What is Automated Internet?

Welcome to the most powerful communications package you'll ever find.   AutoWinNet   has been called "a batch file language for the Internet", but it's actually intelligent.   AutoWinNet is intelligent.   If   he doesn't find a ftp site, then he   doesn't try downloading files,   changing directories, etc. at that site...   If it cannot find ONE   particular prompt, he looks for   others.   This super-advanced program   is the only one of its type.   Fast, efficient, and worthwhile to try out.

I use AutoWinNet every single day to find new files on the Internet for my bulletin   board.   I get the LATEST Scan, F-PROT, TBAV, and all the games FOR FREE!   No long distance charges.

If you are an Internet "dummy", don't use this program!   This is for   the average user of the Net that loves to wander around and find new cool files, but HATES spending hours at a time sitting in front of the computer.

   Here is your answer.

AutoWinNet:

Gives you unlimited access to TERABYTES of   Internet files without   forcing you to sit in front of your computer for hours.

Mail your letters automatically, even to hundreds of recipients at one time.   Great for announcements, personal letters or business purposes.   Plus spell-check your work, and add both binary and text attachments.

Allows super-advanced Internet access using the graphical SLIP/PPP accounts.DOWNLOAD WWW Pages, even when you're not home....

Uploads files to Internet sites.   This is great for authors who want to distribute their programs automatically, or for Corporations that need to transfer a large quantity of files, but don't want the heavy long distance charges.

Leeches files from anywhere, take them all without hesitation, even access World Wide Web pages from all over the nation and view them offline.

Full Windows, Windows NT and Windows '95 support

Hammers at Internet sites that are busy, and require hours of   frustration to get on.   AutoWinNet will get on, guaranteed.   Even if it has to try for hours.   Even allows you to adjust the time between hammers!.

Obtain the latest sports, weather, and daily info.

Post Usenet messages - up to 1,000 of them without touching   your keyboard (with file attachments, too!)

Fax people from the Internet.   No long distance charges.

Find the latest new files and games.. WHILE YOU'RE NOT HOME!

Download more files than your hard disk can hold without long distance charges.

Get updates to your favorite programs automatically - direct from their support Internet site.

Access the Internet with super-speed.   You cannot type as fast as AutoWinNet can!

If you're calling long distance to access the Internet, AutoWinNet   cuts your phone bill in HALF by whizzing through your tasks   faster than you could do them.

Keep mailing lists of important clients - give them updated newsletters or up- to-the-minute information without having to touch your   keyboard.   Don't hire an extra person to handle your Internet   tasks, let AutoWinNet take care of them for half the cost. Also includes file attachments to your messages.

Completely integrated file manager, allowing advanced functions to your database, like viewing in a spreadsheet format, sorting by date/time, size, name, directory or site, a CLEANUP mechanism for deleting unused directories/sites from your dbase.

Importing unix-based LS -LR large file listings for easily adding huge number of files.

Customized FTP logins for administrators

Why should I automate my Internet sessions?

So...   you have a PPP/SLIP account?

Those are fantastic for getting or sending mail, but for files...   they just won't cut it.   You STILL have to sit at your   computer and click on the files you want, get them to your local computer,   then hunt down any new files that might   interest you at different   sites on the Net.

Tried logging onto wuarchive.wustl.edu lately?

How about ftp.cdrom.com?

Good luck.   You usually cannot get on.   And if you're persistent,   you can click on   the old FTP icon fifteen THOUSAND times and might get on.   But then, if the site   times out or disconnects you, I can personally guarantee you'll cuss at your   computer   violently and become very frustrated.

Argh... forget it.   Don't you have better things to do?

Isn't your time worth something?

Concerning Internet mail: That's fun.   Just click on your recipient   and write a beautiful message.

But what happens when you become responsible for a mailing list?
You must type in all the recipients' names, separated by a   comma.   And if you miss a comma, or put a space in there accidentally,   you have to re-type it all over again.

Doesn't Windows' 8 point font look blurry after a while?   Wouldn't   it be nicer to simply click on the people you want   to add/remove   from the list and let AutoWinNet do all the messy work for you?

In short: # What a pain!

Your time is valuable... use AutoWinNet to retrieve any new files   and then download   them while you do something YOU   want to do.   Go jog, workout, shop, sleep, go out with your wife/girlfriend,   do the things you REALLY want to rather   than getting new files for hours at a time.

You can also use Automated Internet for DOS on your SHELL account, and save some money there, also!

Get a WWW page while I'm asleep?

Absolutely.

When you dial in to your Internet provider, there is no one on the other end,   waiting to hand you your mail, or Internet   files...   so why should YOU be on YOUR end typing all the commands and clicking the icons?

Related Topics:

AutoWinNet is good for you

AutoWinNet is good for your provider

AutoWinNet is good for you

Obviously, because it saves you countless hours and headaches by doing tedious things for you.

Tried logging onto <u>wuarchive.wustl.edu</u> lately?

Good luck.   It's always busy.

However, if you call at 5:00am, when everyone else in your area is asleep, you probably can get on **immediately**   instead of clicking on the FTP button 4,000 times.

AutoWinNet is good for your provider

Most people call their Internet provider after they get off work, or on weekends.   That means that most EVERYONE is logging on to the Internet during the evenings.

From a provider's standpoint, that's bad.   He has a limited number of modems in stock, and a limited number of   lines.   Plus, when everyone logs on during the evening, his UNIX box will naturally SLOW DOWN considerably,   and you will notice a huge performance drop.   Files transfer slower, your newsreader takes longer to update its screens, and Telnet sessions are bogged that you could cook dinner between keystrokes.

That's not good for you, the customer, and obviously not good for the provider.

By spreading the <u>PEAK times</u> around, AutoWinNet allows:

1.	Your file transfer rates are **FAST**

2.	Your mail is sent quickly

3.	Your provider doesn't have to purchase more modems, and therefore pass his savings onto YOU.

4.	Your provider has less support calls. Since AutoWinNet does all the work,there's little chance of a typing error or mistake during file transfers.

What is the "LITE" version?

AutoWinNet Lite is a tool to automate your Internet sessions.

If you enjoy AutoWinNet Lite, you'll **love**

AutoWinNet Professional.

The professional version allows:

- Running scripts when you're not home - limited only by diskspace
- Sending mail - up to 2,000 messages at once - and include file attachments!
- Obtaining WWW pages in text format
- Subscribe to various mailing lists, automatically, or get sex news, NASA newsletters, access Area Code information, plus tons more
- Post messages in USENET newsgroups - unlimited numbers.
- Advanced File Manager - handle your Internet files in your online database with powerful functions, such as viewing in spreadhseet format, sorting by anything, deleting old sites/directories, importing huge unix-based directory listings and much more.

More features coming?

There are many new and interesting features to come.   AutoWinNet is a constantly evolving, growing program designed for the home and business user.

All suggestions are welcomed and encouraged!

Our goal is to help YOU obtain more free time and enjoyment from the Internet, rather than be imprisoned at your desk for hours on end.

If AutoWinNet's features aren't enough for you, and your company needs a customized version, contact David Smith for pricing.   We can designed AutoWinNet around your corporate needs and create a copy with your logo, and your name on the front.

CURRENT FEATURE BOILERPLATE LIST

INSTANT FTP ACCESS

I like getting new files, so I created AutoWinNet to get new files listings from various sites, then I can choose them from a convenient Windows listbox, and wala!   He goes and gets all the files I want.

I also HATE it when a FTP site is busy, and I have to re-click on the FTP icon OVER AND OVER AND OVER AND OVER until I get on.

Frankly, I got better things to do!

Therefore, AutoWinNet hammers at the site until he gets on (you can configure how many times to hammer before he gives up)

MAIL ALL YOUR FRIENDS
I keep several mailing lists of friends, and people who want to find new info on Automated Internet.

So I invented a MAIL LIST function, and the regular MAIL functionality.   Now you can keep hundreds of mailing lists (customers, friends, associates) and automate messages to any of these.

Edit your messages...   Even include binary and text attachments!   You can also automated monthly mail, getting your mail, sending out regular stuff, etc...

USENET NEWS READING/POSTING

Instead of wandering through a newsreader, choosing messages, reading/writing, etc...   wouldn't it be great to post usenet messages automatically?

So I invented posting to groups without ever logging onto the Internet!
If ya need help with MICROSOFT WORD 6.0 problems, or just like to chat, you can post "HELP ME WITH

MS-WORD!" along with all your problems to a couple of word-processing newsgroups.   If anyone can help ya, they can.

Edit your posts...   Even include binary and text attachments!   In turn, the people can write you mail in response to your questions...

DAILY STOCK REPORTS

Yes, yes.   You can subscribe to daily stock reports, White house updates, Yanoff's Internet list, plus tons more.   Just click the button and Automated Internet takes care of the rest.

You will receive these great things almost daily, and be updated on the world events...

        IMAGINE THAT   :-)

WWW PAGES

I thought it would be great to get WWW pages (no graphics!   I ain't a graphics programmer!) off-line.

I hate waiting for the screen to update when trying out new WWW pages.   Wouldn't it be better to simply download all that junk off-line?

Then you could read it without the hassle, using your preferred web browser.

INTERNAL FILE MANAGER

Complete file manager that includes editing the incredible, internal database of files, querying the database, plus tons more!   You will be *very* impressed with the file manager's robust features.

Limited warranty

LIMITED WARRANTY AND DISCLAIMER OF WARRANTY

THIS SOFTWARE AND ACCOMPANYING WRITTEN MATERIALS (INCLUDING INSTRUCTIONS
FOR USE) ARE PROVIDES "AS IS" WITHOUT WARRANTY OF ANY KIND. FURTHER, DAVID SMITH
AND <u>JIM HUSBAND</u> DO NOT WARRANT, GUARANTEE, OR MAKE ANY REPRESENTATIONS
REGARDING

THE USE, OR THE RESULTS OF USE, OF THE SOFTWARE OR WRITTEN MATERIALS IN TERMS
OF CORRECTNESS, ACCURACY, RELIABILITY, CURRENTS, OR OTHERWISE. THE ENTIRE
RISK AS TO THE RESULTS AND PERFORMANCE OF THE SOFTWARE IS ASSUMED BY YOU.

IF THE SOFTWARE OR WRITTEN MATERIALS ARE DEFECTIVE **YOU**, AND NOT
DAVID SMITH, JIM HUSBAND OR THEIR DEALERS, DISTRIBUTORS, AGENTS, OR EMPLOYEES,
ASSUME THE ENTIRE COST OF ALL NECESSARY SERVICING, REPAIR, OR CORRECTION.

THE ABOVE IS THE ONLY WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED,
INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND
FITNESS FOR A PARTICULAR PURPOSE, THAT IS MADE BY DAVID SMITH AND JIM HUSBAND,
ON THIS PRODUCT.

NO ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY DAVID SMITH, JIM
HUSBAND, OR THEIR DEALERS, DISTRIBUTORS, AGENTS OR EMPLOYEES SHALL CREATE
A WARRANTY OR IN ANY WAY INCREASE THE SCOPE OF THIS WARRANTY AND YOU
MAY NOT RELY ON ANY SUCH INFORMATION OR ADVICE. YOU MAY HAVE OTHER
RIGHTS WHICH VARY FROM STATE TO STATE.

NEITHER DAVID SMITH, JIM HUSBAND, NOR ANYONE ELSE WHO HAS BEEN
INVOLVED IN THE CREATION,   PRODUCTION OR DELIVERY OF THIS PRODUCT SHALL BE
LIABLE FOR ANY DIRECT, INDIRECT, CONSEQUENTIAL OR INCIDENTAL DAMAGES
(INCLUDING DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION,
LOSS OF BUSINESS INFORMATION, AND THE LIKE) ARISING OUT OF THE USE OR
INABILITY TO USE SUCH PRODUCT EVEN IF DAVID SMITH AND JIM HUSBAND HAVE BEEN
ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

This Limited Warranty shall be governed and construed in accordance with
the laws of the State of Texas.

ACKNOWLEDGMENT

BY USING THE SHAREWARE VERSION OF AutoWinNet, YOU ACKNOWLEDGE THAT YOU
HAVE READ THIS LIMITED WARRANTY, UNDERSTAND IT, AND AGREE TO BE BOUND BY ITS'
TERMS AND CONDITIONS. YOU ALSO AGREE THAT THE LIMITED WARRANTY IS THE
COMPLETE AND EXCLUSIVE STATEMENT OF AGREEMENT BETWEEN THE PARTIES AND
SUPERSEDE ALL PROPOSALS OR PRIOR AGREEMENTS, ORAL OR WRITTEN, AND ANY OTHER
COMMUNICATIONS BETWEEN THE PARTIES RELATING TO THE SUBJECT MATTER OF THE

LIMITED WARRANTY.

View or edit Agendas
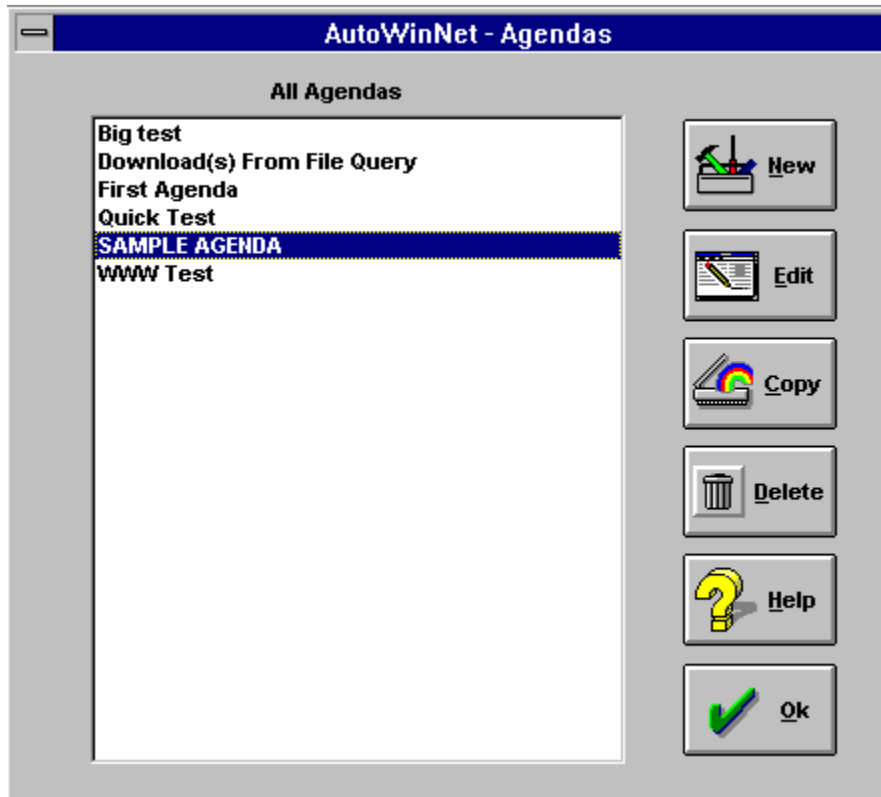

NEW

This creates a new agenda

You are then prompted for an Agenda name (which can be anything)   After you create this new agenda, you will be prompted for activities to add.

For example:

1.   Download file
2.   Upload a file
3.   Obtain new files list

EDIT

Edit the highlighted agenda

Please Note: You can double click on an agenda name to **EDIT**

You will be taken to the agenda editing screen, where you can choose different activities to add.

For example:

1.   Download file
2.   Upload a file
3.   Obtain new files list
4.   Send mail letters
5.   Post USENET news messages
6.   Get World Wide Web pages as text

COPY

Make a duplicate of the highlighted agenda

If you want a new agenda that will be similar to another you have already made, it's much easier to just copy the agenda to another name, then edit it.   This eliminates you having to type in all the activities again, and saves time.

After you create a name for your new agenda, it will appear in the All Agendas listbox, and you can then edit it.

DELETE

Delete the highlighted agenda

CAREFUL!

You may lose many hours of setting up if you delete the wrong agenda.

Quick tutorial

CREATE A NEW AGENDA

Let's create a new agenda, to learn how one is made and what they consist of.

1. Click VIEW OR EDIT AGENDAS from the main menu
2. Click NEW to make a new agenda
3. Type in TEST AGENDA 5 in the text box and click OK

   That will be the name of our new agenda.

The EDITING AGENDA screen will appear, and you're now ready to add some steps.   Each agenda consists of several steps you want AutoWinNet to run.

For example, go get a new file list, download a file, upload a file, etc.

4. Click FTP to create a FTP step.

The FTP SERVICES window should now appear, listing several possible FTP sites for you to visit.   In the dialog on the left, oak.oakland.edu should be listed.   If it's not there, click NEW then type in oak.oakland.edu.

5. Single click on oak.oakland.edu in the FTP SITES listbox.   The buttons in the FUNCTION section should now come to life.
6. Click REFRESH and the SELECT DIRECTORIES or the REFRESH dialog will appear.

Now, if you have visited oak.oakland.edu before, then you will see all the oak.oakland.edu directories listed up top.   When you click on one, it appears in the text line at the bottom.

Since we've never been here before, highlight the lower text box, and type in /SimTel/win3 then click the SELECT button.
That tells AutoWinNet to FTP to oak.oakland.edu, and get all   the directories under /SimTel/win3, which is naturally all the Windows file directories they have.

The next time this dialog appears when you choose oak.oakland.edu, you'll see a ton of directories you can select from.

7. After you clicked DONE, you should now be back at FTP SERVICES
8. Since one agenda item is okay for our first try, click on the EXIT button to save your new agenda to disk, and exit

The EDITING AGENDA dialog should have one entry:
   Connect to oak.oakland.edu, refresh file list from /SimTel/win3

So click on EXIT then click the OK button on the AGENDAS dialog.

Please Note:

If you want to see the Agenda run right now, press the RUN button during your agenda edit.

Agenda Steps

Editing Agenda

Agenda - [NightlyBBS]

```
Connect to complex.is, refresh file list from /pub
Connect to ftp.magi.com, refresh file list from /thunderbyte
Connect to ftp.mcafee.com, refresh file list from /pub/antivirus
Connect to ftp.uni-hamburg.de, refresh file list from /pub-informatik/virus/progs
Connect to oak.oakland.edu, refresh file list from /SimTel/msdos/4dos
Connect to oak.oakland.edu, refresh file list from /SimTel/msdos/animate
Connect to oak.oakland.edu, refresh file list from /SimTel/msdos/archiver
Connect to oak.oakland.edu, refresh file list from /SimTel/msdos/arcutil
Connect to oak.oakland.edu, refresh file list from /SimTel/msdos/asmutil

Connect to oak.oakland.edu, refresh file list from /SimTel/msdos/bbslist
Connect to oak.oakland.edu, refresh file list from /SimTel/msdos/binedit
```

Add Agenda Steps

FTP	WWW	Special	Usenet	Mail

Exit	Run	Help	Purge	Delete

---

1.   Click on **VIEW OR EDIT GENDAS** from the main menu
2.   Create a new agenda called TEST AGENDA 1
3.   Click on **FTP**
4.   Click on oak.oakland.edu in the listbox

*If it's not in there, add it using the **FTP** button*

5.   Now click the **REFRESH FILES LIST** and type in /SimTel/msdos at the bottom text box

Run that agenda to collect all the subdirectories of /SimTel/msdos at oak.oakland.edu

6.   Once it's done, go back to **AGENDAS**, then **FTP** and click on oak.oakland.edu again.   And wala!
You see all the new directories up top?   Those are ones we just obtained in that last agenda.

If, now you want to see what files are in the /SimTel/msdos/modem directory   (maybe a new version of
AUTO-net for DOS!)

Click once on it, then click on **EXIT**

And the next time you click **REFRESH DIRECTORIES**, you'll find all the files inside

/SimTel/msdos/modem

Downloading a file

/SimTel/win3/astronmy;/SimTel/win3/bakernws;/SimTel/win3/barcode;/SimTel/win3/biology;/SimTel/win

✔ **Select**   ❓ **Help**   ❌ **Cancel**

1.   Click **VIEW OR EDIT GENDAS**, either create a new agenda, or click on an existing one, then **FTP**, oak.oakland.edu, like we did before.

You should now be at the AGENDA-FTP SERVICES screen.

2.   Click on **DOWNLOAD**

Please Note:

Any files with a "0" size are either directories or user-oriented messages.

3.   The top listbox should contain several files, one of which is /SimTel/msdos/DIRLIST.TXT   If you don't see that filename, it's because you haven't **REFRESH**ed **FILES** there, yet.

4.   Highlight those files (or type them in at the bottom of the screen, separated by semicolons) and click **SELECT**

5.   Now click **EXIT** from the **AGENDA-FTP SERVICES** screen

6.   Now click **RUN** from the **Editing Agendas Screen**

Quick tutorial

RUNNING OUR NEW AGENDA

You ready to roll?

1.   Click **ONLINE OPERATIONS** from the main menu.

Please Note:

MAKE SURE YOU'RE CONNECTED TO THE INTERNET WITH YOUR DIALER AND YOU HAVE A
SLIP/PPP ACCOUNT RUNNING!

*I don't want any support calls from people who have <u>shell</u> accounts, and cannot figure out why this won't
work.*

2.   Highlight your agenda name and click on ADD >   (or double click the name)

*If you don't see your agenda listed in the left listbox, start over from scratch.   You didn't create the
agenda successfully.*

3.   In the right listbox, your agenda name should appear.
4.   Click **RUN**

Run Agenda dialog
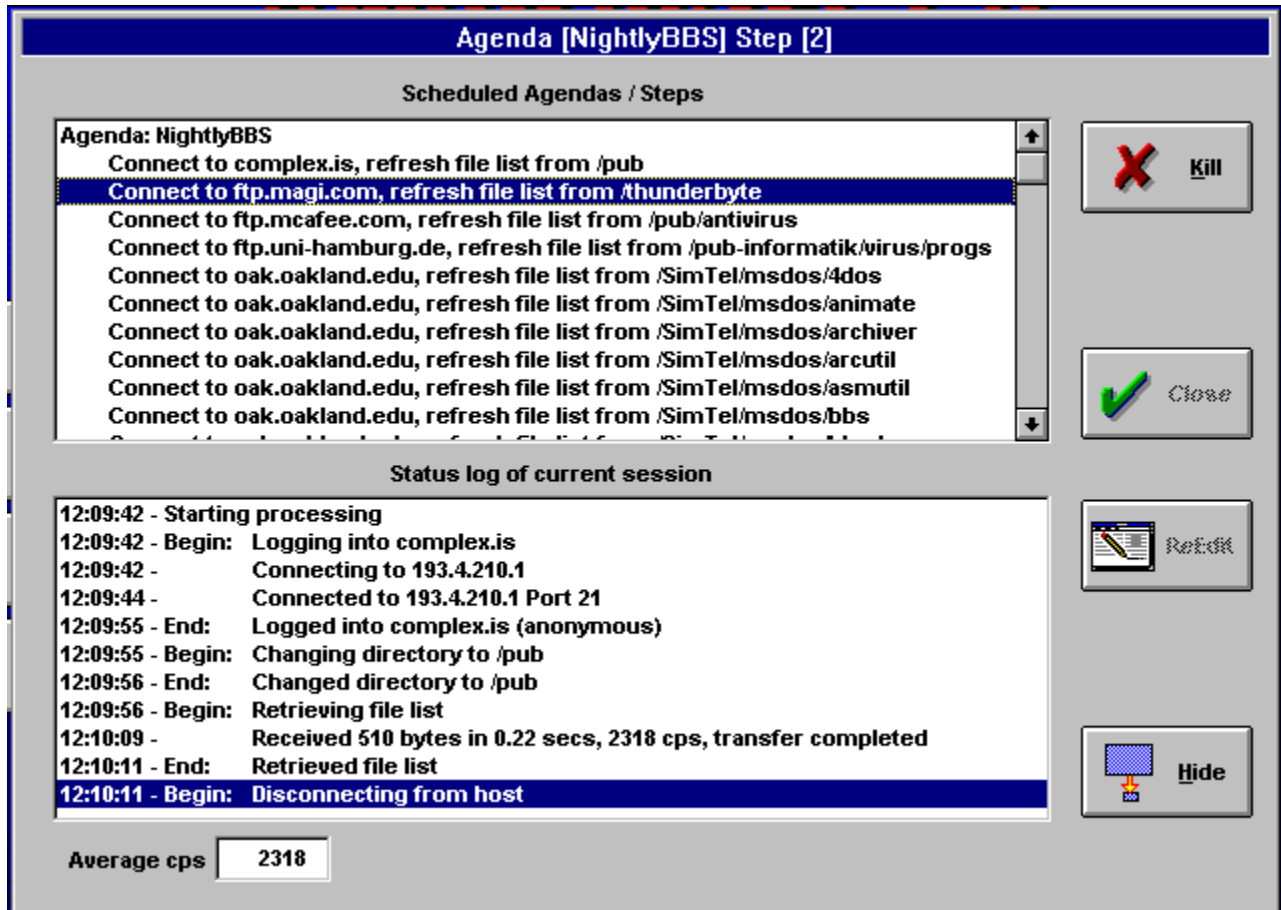

After pressing the **ONLINE OPERATIONS** button from our main menu, you will see the above dialog.
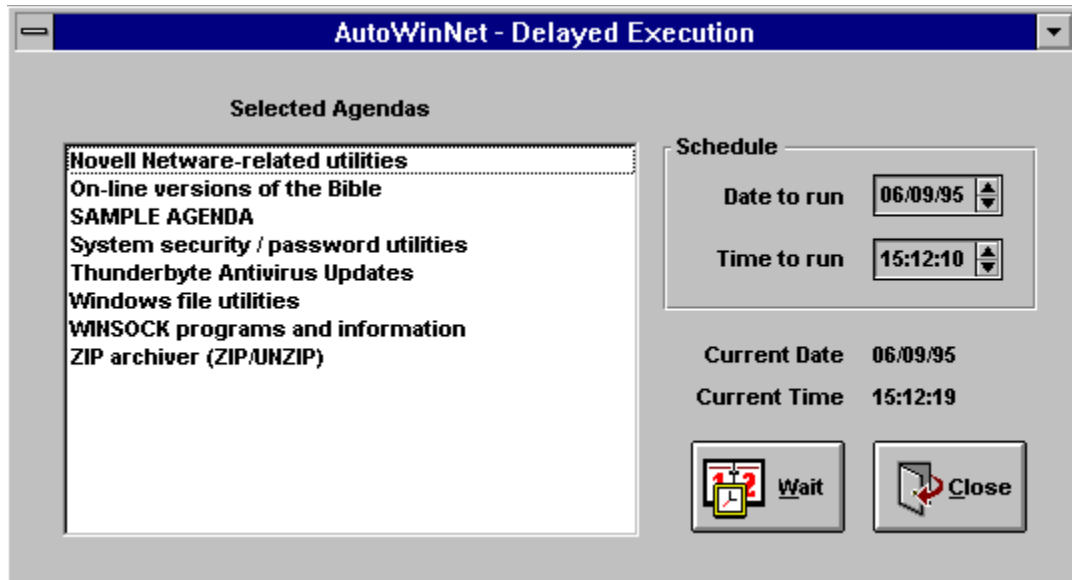

Add

Double click on an agenda name in the left listbox to add it.   Or simply press the Add button.   You can add multiple agendas by clicking on several agenda names in the left listbox.

Run

This runs the agenda listed in the right listbox immediately.

Later

This runs the agendas listed in the right listbox at a later time.   You will be prompted for the exact time and daet in which to start your agendas.   Once you press WAIT, AutoWinNet will minimize and wait for the desired day/time.   And when it arrives, he will pop up and begin running the agendas you have scheduled.

QUICK TIP: Double click the DATE field to get a calendar.   You can then simply scroll through the months/years/days and choose which day you want.

Please Note:

Most Internet sites do maintenance late during the evening.   If you run an agenda during this time, you will probably get many errors or time-outs logging onto the FTP sites.

While waiting for an Agenda to run, youll notice the buttons have changed (if you restore the minimized program).   You can now (while waiting) tell AutoWinNet to stop waiting, or continue.

Watching your agenda run

During the actual run, you can watch up top, as each step of your agenda takes place.   And on the bottom listbox, communication proceeds between AutoWinNet and your Internet site.

KILL

Stop the running agenda immediately.

Please Note:

The **KILL** button will terminate all agendas, and exit the program.   Be very careful when using this button, since it makes the Winsock unstable if used over and over and over and over.

RE-EDIT

Goes back into the agenda editor with your current agenda.   This is designed for creating and running temporary agendas - do NOT click RE-EDIT on your favorite agenda.   It will be wiped out.

HIDE

Minimize AutoWinNet while it's running your agenda.

QUICK TIP: Use the RE-EDIT button!   It saves lots of time when you simply want to run an agenda, then re-edit the same name to perform more steps.

Frequent Run Agenda problems

It just sat there

Kept saying "Retrying site" and did nothing

It keeps timing out, no matter what I do

It just sits there...   Nothing is happening

The file manager does nothing

Frequently asked questions::

BEFORE REPORTING A PROBLEM:

Check the new Frequently Asked Questions WWW page:

http://www.computek.net/autownet/problem.html

Make sure your Winsock is connected, and you are logged into the Internet.   99.9999% of all problems are resolved if you just RESTART WINDOWS, and re-dial/login to your Internet provider.   Winsock (especially Trumpet's) is very unstable and can become hosed for almost any reason whatsoever.   We test new versions of AutoWinNet for almost **THIRTY HOURS** before shipping them out, so we know they work and function properly.   If you are having difficulty, we will attempt to resolve your problem as soon as possible.

AutoWinNet doesnt work with TIA
Thats right, and it never will.   TIA merely emulates a SLIP account, however its not a true SLIP connection.   Therefore, AutoWinNet cant do anything with it.

If you have a SHELL account, try **Autonet for DOS** - oak.oakland.edu/SimTel/msdos/modem/autont33.zip

I can't get onto any FTP sites
The most frequent cause of this is your CONFIGURATION.   Make sure your login name and host name are correct.   If you full address is physics@computek.net, then your login name is physics and your host name is computek.net

NETCOM is my provider, and AutoWinNet frequently times out
Netcom, in general is slower than all the other providers because of their large volume of members.   Try at a non-peak time, or obtain another Internet provider in your area.

Is there any way to have a list of News Groups to post to (similar to mailing lists)? If not, then How can I select more than 1 news group for a post (I tried both the shift and ctrl keys)?

News group reading, multi-newsgroup posting and mail retrieval and reading are due out in version 2.0

How do I create a custom login to an FTP site?
To create a custom login at a FTP site, choose FTP from the agenda editor, select a site in the listbox, and click the **EDIT** button.   Custom logins are used for security at some FTP sites.   If you are a system admin, or have an actual "REAL ACCOUNT" at an FTP site, you will be required to enter your name and password (instead of anonymous and your address)

Is AutoWinNet crippleware?

No, no no.   We have designed AutoWinNet so that you can VIEW all your steps, how to create them, and how to customize them for your own needs.   The only thing disabled in the Lite version is actually RUNNING mail, web and usenet features.   FTP is still fully functional, and is what most people utilize. The features listed here obviously work, otherwise, people wouldn't be buying it (and trust me, they're buying a LOT of it).   So if you're happy and content with AutoWinNet Lite, I encourage you to get AutoWinNet Professional.   Otherwise, continue using the Lite version to your heart's desire.

I had an unknown problem.. now what?

Be sure to read over the help file, so you don't duplicate someone else's reported problem.   Then turn on VERBOSE LOGGING in your configuration, and try to reproduce your problem.   After gathering all that, send me your log, along with your config file (uuencode them first) to: physics@computek.net, and I will try to resolve whatever difficulty you may be having.

It just sat there

Make sure your agenda has some items in it.   If your agenda is empty, it will appear to just sit and wait.

Another problem may be with your WINSOCK.   Frequently, a winsock dialer will time-out and hang up on your Internet provider without telling you.   Then, no matter what you do, all your Internet programs just do nothing.

Make sure you're still connected, and the WINSOCK dialer has not hung up.

Kept saying "Retrying site" and did nothing

If AutoWinNet does not log successfully on a site, it will "hammer" until it gets on.   You can tell AutoWinNet not to hammer at any sites, or you can specify how many times you want it to try getting on your FTP site before it quits.

Both of these features are adjustable in the OPTIONS section (a button on the main menu)

It keeps timing out, no matter what I do

The Internet is probably just REAL busy, and everything will run slow.   Try at a later time, or earlier time of the day.

If that still doesn't help, contact AutoWinNet technical support.

It just sits there...   Nothing is happening

Your WINSOCK program (Trumpet, Internet in a Box (tm)) probably timed out and hung up.   If nothing runs, and all your Internet programs simply die and time out, chances are you're no longer connected to the Internet.

Check your WINSOCK settings in TCPMAN.EXE (trumpet winsock) and increase your inactivity timeout.

The file manager does nothing
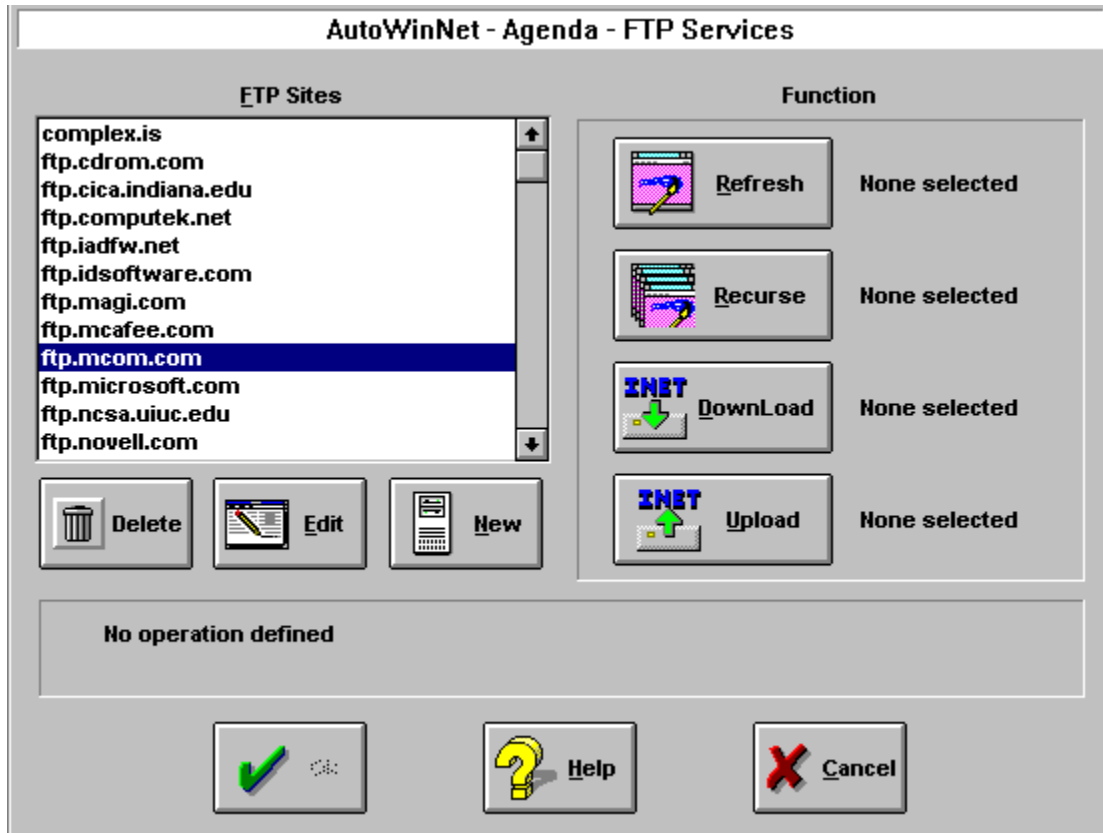

It's disabled in the Lite version.

FTP is the ONLY thing that works in the Lite version.   Upon purchasing the Professional Version, you get mailing lists,   sending mail, spell checking outgoing messages, posting to USENET, obtaining WWW pages, and the full-featured file manager (which includes internal PKZIP support and charts/graphs/reports of your Internet file database).

Please Note:

To create a custom login at a FTP site, choose FTP from the agenda editor, select a site in the listbox, and click the **EDIT** button.

Custom logins are used for security at some FTP sites.   If you are a system admin, or have an actual "REAL ACCOUNT" at an FTP site, you will be required to enter your name and password (instead of anonymous and your address)

FTP stands for File Transfer Protocol.   You are most likely accustomed to calling various Bulletin Boards around town, and downloading files over your modem.

An FTP site is much like a bulletin board, where you can view file listings and decide which ones you would like to try out.   Unfortunately, most of these sites do not have file descriptions.   So when you download a file, you must look through it to determine what exactly it does.

All FTP sites have a variety of free or shareware programs available.   The shareware principle is simple:

Try the program for a few weeks.   If you like it, send the author a little money, and he will give you a "enhanced" version, or one without nagging reminders.

There are hundreds of thousands of shareware and freeware programs available.   You are sure to find something you like, but searching for it is half the battle.   And always remember: Virus scan everything you download!

It's best to be safe rather than sorry.

Most FTP sites are organized into directories.   And the pathnames have a forward slash rather than a backward slash (which takes some adjusting to!)

The public programs are commonly in the **/PUB** directory and its subdirectories.

For example: Many Unix programs will be in /PUB/UNIX and Ms-Dos programs in /PUB/MSDOS and of course, Windows programs in /PUB/WINDOWS   or   /PUB/WIN3

These are organized into further subdirectories, depending on what type of program it is.
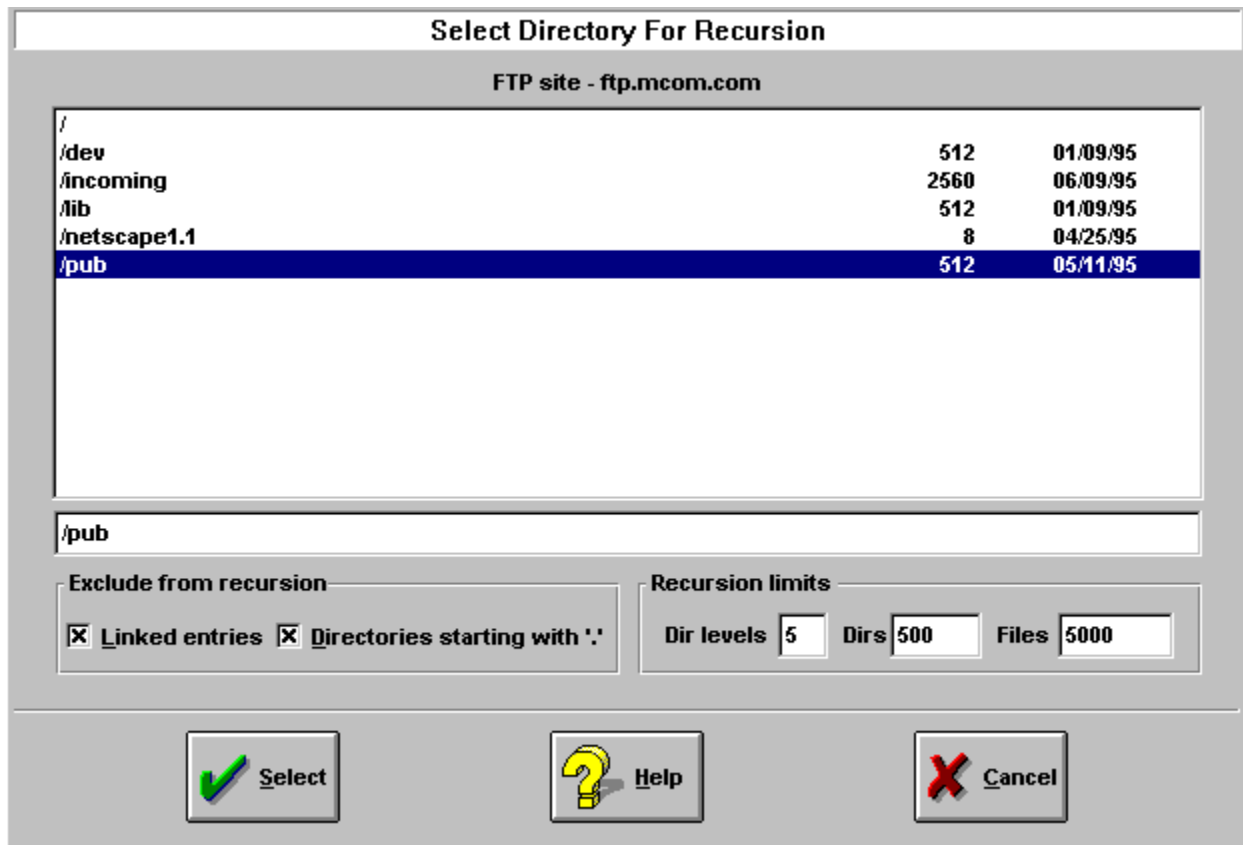

For example: File utilities (directory listers, etc...) might be in   /PUB/MSDOS/FILEUTIL and WordPerfect enhancements in   /PUB/MSDOS/WP6

For the most part, trial and error is the best method of finding files you like.

REFRESH

Refresh directories from a FTP site.   In order for AutoWinNet to give you files to browse, and possibly download, you must first connect with a site, and get his directory structure.   That way, you can pick and choose directories that you are interested in (for example: /WINDOWS, /MSDOS) and tell AutoWinNet to get a file listing from those.

QUICK TIP: REFRESH means to get the directory structure from the FTP site.   DOWNLOAD will let you download a file off the FTP site.   Your usual order of things is: REFRESH to get a file listing/directory listing.   Then click DOWNLOAD to pick some files from those directories that you want.

Select Directory For Recursion

FTP site - ftp.mcom.com

/		
/dev	512	01/09/95
/incoming	2560	06/09/95
/lib	512	01/09/95
/netscape1.1	8	04/25/95
/pub	**512**	**05/11/95**

/pub

Exclude from recursion
☒ Linked entries ☒ Directories starting with '.'

Recursion limits
Dir levels 5   Dirs 500   Files 5000

✔ Select   ❓ Help   ✖ Cancel

RECURSE

This recurses through a large directory structure, and gets a BIG LISTING of directories/files within it.

`Please Note:`
BE VERY CAREFUL - most FTP sites contain several GIG of files, and recursing a large site will result in you being one miserable camper.   Your database will quickly fill up, and your program will run slower because of the lag.

        Linked entries - exclude any directories that are links rather than real directories
        Directories starting with . - Directories that are messages/wasteful dirs.
        Recursion limits:
                Directory levels - how many directories deep should AutoWinNet go?
                Directories - how many total directories to process
                Files - how many total files to process

DOWNLOAD

Select a file to download from the already REFRESHED directories.   If you know the name/directory of your file without actually refreshing it, merely type it in at the bottom textbox.

UPLOAD

Select a file on your hard disk to upload to the FTP site.

`Please Note:`   Most FTP sites do not accept uploads.

### *FTP SITE EDITING:*

DELETE

Delete the FTP site from your list

EDIT

Edit your name and login password for the FTP site.

NEW

Create a new FTP site

Mail

EDIT

This opens **NOTEPAD** and allows you to edit your message.
Once in notepad, you can copy text from other applications and include them in your message.   When you're finished editing, save the message in notepad, and you will return to the above dialog.

Now click **SEND** and your message will be added to the current agenda, and later sent out to the people you specified in the **TO:** listbox.

Please Note: If the **TO** listbox is empty, you cannot send your message

POST

This adds your message to the AGENDA.   It will be sent when your agenda is run.   If in doubt, use the **TUTORIAL** on editing and sending messages.

CANCEL

This cancels all current editing and closes the dialog.

| Please Note: | Any changes you made will be lost

TO:

If you want to add an address to the **TO**:   listbox that is not in the **MEMBERS** listbox and is not included in your mailing lists, then type the address in here.

Once an address is in the **TO**:   section, click the **ADD**:   button directly to the left of it to add this new name into the listbox.

When your message is sent out, that person will receive it.

| Please Note: |
It's not necessary to type anything in here!

If the address is listed under **MEMBERS** at the bottom, simply double-click on that address to add it to the **TO**:   listbox.   If you want to add an entire mailing list, simply double-click on a mailing list name, and those people therein are immediately added to the **TO**:   listbox.

EDIT   (Mailing lists)

This will open the **EDIT MAILING LIST** dialog (see below)

ADD Mailing list

This expands the currently selected mailing list, and adds each member to the **TO**: listbox.

ADD and DELETE from the TO: list

The **TO**: listbox holds all the addresses you want to send this message to.   Each recipient will get the same message.

When you click **ADD**, whatever you have typed in the **TO**:   line up top is added to your recipients.   And **DELETE** will remove the highlighted recipient.

| Please Note: |
If no one is highlighted, then nothing will be deleted from the **TO**:   listbox.

SUBJECT:

The subject of your message.

ATTACHMENTS:

Like most great mail programs, AutoWinNet allows you to attach files in messages.   These files are then encoded with UUENCODE and sent to their recipients.   Mailers such as Pegasus mail, registered Eudora and Internet in a Box support uuencoded attachments.

If your mailer does not support these, then you can download a good uudecoder from just about anywhere on the Internet.

The **BROWSE** button obviously lets you look around for the file you want to attach.

Mailing Lists

Mailing lists contain more than one address that you want your message to go to.   For example, if I had two supervisors that wanted E-MAIL each month containing what work I have done, I would mail two separate letters each month:

One to major@info.com

and   another to asstmajor@info.com

So instead of writing two messages every month, I could automate a message and include both of those people in my mailing list.

To create a new mailing list, click the **EDIT MAILING LISTS** button.

And to add the members of a mailing list to your **TO**:   listbox, simply double-click on the mailing list name.   All of the addresses will be searched, and added up top.

Editing Mailing Lists

AVAILABLE IN AutoWinNet Professional

This allows either creating a new mailing list, or editing an already existing one.

The directions are very simple.   Highlight all the addresses under **MEMBERS** that you want included in a new mailing list, then type in the name of that list up top.

Now, if you go back to the main mail dialog, you'll notice your new list has been added to the **MAILING LISTS** section.

MEMBERS
These are the "REAL NAMES" of all your friends, relatives, and business associates.   When you add them to the **TO**: listbox, or a mailing list, you can access them easily, and write letters to them often.

Editing a list is very easy, and once done, you can **EDIT MAILING LISTS** and create new mailing lists from the existing addresses you have.

NEW

Create a new mailing list.
You will be prompted for a name, then allowed to select the members of that list.

ADD

Add a new or existing member to your mailing list.

DELETE

Nuke one of the members of this mailing list.

Please Note: He must be highlighted before pressing **DELETE**

Understanding Mailing Lists

Frequently, you will have several people that you write on a weekly or daily basis.

You may announce a new product, remind them of an upcoming event, or be in charge of a "mailing list" for your club, business or organization.

In either case, writing them the SAME message over and over becomes a hassle.   And quite time consuming.   AutoWinNet allows broadcasting messages quickly and easily - with a very attractive interface:

INTERNET IN A BOX (tm) offers a one-line, comma-separated list, but you can only fit ten people in it.

**EUDORA** offers a comma-separated list, but it looks like this:

> WESTSAT!SAT1!
> OSGBAM@westtx.attmail.com,mjordan@thetics.europa.com,rob.perelman@cnb.com,
> Leogates@cris.com,macdade@computek.net,fred@quess.com,john.silber@stalag13.com,smhen
> ry@vt.edu,bklim@vms4.sci.csupomona.edu,kad@awod.com,bkmurph@mcs.net,richard.hatch@s
> dsu.edu,terry@edge.net,
> aawadde@pb1.PacBell.COM,griffin@worf.infonet.net,sparment@mail.public.lib.ga.us,jskewes@
> metronet.com

Pretty ugly, huh?

Where are their real names?   And who the hell is silber@stalag13.com???

AutoWinNet offers a much much more appealing substitute:

MEMBER NAME	MAILING ADDRESS
Fred Smith	fred@quessa.com
John Jones	dipwad@unicomp.net

Select Member

Member name	Mailing Address
Bob Carlson	bcarlson@fh.com
David iadfw Smith	dsmith@iadfw.net
David Smith	physics@computek.net
Deborah Husband	dhusband@net.com
Dummy One	dummy@one.com
Jim Husband	jhusband@aedfw.com
Jim L. Husband	jhusband@aedfw.com
Joe Q. Smith	jsmith@aedfw.com
Joe Smith	jsmith@aedfw.com

Select   Add   Edit   Delete   Cancel

SELECT

Highlight the member you want to select, then press this button.

NEW

Add a NEW member to the above list.   Another dialog will appear (see below)

EDIT

Edit the currently highlighted member

DELETE

Delete the currently highlighted member

Add new member

Member's name

Mailing address

✔ Ok   ✘ Cancel

A quick Mail tutorial

Let's assume our member list is:

physics@computek.net
tmartin@iadfw.net
PRESIDENT@WHITEHOUSE.GOV
ceo@iadfw.net
wmartin@iadfw.net

BEGIN BY MAILING wmartin@iadfw.net

Let's start by mailing Mr. Martin a letter.

Since he's already in the **MEMBERS** section, you'll notice his address appears in the **MEMBERS** section at the bottom of our dialog.

Now double-click on his name down in MEMBERS to add him to the TO: listbox.

You see his name appear up there?

Now type "HOWDY WILLIAM!"   in the **SUBJECT**: section.
So we're all set.   We have a recipient for our message, a subject, and now we just need to type in a message.

Click on **EDIT,** and **NOTEPAD** appears.

Cursor down a couple of lines below the **SUBJECT**: portion of your message, then type   "Hi there John. Just testing out the New AutoWinNet"

And choose **FILE**, then **SAVE** from the menu.

Now close down **NOTEPAD** by choosing **FILE** then **EXIT**.

Ok.   We have our message, and we're ready to send it.   So click **POST** and this message will be added to your current agenda.

ADDING A MAILING LIST

Included with your AutoWinNet package are several sample mailing list

If you pull this up into **NOTEPAD**, you'll notice that it also consists of several E-MAIL addresses, each on a line.   You can edit this file with NOTEPAD or choose EDIT MAILING LISTS from the mail dialog.

Find the list: **SAMPLE** in the mailing list box near the bottom of our mail dialog.   Now double-click on it, and you'll notice it dissappears, and a whole bunch of addresses appear up top in the TO: listbox.

Since you have a few addresses up there, let's go ahead and write them all a letter.

Type "test message" in the **SUBJECT** portion, then click on **EDIT MSG** like you did before.   **NOTEPAD** will come up, with a **SUBJECT**: portion already filled out for you.   Now simply cursor down a couple of lines below the subject, and type in a sample message.

When done, choose **FILE** then **SAVE** from **NOTEPAD's** menu and exit out.

When back to our mail dialog, click **POST** and this message will be added to your current agenda.

Don't abuse mail

Please don't abuse E-MAIL by sending tons of useless messages.   And definately do not send multiple messages to the same person.

Be fowarned, anyone who decides to include my E-MAIL address 100 times in their mailing list will receive ten-fold that amount in **theirs**   :-)

Faxing

To fax, you must send a message via E-MAIL
You can send files to any FAX machine by using the following format in your **TO:** section of the message:

  remote.printer.FIRSTLINE/SECONDLINE@[phone number, backward].tpc.int

The first and second line are the header that will appear on the fax, and the phone number backward looks like: 2.9.2.6.1.4.6.4.1.2.1   (that's a BBS number 1-214-641-6292)
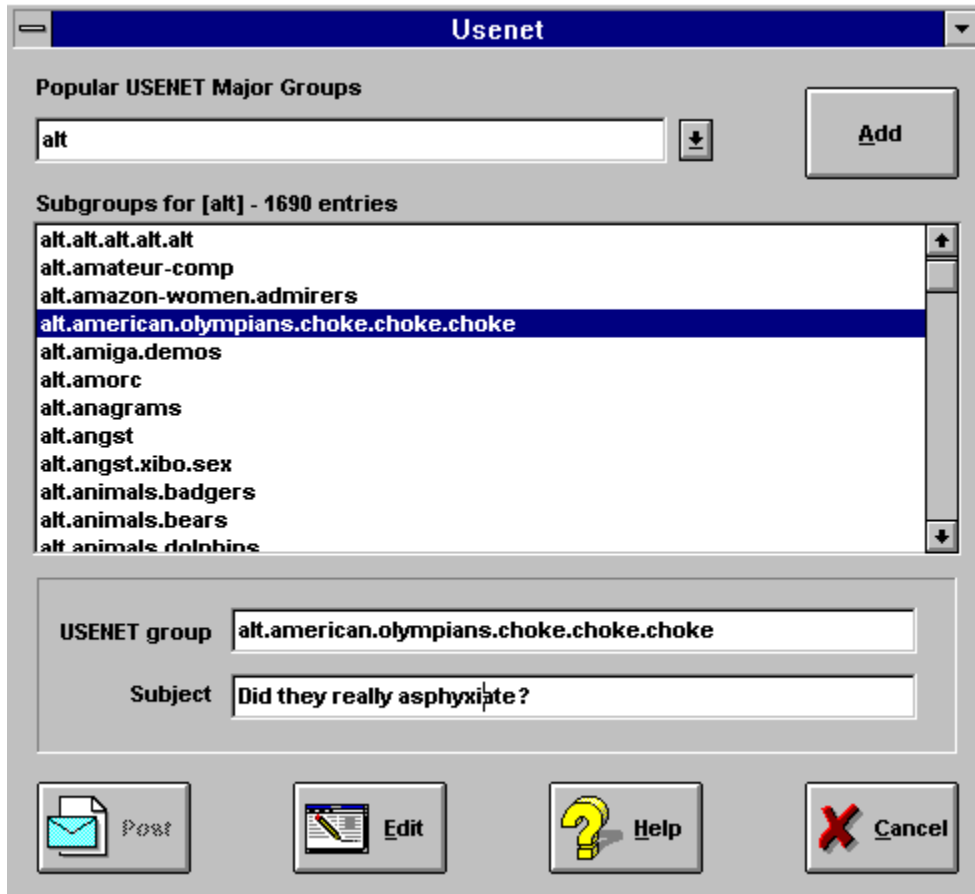

So to fax that bbs:

       remote.printer.DAVESMITH/HI_THERE_DAVE@2.9.2.6.1.4.6.4.1.2.1.tpc.int

That huge address would go in the TO: section of your message and you can put anything you want in the SUBJECT section.

USENET News

Usenet

Popular USENET Major Groups

alt

Add

Subgroups for [alt] - 1690 entries

alt.alt.alt.alt.alt
alt.amateur-comp
alt.amazon-women.admirers
alt.american.olympians.choke.choke.choke
alt.amiga.demos
alt.amorc
alt.anagrams
alt.angst
alt.angst.xibo.sex
alt.animals.badgers
alt.animals.bears
alt.animals.dolphins

USENET group | alt.american.olympians.choke.choke.choke

Subject | Did they really asphyxiate?

Post   Edit   Help   Cancel

As you can see from the dialog, 10,000 USENET newsgroups are included with AutoWinNet.

Popular USENET groups

From the combo box, you can choose the type of group you want.

For example:
alt   -   alternative issues
comp   -   computer-related
rec   -   recreation and sports
dfw   -   Dallas/Fort Worth issues

Subgroups

After you choose a major group, the subgroups appear in this listbox.   Highlight one to select it.

USENET group

As you highlight one of the subgroups, it will appear in this text box.

SUBJECT

What's the subject of your new USENET post?

POST

POST IT!
The currently edited message will be sent out when your agenda is run.

EDIT

Start NOTEPAD and edit your new usenet message.

TYPICAL USENET MESSAGES:

Group: alt.comp.virus
Subject: I got a virus
I recently came down with the GOLDBUG virus, and was wondering how to get rid of it?

Group: alt.games.descent
Subject: Cheat codes?
Does anyone know the cheat codes for the great game DESCENT?

Posting USENET via E-Mail

In addition to the AutoWinNet method of posting to USENET, you can also do so by sending mail in the following format:

groupname@cs.utexas.edu   use dashes instead of dots in groupname: alt-binaries-pictures

        or

groupname@pwd.bull.com

So if I wanted to post a great message to the group: alt.bbs.ads, I would type:

alt.bbs.ads@pwd.bull.com

in the TO: text box, and fill out the subject, etc... and type a message into the main text.   This in turn would be mailed out immediately, and posted to alt.bbs.ads.

Please Note:

I strongly recommend posting all test messages to ALT.TEST, so in case you screw up the message, 14,000 people don't respond and mail-bomb your site.

World Wide Web

AVAILABLE IN AutoWinNet Professional

The "web" and "web-surfing" has become one of the most well-known activities of all time.   And AutoWinNet allows you to retrieve WEB pages as text, and save them into files.

| Please Note: | No graphics are saved... only text.
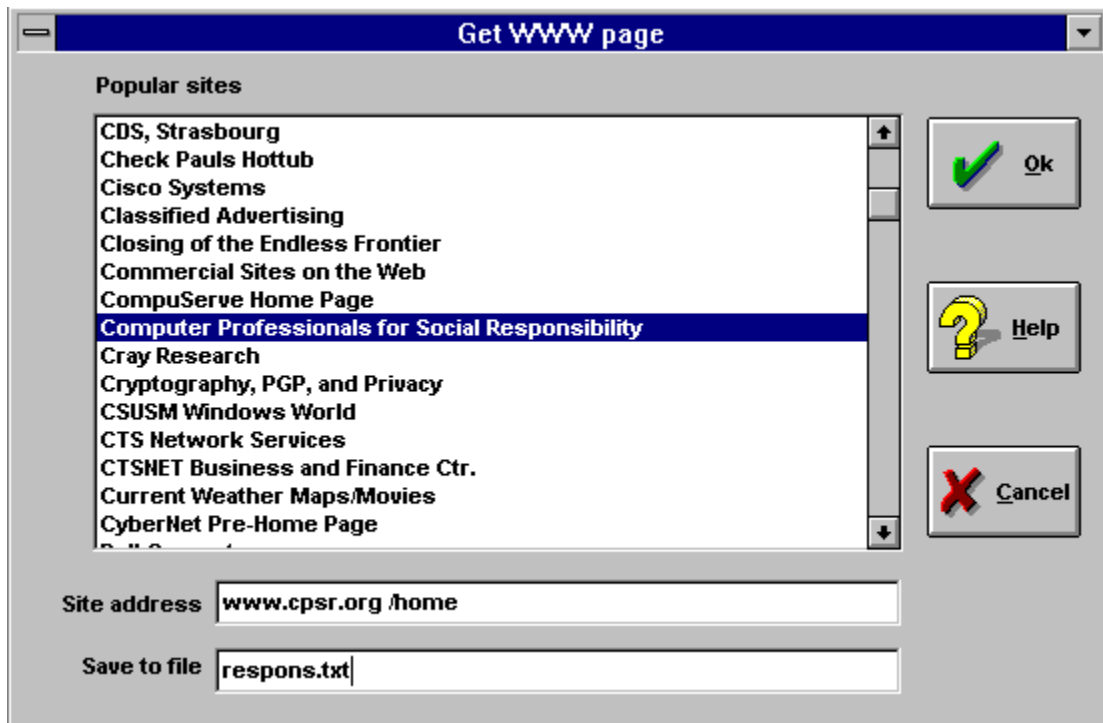

To select a World Wide Web site, simply highlight one of the 250 included sites, then fill in what filename to save to.
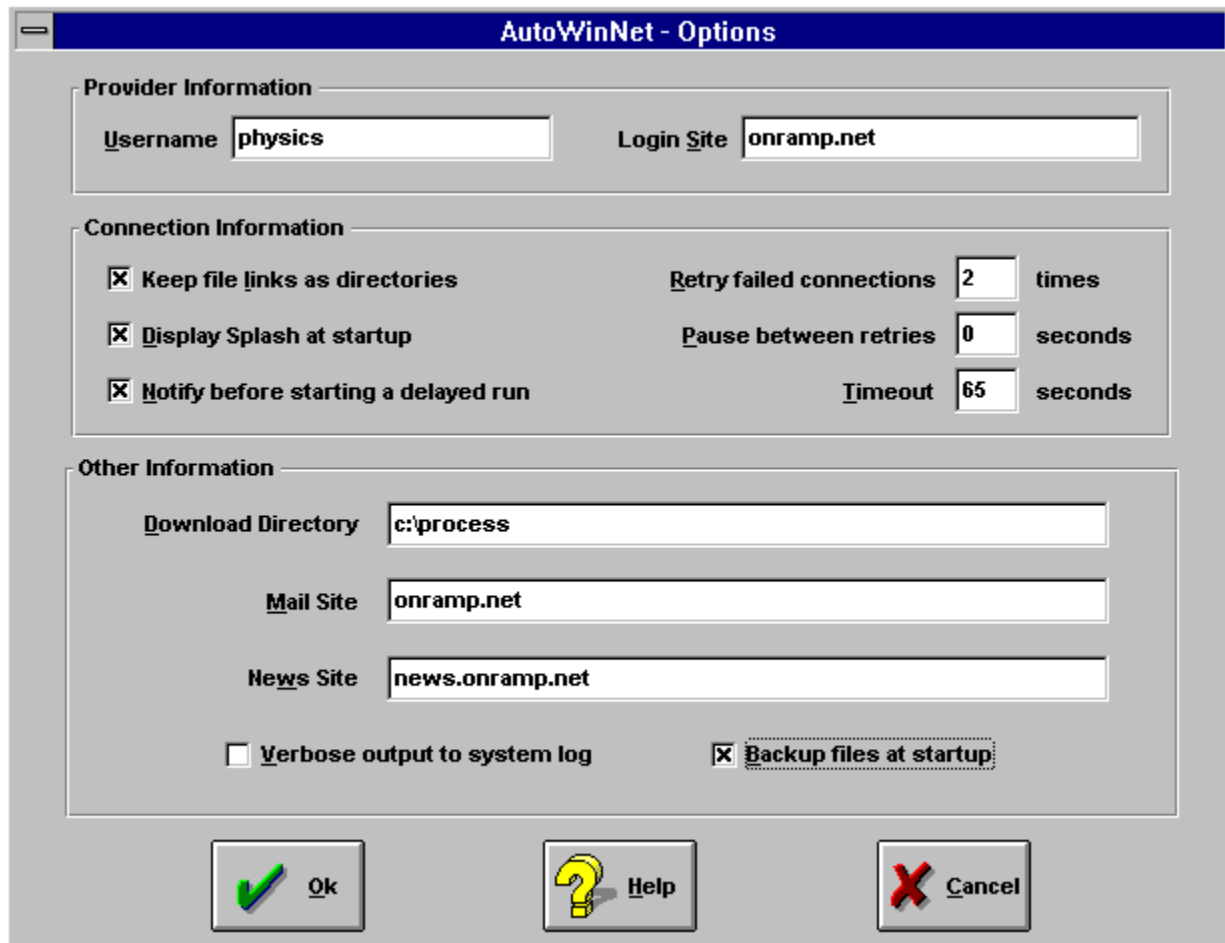

When done, press **OK**

If you have another cool web site that's not listed, simply type it into the **SITE ADDRESS** box, choose a filename in the **SAVE TO FILE** box, and press **OK**.

QUICK TIP: When specifying a filename, do NOT put in an extension.   AutoWinNet will automatically make the extension .HTM   If you specify a weird extension, such as .WWW or whatever, then you will not be able to browse the web pages you downloaded using AutoWinNets internal web browser.

| Please Note: | All web files are saved into the WWW directory, unless otherwise specified.

Options

User Name   Login Site (host)

```
   |                                             |
  ---->      physics@computek.net    <-------
```

Username

Your login name (mine is physics)

Login Site

The name of your provider, sometimes called host.   If in doubt, contact your provider.

Keep file links as directories

Some FTP sites use nicknames for directories to make them easier to read (for example /PUB instead of .7/INCOMING).   These new names are not actually directories, but are links to directories.   So when you change into them, you actually change into another directory.

Display Splash at startup

Show the beautiful and wonderful splash screen we created?   ;-)

Notify before starting a delayed run

When you have an agenda scheduled for a later time, AutoWinNet will warn you that he is about to begin a delayed, scheduled run.   This is important if you are on the modem, and need to get off quickly before an agenda begins.

Retry failed connections

If a FTP site is busy, AutoWinNet will retry logging on until it gets through.   This is great for places like wuarchive.wustl.edu, which are always difficult to log on.

Pause between retries

The number of times AutoWinNet should retry a FTP site before giving up, and moving on to the next agenda item.

Timeout

How many seconds should pass without activity before AutoWinNet moves on to the next agenda item.

Please Note: This must be between 5 and 55 seconds, otherwise, youll get an error message.

Download directory

When downloading a file from a FTP site, where should AutoWinNet put it?

Please Note:
If the file already exists, it will be renamed with a ??0 extension, then ??1, etc.   So if AUTONT32.ZIP already existed, it would be downloaded as AUTONT32.ZI0

Mail site

Where to post mail messages at...   If in doubt, contact your provider.

News Site

Where to post news messages at.

Please Note:
Please post messages at your own provider's site.   Otherwise, you probably won't be able to post at all. Again, if in doubt, contact your provider.

Verbose output to system log

DON'T TURN THIS ON unless I tell you!   This produces mostly debugging information that I may need if you have problems, and it spits out a LOT OF INFORMATION!
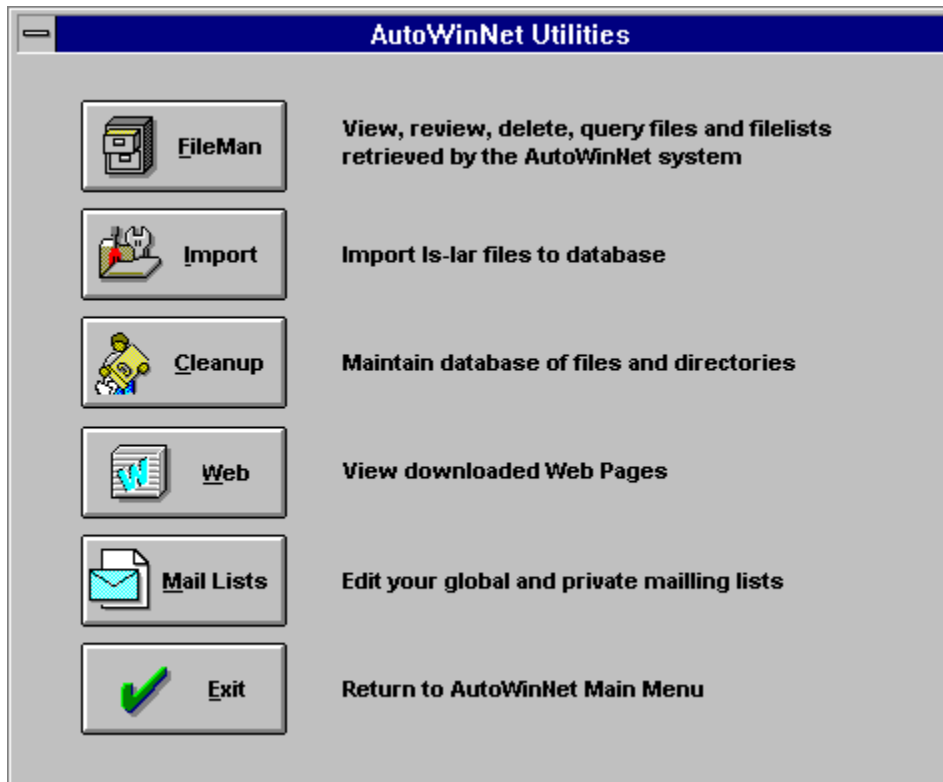

You'll quickly tire of all the junk scrolling by.

Backup files at startup

Back up important files before starting?

Utilities

AutoWinNet comes with a variety of useful utilities.

File Manager

AutoWinNet File Manager

Select max of `100` files containing `_____` and less than `___` days old [Agenda] [Query]

Sites `All Sites` ▼ `All Entries` ▼ Sort `FTP Site` ▼ ☐ Descending

18	oak.oakland.edu	/SimTel/msdos/archiver	delbr11a.bug	1,121	95/04/17

The file manager is a convenient way to organize, view, and maintain your database of Internet files. He allows sorting file lists by date/time, size, name, directory, and FTP site, plus querying for new files since a specific date, and much more.

QUERY   New files for the past ____ days, and don't include zero byte files, etc...
SORT   You can sort on date/time, size, name, directory or FTP site

Import Unix Directory Listings
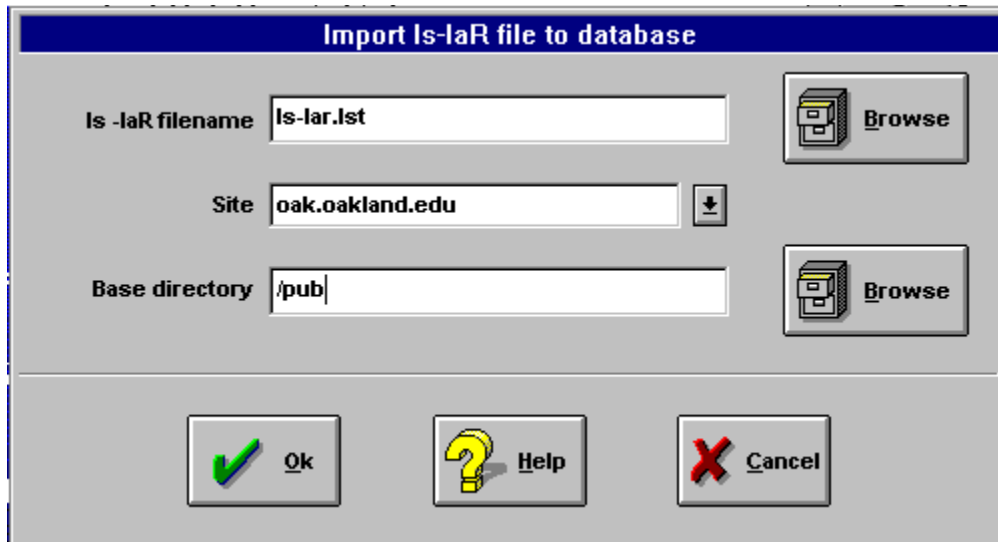

Frequently, you may want to import a LARGE file listing into AutoWinNet containing many directories and files.
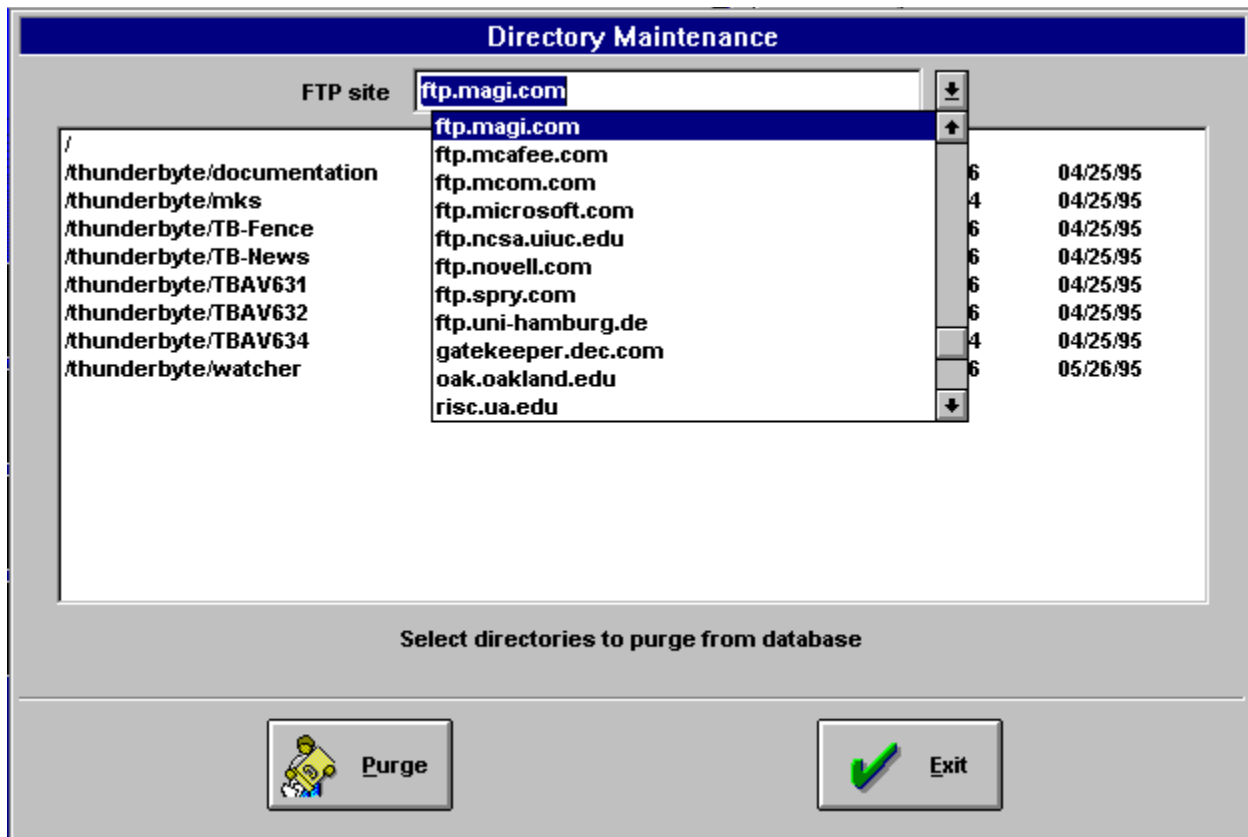

A sample listing would look like:

```
./docs/misc:
total 834
drwxrwxr-x     2 jschuur         512 Mar   7 18:57 .
drwxrwxr-x     6 jschuur         512 Feb 15 15:26 ..
-rw-rw-r--     1 jschuur        7995 Feb 28 13:50 dm2tourn.txt
-rw-rw-r--     1 jschuur         285 Jul 15   1994 dmhowto.txt
-rw-rw-r--     1 jschuur        3837 Jul 15   1994 dmhowto.zip
-rw-rw-r--     1 jschuur        2482 May 26   1994 dminfo2.txt
-rw-rw-r--     1 jschuur        9490 Jul 18   1994 doom11.story
-rw-rw-r--     1 jschuur       12895 Jul 18   1994 doom12.story
-rw-rw-r--     1 jschuur        9924 Jul 18   1994 doom13.story
-rw-rw-r--     1 jschuur         322 Feb   6 13:19 doom2how.txt
-rw-rw-r--     1 jschuur        4138 Feb   6 13:19 doom2how.zip
-rw-rw-r--     1 jschuur       11459 Dec   4 09:55 doomhelp.txt
-rw-rw-r--     1 jschuur      283401 Dec   4 09:56 doomhelp.zip
-rw-rw-r--     1 jschuur        4118 Jul 18   1994 doompro.story
-rw-rw-r--     1 jschuur          80 May 12   1994 doomread.txt
```

On a UNIX machine, you would type: LS -LAR and would then receive a LONG listing of the directory you are currently in, plus all its subdirectories.   While most people won't utilize this, it's good for system administrators, FTP site maintainers or Internet providers, and allows a powerful, fast method of importing large file lists.

Your **BASE DIRECTORY** is the directory you were in when doing the LS -LAR

Select directories to purge from database

Purge   Exit

File database getting too large and bulky?   Haven't gone to wuarchive.wustl.edu in a LONG time?   Then its probably a great idea to clean up your file database.   Select this item from the utilities menu, then choose the directories you want nuked, then click **SELECT.**   This allows a quick and effecient method of doing file database housecleaning.
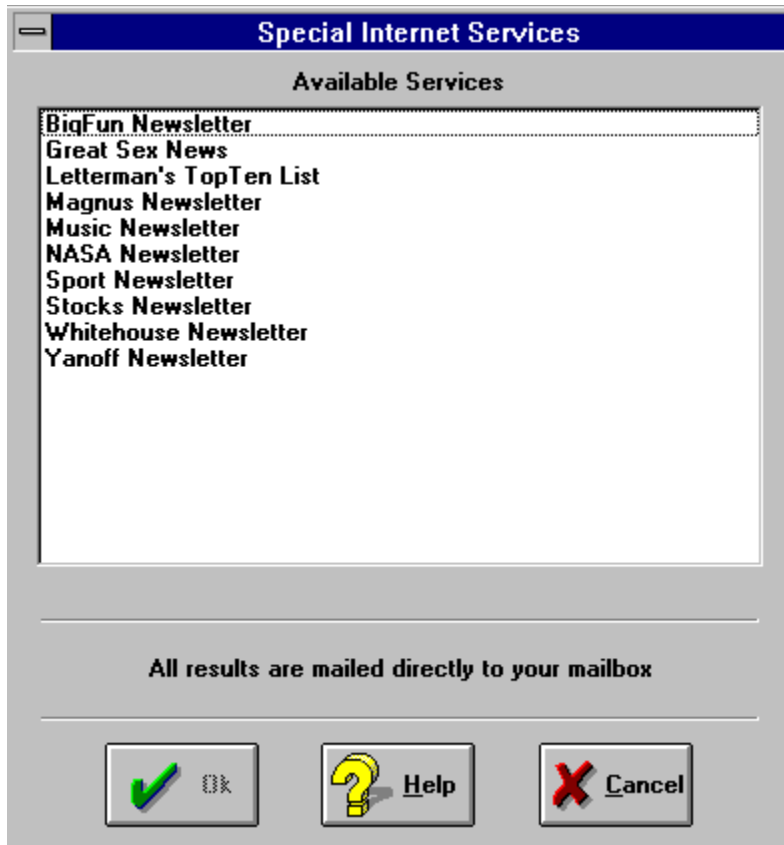

View World Wide Web Pages

All the downloaded web pages are stored in your \WWW directory (off the main autowinnet directory).   To view one, double click on it, and your default web browser will be spawned, and you can interactively view those pages offline.

Bert's BIG FUN on the Internet

Very similar to Yanoff's List, except more oriented toward entertainment.
Here's an excerpt:

```
                Big Fun in the Internet with Uncle Bert
            =======================================
           Yer luvin' Uncle Bert stumbles through the gateway, scurries across
           the 'Internet land, eyes agog, then has Big Fun in the nether regions.
           [These are all ftp, telnet and email sites all over the world that have
           all kinds of neat resources available.   At the end of this file are the
                        info, about, and usage notes.]

                            General Fun

Letterman's Top 10 List

The latest TOP 10 LIST on file (usually updated daily):
 > From the home office in Sioux City, Iowa ...

TOP TEN SIGNS YOU HAVE GAMBLING FEVER

10. At this year's Super bowl you lost $10,000 on the Buffalo Bills

 9. Whenever you meet someone, you put a coin in his mouth and start
      yanking on his arm

 8. You're wearin' green felt underpants
 7. When you order at Wendy's you say, "I'd like to double down on
      some of them biggie fries"

 6. You just can't tear yourself away from the slots [videotape of
      Mujibur and Sirajul playing slot machines]

 5. You've got fifty bucks that says Judge Ito will wear a pink
      robe tomorrow

 4. When they pass around the collection plate at church, you ask,
      "What kind of odds am I getting?"

 3. After sex, you tell your wife, "Okay, double or nothing"

 2. You're putting it all on Letterman for best supporting actor

 1. You owe Pete Rose money

Lookup area code information

This references a geographical area based upon your entered area code,
or it can do a reverse lookup when you specify a city name, or Country.

Get updated sports information

A ton of interesting information, mainly on sports and daily topics.

For example:
 Here is a list of upcoming games   (note: all times are EST)

NBA schedule for today...
        New Jersey   at Cleveland   (7:30 pm)
        Sacramento   at Washington   (7:30 pm)
        Golden State at Houston   (8:30 pm)
        LA Lakers   at LA Clippers   (10:30 pm)

On the WEB 'the' source for sports info is . . .
        http://www.netgen.com/sis/sports.html

Get magnus newsletter

The intent of this newsletter is to provide information about the Magnus Computing BBS and Magnus Computing products.   But the TRIVIA and miscellaneous fun reading make it very worthwhile!

TRIVIA TIME
By Cyndi Williams
cyndiw@magnus1.com

This column is for all of you trivia buffs out there, who just can't resist challenging your memories. We will challenge you with   a variety of trivia questions weekly. Send your answers to Cyndi by 12noon on Friday. ENJOY!

Movies / TV
1. What was the name of "The world's biggest record company" headed by B.D. Brockhurst in the 1978 movie "Sgt Peppers Lonely Hearts Club Band" ?
2. What was the name of Gomer Pyle's favorite hangout outside Camp Henderson in the series "Gomer Pyle U.S.M.C. ?
3. What was the name of the small newspaper founded by John Boy Walton in the series "The Waltons" ?
4. In the 1965 movie " How to Murder Your Wife", Stanley Ford drew what comic strip, which was syndicated in 463 newspapers,?
5. What was the name of Laverne and Shirley's stuffed toy cat, often found sitting on their sofa ?

Music
1.   What street is mentioned in the following songs : Kansas City (Wilbert Harrison), "Love Potion No 9" (Clovers) and "Dead Man's Curve" (Dan & Jean) ?
2. What is the oldest member of "The Fab Four" born Richard Starkey on July 7th , 1940 better known as ?
3. What two "rock" musicans where schoolmates at Bromley Technical school in Kent England , where they had rival bands , one with George and the Dragons and the other with Little Ravens ?
4. What was the first rock group to play at NY' Carnegie Hall (1971) ?
5. What four words does Carly Simon whisper at the beginning of her 1972 hit "Your So Vain" ?

Brain Teaser

I have in my hand a solid object called a 'squiffle' which reminds me of the Hydra-the nine headed monster that Hercules came up against. This squiffle has four things on it-let us call them 'driggles'. If I cut off these four driggles with my knife, I discover that my squiffle now has twelve driggles. In fact, it is no longer a squiffle, but the four driggles which I have cut off have transformed themselves into squiffles! And since each of these has four driggles, I now have a total of 28 driggles.

Obtain GREAT SEX newsletter

Trisha and girls are back, and boy, are they having fun...

Do **NOT** complain about this feature!

You'd be amazed at how many people compliment this addition
to Automated Internet for DOS.

Here's an example:

OOooooOHh! I LIKE IT WHEN YOU FINGER ME BABE YOU KNOW JUST THE RIGHT SPOTS!
I MUST GET ONE THING STRAIT WE ARE NOT ADVERTISING OR LOOKING FOR
BUSINESS ON THE NET AND WILL NOT GIVE ANY ONE OUR ADDRESS OR PHONE
NUMBER   SO DONT ASK.

WE ARE HERE FOR FUN TO MEET COOL PEOPLE AND EXCHANGE EROTIC E-MAIL AND
PICTURES WE ARE GOING TO TRY NEW THINGS RELATED TO COMPUTERS AND SEX.

                        BRANDYS
                  GIRLS JUST WANNA HAVE FUN.
                     THIS IS ALL FREE.
                       BRANDYS BABES
                THE WORLDS FIRST CYBER-BROTHEL

Brandy.com is up.... sorta. The mail is working you can send mail to any
of us @brandys.com also if you want to send cool pictures send them to
pictures@brandys.com.

We have been collecting pictures for over 4 months now and have a great
collection (over 5000 adult images)we have stored them in an ftp area on the
brandys.com machine called gallery.brandys.com

ftp   gallery.brandys.com
login: anonymous
password: your E-mail address

The Gallery at Brandys is free like every thing else But also like every
thing else is usualy swamped.

For those who dont want to wade thru all the thousands of guys trying to
get at them you can get direct access for a small monthly fee. (used to
pay bills)

For technical questions about what we are doing send your questions to
to our support bill@brandys.com.
I (trisha) am sending out a weekly update on mondays (or thereabouts).
If you would like to get them send me (trisha@ramp.com) a note with the
words "UPDATE ME BABY" in the subject line. (no cc: or reply to:)
carefull cuz the monday updates sometimes include some pretty wild
stories about work or one of the girls fantasies.
(ONLY SEND ONE AND YOU WILL BE ON THE LIST TILL YOU ASK TO BE REMOVED)

NASA space newsletter

Fabulous for your techno-junkies!

Example:

MIT Center for Space Research
_____
This NasaNews service is brought to you by the Microwave Subnode of
NASA's Planetary Data System.   AOL users can receive this bulletin
as: keyword "Gopher" > Aerospace and Astronomy > Nasa News.
We also maintain an email listserver for planetary microwave inform-
ation at "pds-listserver@space.mit.edu", an anonymous ftp server at
"delcano.mit.edu", and a WWW home page at "http://delcano.mit.edu/".
If you have any suggestions for how we might improve our services,
please mail them to "pds-requests@space.mit.edu".

NASA press releases and other information are available automatically
by sending an Internet electronic mail message to "domo@hq.nasa.gov".
In the body of the message (not the subject line) users should type
the words "subscribe press-release" (no quotes). The system will
reply with a confirmation via E-mail of each subscription. A second
automatic message will include additional information on the service.
Questions should be directed to (202) 358-4043.

NASA bulletins are also frequently posted to the "sci.space.news"
Usenet newsgroup, and are also available via anonymous ftp from the
"NASA.News" directory of "spacelink.msfc.nasa.gov", or via World Wide
Web from "http://spacelink.msfc.nasa.gov/". NASA also broadcasts
NASA TV on Spacenet 2, transponder 5, channel 9, 69 degrees West.
The transponder frequency is 3880 MHz, audio subcarrier is 6.8 MHz,
and the polarization is horizontal.

_____
C O N T E N T S
 1 Wed Feb 22 18:18   KSC   Status Report
 2 Wed Feb 22 21:24   KSC   GOES-J Arrives at KSC
 3 Wed Feb 22 21:49   JSC   Students to Use Robotic Rover
 NOTE: THIS NASANEWS SERVICE IS TAKING A VACATION -- BACK MARCH 3
_____

Date: Feb 22 18:18 UTC
Subject: KSC Status Report
KENNEDY SPACE CENTER SPACE SHUTTLE STATUS REPORT
WEDNESDAY, FEBRUARY 22, 1995 (10:12 AM EST)
MISSION: STS-67 -- ASTRO - 2
VEHICLE: Endeavour/OV-105
LOCATION: Pad 39A
LAUNCH DATE and TIME: March 2 at 1:37 a.m.
LAUNCH WINDOW: 2 hours, 30 minutes
KSC LANDING DATE and TIME: March 17 at 3:09 p.m.
MISSION DURATION: 15 days, 13 hours, 32 minutes
CREW SIZE: 7

ORBITAL ALTITUDE and INCLINATION: 218 statute miles/28.45 degrees
NOTE: Yesterday, workers removed from Endeavour a failed mass memory unit
and replaced it with one from Discovery. The replacement unit will be
tested later today. No impact to the schedule is expected.

IN WORK TODAY:
   * Pressurize hypergolic reactant tanks
   * Close outs of aft engine compartment
   * Test replacement mass memory unit no. 1

WORK COMPLETED:
   * Ordnance installation
   * Load hypergolic fuels

Check these out...

My favorite are:
<u>wuarchive.wustl.edu</u>   - One of the absolute best.   Good luck in getting on however, since its so popular.   This site has several "mirrors", which means that all the good files you'll find here are carried elsewhere, too

ftp.funet.fi   - My personal favorite.   Plenty of things to see and directories to wander around inside!
Lots of games:

        cd /pub/msdos/games/arcade
        cd /pub/msdos/games/misc
        cd /pub/msdos/games/solutions
        cd /pub/msdos/games/id
        cd /pub/msdos/games/apogee
        cd /pub/msdos/games/epic
        cd /pub/msdos/games/New

        complex.is   - has the newest AntiVirus scanner, F-PROT
        cd /pub

        ftp.uwp.edu   - has great games and fun stuff.. but   hard to get on

        ftp.eff.org   - Good antivirus programs.   Carries the virus-l digest also.

        ftp.uni-stuttgart.de   - Great games and various msdos programs.

        oak.oakland.edu   - Very large site, plenty of new files to choose from.   You can spend a good hour here just writing down good directories!

        cd /SimTel/msdos
        get SIMLIST.ZIP

        NCTUCCCA.edu.tw   - Mirrors a TON of other popular sites, including wuarchive.wustl.edu and garbo.

        cd /PC/wuarchive/games
        cd /PC/wuarchive/cheats
        cd /PC/wuarchive/utils
        cd /PC/wuarchive/win_multimedia
        cd /PC/wuarchive/windows
        cd /PC/wuarchive/graphics
        cd /PC/wuarchive/comm
        cd /PC/wuarchive/sounds
        cd /PC/wuarchive/shareware
        cd /PC/wuarchive/gif

        ftp.marcam.com   - Lots of great Windows files

        cd /win3
        get last100uploads

ftp.uml.edu   - Good games.   Known as one of the best sites for games, other than
wuarchive.wustl.edu

    cd /msdos/Games
    get games.idx   (GAMES LISTING)

WWW Distribution Sites

The official Automated Internet World Wide Web Sites are up!

You can download the latest copy of AutoWinNet, or Automated Internet for DOS and get the latest scoop on enhancements, new products, and other goodies.

http://www.computek.net/autownet

Internet FTP sites

The following sites usually carry AutoWinNet.

Version numbers are posted with AUTOWN##.ZIP

So for example, version 2.3 would be: AUTOWN23.ZIP
And version 4.1 would be: AUTOWN41.ZIP

oak.oakland.edu	/SimTel/win3/winsock
ftp.iadfw.net	/pub/systems/pc/windows
ftp.imagi.net	/archives/autonet
wuarchive.wustl.edu	/pub/MSDOS_UPLOADS/winsock
wuarchive.wustl.edu	/pub/MSDOS_UPLOADS/autownet
ftp.demon.co.uk	/simtel20/win3/winsock
ftp.technion.ac.il	/pub/unsupported/simtel/win3/winsock
micros.hensa.ac.uk	/mirrors/simtel/win3/winsock
ftp.iij.ad.jp	/pub/win3/winsock
ftp.sunet.se	/pub/pc/mirror/SimTel/win3/winsock
ftp.switch/ch	/mirror/simtel/win3/winsock
ftp.uni-marburg.de	/mirror1/simtel/winsock
ftp.unicamp.br	/pub/simtel20/win3/winsock
ntuix.ntu.ac.sg	/.2/win3/winsock
pereiii.uji.es	/pub/mirror/win3/winsock
plaza.aarnet.edu.au	/micros/pc/oak/winsock
bunsen.hrz.uni-marburg.de	/mirror1/simtel/winsock
info.nic.surfnet.nl	/mirror-archive/software/simtel-win3/winsock
terra.stack.urc.tue.nl	/pub/simtel/winsock
wrzx02.rz.uni-wuerzburg.de	/pub/pc/simtel/winsock
sun0.urz.uni-heidelberg.de	/pub/simtel/winsock

If you want to be added to the official distribution FTP list, contact physics@computek.net   And if you cannot find AutoWinNet from any of the above spots, write me a letter and I'll mail one to ya!

FIDOnet Freq

These people have been gracious enough to allow my program on their systems:

Place your credit card order online with our BBS:

THE BLUES CAFE BBS   (214) 638-1181

David Smith and <u>Jim Husband</u> cannot be reached at the numbers above.
These numbers are for PsL, a credit card order taking service only.   Please be sure to include your credit card number and expiration date on all credit card orders.

Any questions about the status of the shipment of an order, refunds, registration options, product details, technical support, volume discounts, dealer pricing, site licenses, etc., must be directed to David Smith at:

David Smith
1104 Mason Drive
Hurst, TX 76053

E-Mail: physics@computek.net

Foreign orders

All foreign orders must be paid through Credit Cards or by a Postal Money Order.   Please contact your local Post Office concerning a postal money order, or see the Credit Card section above.

[Jim Husband](#)

PEAK times

Times of the day when EVERYBODY and their grandmother log into the Internet

serial number

Located on the beginning screen.

FIDOnet

An E-mail system over the phone line where System Operators can share information

SHELL

A UNIX shell system that requires you type all your UNIX commands by hand.

wife/girlfriend

Hopefully, you don't have both   :-)

wuarchive.wustl.edu

A great FTP site for MSDOS files

ftp.cdrom.com

A very popular site for games and miscellaneous MS-DOS files

Jim Husband

The Judge Dredd of the Internet coding - the AWESOME programming connoisseur - and the final word on C, C++, Delphi, and Mainframe programming.
