

## *Time After Time*

Time After Time is a program that lets you see what time it is in major cities around the world.

The first time you start Time After Time it will prompt you to set your local position. Time After Time needs to know where you are in order to report the correct time differences. If your city is not listed, choose the one that is geographically closest to you. If you know the latitude and longitude of your location and the time zone that you are in, you can click on the Set button and enter this data for yourself.

The world time clocks are listed on either side of the world map. Click on the Set button to configure each clock or click on the Info button for Astronomical facts about the location. You can also click on the red dots on the map to read interesting facts about the indicated city.
