, etc.) and lets you know when there are problems. **IMPORTANT:** You need to use the license code in the InterMapper Read Me to unlock the software.

Mactracker for iPod 1.0

donationware

Ian Page, ian@mactracker.ca, <http://www.mactracker.ca>

Requirements: iPod software that supports the Notes feature

Mactracker provides detailed information on every Apple, Motorola, PowerComputing, and UMAX Mac OS computer ever made, including items such as processor speed, memory, optical drives, graphic cards, supported Mac OS versions, and expansion options. Also included is information on Apple mice, keyboards, displays, printers, scanners, digital cameras, iPod, AirPort Base Stations, Newtons, and Mac OS versions. This iPod version lets you take that information with you wherever you go.

Mactracker 4.0.4

donationware

Ian Page, ian@mactracker.ca, <http://www.mactracker.ca>

Requirements: Mac OS 10.2 or later

Mactracker provides detailed information on every Apple, Motorola, PowerComputing, and UMAX Mac OS computer ever made, including items such as processor speed, memory, optical drives, graphic cards, supported Mac OS versions, and expansion options. Also included is information on Apple mice, keyboards, displays, printers, scanners, digital cameras, iPod, AirPort Base Stations, Newtons, and Mac OS versions.

Power Manager 3.2.1

demo

Dragon Systems Software Limited, graham.miln@dssw.co.uk, <http://www.dssw.co.uk>

Requirements: Mac OS 10.3.9 or later

Power Manager is a tool for saving energy by automating your Mac. You can schedule your Mac to automatically start or wake up, shut down, restart, log out, fast-switch users, sleep, and wax your car. OK, not that last one.

Suitcase Fusion 12.0.1

trial

Extensis, <http://www.extensis.com>

Requirements: Mac OS 10.3.9 or later

Fusing Font Reserve with Suitcase, Suitcase Fusion is the next-generation professional font manager.

SuperDuper 2.1

trial

Shirt Pocket, dnanian@shirt-pocket.com, <http://www.shirt-pocket.com>

Requirements: Mac OS 10.3.9 or later

SuperDuper can make fully bootable backups.

TechRestore Demo

video

TechRestore, <http://www.techrestore.com>

Requirements: QuickTime

TechRestore sells mobile products, including PowerBooks and iBooks, laptop accessories, iPods and audio accessories, PDAs, and digital cameras and accessories. PowerBookRestore provides 24-hour door-to-door repair service for PowerBook and iBook owners worldwide. MacRestore offers a 24-hour parts repair and replacement service for Power Mac G4, G5, and iMac owners. iPodRestore provides a 24-hour door-to-door repair service for iPod owners worldwide.

Track Destroyer 1.2.1

trial

Koingo Software, main@koingosw.com, <http://www.koingo-newsletter.com>

Requirements: Mac OS 10.2 or later

Unlike some other privacy-protection tools which only delete the files and thus can be easily recovered by some data-recovery tool, Track Destroyer completely removes those files from your hard disk without the possibility to recover them by any practical software or hardware methods.

USB Overdrive 10.4.5

shareware

Senlick, info@senlick.com, <http://www.senlick.com>

Requirements: Mac OS 10.2.8 or later

The USB Overdrive X is a device driver for Mac OS X (Jaguar, Panther and Tiger) that handles any USB mouse, trackball, joystick, and gamepad from any manufacturer and lets you configure them either globally or on a per-application basis.

XPostFacto 4

freeware

Other World Computing, <http://eshop.macsales.com/OSXCenter/XPostFacto>

Requirements: Mac OS 9 or later

Apple has chosen to limit the machines which are supported by Mac OS X, but XPostFacto can help get Mac OS X working on some older machines. XPostFacto is an open-source application which you may download or install from this Disc and try without registration. However, you are encouraged to contribute to the ongoing work on XPostFacto by registering as an XPostFacto user (\$25). This helps to support the continuing development of XPostFacto, and also gives you an account on the tech-support forum. Contributions from previously registered users of XPostFacto to further its continuing development are welcome.
