"L'arte nell'antico Egitto"
Video footage supplied by VIDEA spa, Rome

Made with MacroMedia
DIRECTOR © 1994 Macromedia, Inc.

Notes from MacroMedia for Use of "Egypt" application:

Application require at least 4Mb of real memory and at least a 2Mb swap file. A larger swap file will improve application performance.

Video Cards

The application was developed using Macromedia Director.

Director requires video software drivers and hardware that fully support Windows 3.1 standards. The list below show video systems that have been tested and found to be compatible with Director authoring and playback. Installing the latest available video ROM and software is generally recommended. Contact the video card manufacturer for information.

The following video cards have been tested and give good results for MacroMedia applications:

Video card	Bus Type	DRIVER Date	Rev	Notes
Actix ProStar VL	VLB	8/18/93	1.42	Note 1
ATI Graphics Ultra	ISA	3/19/93	2.3	
ATI Graphics Ultra Plus	ISA	4/25/94	2.3

TrueVision Bravado 8	ISA	1/15/92		

Note 1: Driver version 1.53 sometimes hangs when playing certain Director
transitions. Driver version 1.42 is recommended.
Note 2: Set DeviceBitmaps=OFF in the Windows SYSTEM.INI file [MACH] section
after card software installation if using this driver version.
Note 3: Use in 256 color mode only.
Note 4: Does not always properly display QuickTime digital video in 16 bit
(thousands) and 24 bit (millions) color modes
Note 5: Does not draw extremely wide arcs properly.
Note 6: This card does not draw extremely wide arcs properly.
Note 7: There is sometimes sound break-up or distortion during complex transitions
using most sound cards.
Note 8: The cursor sometimes disappears when using a large virtual desktop.
Note 9: Video snow appears during some palette transitions

Sound Cards

Pleasing sound effects and sound start-up response time depends on the capabilities of the
card and the performance of the system. The following sound cards have been tested and
are compatible with Director:

Sound Card   Notes and comments

Compaq Business Audio
Creative Labs SoundBlaster
Creative Labs SoundBlaster Pro

Creative Labs SoundBlaster 16
Creative Labs SoundBlaster AWE32
Gateway 2000
IBM M-Audio   Driver version 1.3 - Note 1
MediaVision ProAudio Spectrum
MediaVision ProAudio Spectrum 16
MediaVision ProAudio Spectrum 16 Pro
MicroSoft SoundSystem Version 1
MicroSoft SoundSystem Version 2
Orchid SoundWave 32
Reveal Forte 16
Roland Rap-10

Note 1: IBM computers that have the M-Audio sound card should use driver version 1.3 or higher for best results. Older versions of this driver don't play some sounds in Director or AVI movies. The version 1.3 driver does not pass the 16-bit sounds test for Director. Testing revealed that 8 bit sounds are corrupted when played after a 16-bit sound. At the time these release notes were written, version 1.3 (dated 1/10/94) was the most recent driver available from IBM.

Operating Systems

Director for Windows has been extensively tested on Windows 3.1 and Windows 3.1.1.
