EyeCon is an implementation of "xeyes" distributed with X-Windows window manager system on UNIX workstations. It features Watch fish swim around your desktop, behind all of your applications and icons. Registered version has over 60 fish, and all

Two desktop decorations. First is a galloping horse in a window, and second is a yin-yang symbol with floppy-disk characteristics.

A collection of 7 fun programs to decorate your desktop with.

Roaches, roaches, roaches everywhere... They scurry across the screen and hide under windows. Use the mouse to "squash

This program animates the Windows desktop with stars creating an effect similar to looking through a spaceship window.

A teensy, tiny, tsetse shoot-em-up game, played in a desktop icon.

Windows version of the card game Arachnid.

Asteroids-type game for windows.

Pong-type game for windows.

A windows-based fantasy role-playing adventure set in a world of ancient Norse mythology.

Battleship-like game for window. You play against the computer.

Puzzle similar in concept to Chinese Checkers.

Tetris-like game.

Lander is a real-time simulation of a Lunar Excursion Module on its final approach to the lunar surface. As the pilot of the lander,

Windows version of popular mah jongg game.

A minefield scenario for windows. Try to cross the window successfully from one corner to the opposite. Good luck!

Displays a quote randomly, and changes the quote automatically every few seconds.

Windows version of Seahaven Towers solitaire.

Windows solitaire version of the ancient oriental game, Mah-Jongg.

Windows version of the original nuclear holocaust game.

Window version of the popular card game "Hearts".

Window version of the classical Colossal Cave text adventure.

Version of the card game poker for Windows.

A windows simulation of billiards, using Discrete Element Methods (DEM). Runs very well on 486-class systems.

Version of the game Risk, for 1 to 3 players (computer plays the other pieces).

A windows version of Tetris.

Three-dimensional tic-tac-toe game for Windows.

Windows version of Yahtzee.

A word game.

Build your own word searches, or use some of those already created. Pretty neat!

Windows 3.0 games based on Centipede.

A Windows slot machine. Very good! Recommend sound card.

Active Life 1.5 is a powerful system for planning, managing, and tracking one's active business and personal life.

Box Plot is a Microsoft Windows based program that calculates the frequency response and maximum Sound pressure level for

CaseLinr is a program which prints case liners (aka J-Cards) for audio cassettes. The printed result is extremely accurate and

CreditWindow is a credit account management program. Though mainly for use with credit cards, it can be applied to other types

A windows simulation of gravity and our solar system. Allows you to modify the orbits of planets and see what will happen.

Graphical illustration of how chords are played on a guitar.

A fairly complete implementation of the KERMIT communications protocol for Microsoft Windows. It includes all Kermit protocols

The first release of a full-featured boating navigation program for Windows. Allows tracking of waypoints, and performs intercom

A slide show utility for windows bitmaps.

Atlas is a computer-based Atlas of the United States. It contains information for 51 states (and D.C.) and information on more than

An astronomy program for Microsoft Windows 3.x. It animates astronomical simulations, produces prediction reports of upcoming

Communications package with many features. Requires a Hayes compatible modem.

A reference manager. It allows you to enter your citations once and create a reference list in a number of different styles. It can

a biorhythm program. Plots the physical, emotional, intellectual, and intuitional cycles for you.

calendar program that shows holidays, keeps appointment information, creates full year calendars, and is made to integrate with

Sheet1

An chemistry program that allows you to make chemistry reports, and create diagrams.
Demo versioin of the program that lets you load and play files. You need a MPU-401 or compatible, Music Quest, or some
A 3D modeling package that is mouse oriented, has solid rendering with shading and smoothing, DXF file input and output, su
calculates the amount of fat, cholesterol, sodium, and calories in your diet. Has a database of common foods and other heath
A windows verson of an HP calculator.
Plots user defined mathematical formulas.
A metric conversion program. Converts several types of quantities to and from metric.
A communication package that supports several modems and many features. Nice graphic interface.
Gives information about the moon.
A message reader and editor for FidoNet.
A small collection of mathematics functions that convert units and calulate right triangle properties.
A text editor for windows. Has several nice features.
A phone book and phone dialer for windows. Made to integrate with Desktop calendar. Excellent package.
Tracks overtime worked on projects. Easy to use.
A subset of Pascal with some enhancements. Has built in edior.
A database of information in the periodic table of elements. Has a nice graphic of the table and lots of information.
A project time monitor. Start the clock when you begin and it will keep track of your hours and log them.
A realistic looking interface on a scientific calculator.
Tracks time and money costs. Set a rate and start the timer and it will track project cost, phone calls, ... etc.
create a database of citys and their time zones and you can then view the time in any of your citys.
A data communications package. Has many very usefull features, supports many file transfer protocols, and has a great grap
Displays a map of the USA and by selecting a state, you can view data about it.
An E-Mail and Bulletin board system. You can send messages to another Wind-Mail user or post a bulletin on the bulletin bo
A limited, but working model of WinDraw, a drawing program under windows. Allows you to format a page with complex or si
An educational tool to help learn arithmetic. Easy to understand interface.
Maintains a database of your video collection. You can view your data in a variety of formats and can search the database. I
generates bar codes of many standard formats that can be put in the clipboard.
A simple database program that allows you to design forms, enter data, and keep it orginized. Good interface.
A DEC VTG220/102/52 terminal emulator and communications program. Requires a Hayes or Hayes-compatible modem.
A message reader for Qwk packets make with Qmail, RAMail, MKQwk, MarkMail, Tomcat and other Qwk compatible mail doc
An offline message reader that is easy to use.
A text file viewer/browser. Can view in any size window with fast scrolling. Has find, find next, print and clipboard copy featur
programmers text editor. Easy to use. Several nice features.
Telephone message database for various users. can work on compatible network or standalone. You can send messages to
An aquarium on your desktop!
Ants crawling on your desktop. What a concept!
Shoot up your desktop with a machine gun and hand grenade. Complete with sound.
Screen blanker that has no icon (run again to stop it), small and consumes little processor time, works if DOS app is cruently
Loads bitmaps on the desktop from any directory. Also can randomize a different bitmap everytime windows is loaded.
A digital clock after the text of the active window.
Little crabs eat your background and run away from your cursor.
A digital clock window apperars on your desktop and always stays in front. You can make it display free memory.
A Wallpaper bitmap randomizing program. Can automatically choose a random bitmap upon startup of windows. Can also di
Screen savers with really nice graphics. Has hot spots in corners specified by the users where the screen will force the scree
Screen saver that displays fireworks. Can turn auto blanking off and on with a key sequence. Also supports hot spot corners
It displays and monitorys the percentage of system resourses and memory. Can be used to monitor applications memory usa
Sprays bullet holes across the desktop after user specified intervals.
Screen saver where the user defines corners (hot spots) which when the mouse pointer is placed there, the screen blanks im
Makes your application icons afraid of the mouse. If the frame of an application window is touched the window is iconized.

Sheet1

A screensaver that displays colourfull animation. Provides password protection. Can be configured to not interfere with com

Clock with a countdown timer that displays a user defined message when the time is up.

Changes desktop wallpaper everytime you run windows.

It enumerates all the bitmap files in your windows directory and then randomly picks from the list a bitmap to display as the de

A screen saver that is extensible. Has hot spots for involking saver immediately and for preventing the saver. With Microsoft

A Program launcher for Windows 3.1 and up. Allows you to make buttons for your most used programs and launch them at th

An alarm and clock system for windows 3.1. Has unlimited number of alarms. You attach a message with each alarm. Can a

A screen saver that has a hot spot for blanking the screen immediately. Source is available.

Stars jump out of your destop backdrop. Left mouse click on star field lets you pick between impulse and warp speed. Also a

Gives mode, day, date, time, and amount of free space on a small window that stays in front. It also allows you to launch a fe

A task switching utility. Has a window with a scrollable list of icons of tasks running in windows. You click on an icon and it sv

Provides features that are absent in the Program Manager. Drag and drop starts an application if it is not running. It also kee

Trashcan utility. You can drag a file from file manager onto the toilet, and they will not show up in the directory listing. Flushi

Little roaches crawl around your desktop and hide under windows. Click on them with your mouse and watch their guts splat.

Lets you select a BMP, WMF, DIB, RLE, or ICO file and see them previewd in tiled format as wallpaper. You can then install

A window with eyes follows your mouse cursor.

A little cowboy randomly appears on your screen. He want to fight. Watch out, because as soon as you touch anything, he w

Initializes the desktop from a list of applications and window sizes read from win.ini. The windows will be moved to the user s

You can choose windows that you would like to always stay on top and then sink them again.

Little worms squirm about your desktop.

Chooses a bitmap file for use as a windows wallpaper and lets you place your .BMP files in a .ZIP file to reduce disk space.

A strategy game where the object is to get five of your pieces in a row on a large grid. One player.

A program launcher. Set up the list of the applications you use most and then choose it from the Hot Spot menu. You can ev

Sheet1

An easy to use file launcher. Set up a bar of icons down the right edge of your screen, and launch programs simply by double clicking.

A set of utilities to be run from the Windows Control Panel.

An application bar. It replaces the Windows Program Manager. Features include: Nested menus, drag and drop, and auto completion.

Allows you to customize your color scheme and try wild variations you never dreamed of.

Lets you arrange your application windows and save their size and position to a file. You can have many layout files and can load them.

A screen magnification program. Magnify the part of the screen around your cursor.

A file manipulator. It will view, find, edit, delete, launch, and print files. Nice interface.

Lets you define toolbars to launch programs.

A file manager. Lets you organize files into menus.

A programmer's utility for windows. Lets you display object addresses, handles, module and module executable pathname, object names, etc.

Lets you change screen resolutions easily.

Converts between bitmaps and character pictures. It will map a pixel in a small bitmap to a character, and the other way around.

Lets you add your own menus to any windows application with menus. Also lets you launch your most used applications quickly.

Lets you quickly and simply close windows and restart it.

A little menu with your four most used applications appears. Then you can launch them. It uses very little resources.

A utility that makes disk copying, comparing, and formatting simple.

A screen capture program. Lets you capture the windows screen, an area of the screen, and application window's client area.

Lets you designate a dedicated directory to serve as your trashcan. You can drag files from your file manager to the SCAVENGER.

A shell for Microsoft Windows. Makes it easy to organize your desktop and open applications. Takes it easy on system resources.

Remembers the size and position of application windows and repositions and sizes them each time they start up.

Remembers position and size of windows for applications you select and repositions and sizes them for you the next time they start up.

A replacement for the Program Manager. It uses a graphical interface and has almost all features of the program manager plus more.

A screen capture utility. Lets you capture parts of the screen and send them to the clipboard or printer. Registered users can capture the whole screen.

Lets you set alarms and make notes.

A sort of "electronic shredder". Permanently removes files so they can not be undeleted or found from a scan of the disk.

Drag files from the file manager onto the desktop to delete files and directories simply and without lots of questions.

A virtual desktop.

A trash can where when you drop files into it, it plays a sound file of your choice.

A clipboard utility. Lets you put multiple objects on the clipboard with thumbnails, print thumbnails, save and load .CLP files to disk.

Helps you find and launch your applications.

A palette modifier for VGA or Super VGA card in 16 color mode. Select any colors to be your 16 colors.

Lets you program mouse buttons and key sequences to perform certain tasks.

A package that lets you grab the address right out of letters in your word processor and lets you print it on an envelope. It also lets you print on a postcard.

Lets you change between different resolutions easily.

Lets you extract and decompress files from ZIP archives easily, without switching to DOS.

Lets you keep six virtual desktops. You can switch between desktops by pressing the desktop number on the workspaces window.

A windows interface for Zip.

A slide show program. You can create a script file to tell which files to show, what order, and how long they are to be displayed.

Select an area of the screen and it copies it to the clipboard and then stretches or shrinks it to fit inside the BlowIt window which is a window that can be resized.

A CAD program for windows. Lets you draw lines, arcs, circles, points, and text. Has many features.

A bitmap and text file viewer. Can read 256 color .BMP files, create, edit and save text files, and has cut paste search and replace.

A printed-circuit board design package. You can print to a large number of printer devices and save and load designs on and off disk.

A schematic capture program. Lets you design schematics. Supports a number of printers and lets you save and load to and from disk.

Define a function with the calculator style pad and the program will graph it. You can define the range. Nice interface.

Plots the bifurcation diagram of the logistic equations. You can zoom in on it.

A configurable graphic display that animates polygons. Made for a demo in computer shops.

A walk through the commercial product 3D RenderLib.

A animation creation tool and playback facility. A demo animation shows off the product.

A demo of SPSS, a spreadsheet database program that understands many file formats. SPSS is a product of SPSS Inc.

Sheet1

Lets you view animated waves. Lets you tweak the physics and see what happens.

A image viewer. Can read seven file formats, form catalogs of your images, and can save in other formats.

Lets you load in a bitmap or capture a part of the windows screen and stretch it to fit the size of the Stretch window. You can

Lets you create, display, and print many types of graphs, including: X/Y, Polar, Log, Bar, Pie, Area graphs, and 2-D functions.

A MIDI song player that plays .MID files in random order. It comes with many public domain midi files.

Plays MIDI song files. Nice interface.

Lets you look up an area code in the U.S., Canada, and the U.S. Caribbean islands. Has a database of 600 major cities and

Lets you print lots of labels quickly. Lots of features, which include: WYSIWYG Design, any avery lazer label format, any fon

A to do list form to make sure you do those important tasks. Has a place for date and ten tasks you can check when complet

A small window with one months calandar in it. Can display any month between Jan. 1980 and Dec. 2037.

A disk cataloger that can print labels and print reports. Full font support, can print graphics on lables, and can save data base

A text based .ini file editor. It separates the file into its components for easy editing. It insures changes are registered with wi

A text editor for windows. "NO LIMITS on file sizes. Split screen editing of one or multiple files. Variable, Sizable! text fonts.

A calculator for resistors in parallel. A graphical interface displays the resistors and you simply put in the resistance values.

A caclulator for resistors in series. A graphical interface displays the resistors and you simply put in the resistance values.

An outline editor with many features including: word wrapped text editing, cut, paste, copy, delete, clipboard support, automa

Lets you display a years calandar between 1 and 32767 A.D. You can change fonts and colors. You can also print your cala

Bart simpson peeks at you through your active window.

A memory game. Try to match tile images in a grid. Has different sized grids and has timed play. One or two players.
