

Alarm 1.8 (32-bit version)

Keywords: Parker, Time, Reminder, Dialer, Warning, Buzzer, Sound, Intel, Win NT, Win 95
Type: Shareware

Alarm is an easy-to-use but full-featured alarm system for Windows. It allows the user to set an unlimited number of alarms with reminder notes attached to them. Alarms may be scheduled to recur at pre-defined (or post-defined) intervals. Its install program will place its icon in your startup group.

The program also features a SNOOZE interval function, and the ability to modify an existing alarm. It uses Windows multimedia capabilities to play customizable sounds (WAV, MID, and AVI) for alarms, and can also launch programs.

Some of the features in Alarm that may be of interest include:

- * Recurring alarms: Once, daily, weekdays, weekly, monthly, annually, and custom recurrence
- * Recurring alarms can have a termination date ("Repeat until:")
- * Per alarm customizable "Don't remind after x minutes" (Range: 0-999)
- * Day of week display when setting alarms
- * Customizable alarm note fonts and colors
- * Speaker beep option for systems without a sound card
- * Calendar control for selecting dates
- * Alarm Event-Only option
- * Telephone Speed Dialer
- * An unlimited number of alarms
- * Auto-Save option
- * An unlimited number of collections of alarms (files)
- * Alarms can set off WAV, MID, and AVI files or programs, which can be individually set for each alarm; select via Browse Button or drop down listbox.
- * Alarms always editable
- * Configurable snooze time, determined per alarm, after alarm has fired
- * Snooze for up to 999 minutes, hours or days
- * Large alarm note field: up to 2,147,483,647 characters
- * Note field is always editable
- * Telephone speed dialer
- * Always-on-Top option
- * Status bar and dockable toolbar
- * Context-sensitive help
- * Screen location memory
- * It's not interpreted (like Visual Basic code); it's compiled. On most systems, there will be a perceivable speed difference.

If you are not running a 32-bit version of Windows (i.e., Win NT, Win 95), download the 16-bit version of Alarm.

Documentation: README.WRI plus context-sensitive Online Help

Getting Started

Automatic Installation:

If Windows is not running, start Windows. Insert disk in drive A. Win 3.1: in the Program
