CONNER 7000 SERIES

Tape Backup Systems

Up to 500MB, Unmatched Performance and Value From the
Conner 7000 Series.

Maynard continues its tradition of offering the world's
best combination of performance and value in superior
tape backup systems for small networks.

The Conner 7000 Series quarter-inch (QIC) data
cartridge drives provide a backup capacity of up to 500
MB (with data compression) and are the perfect
solutions for smaller networks with moderate server
capacities and 'power' users with large stand-alone
systems. Conner 7000 Series drives are available as
internal and external configurations, for ISA/EISA or
PS/2* compatibles and include EzTape for DOS software.

The Conner 7000 Series data cartridge drives are also
fully compatible with DOS, OS/2, and SCO UNIX, and
leading network operating systems including
Novell*NetWare* 286 & 386, LAN Manager*, IBM Token
Ring*, LAN Server* and LANtastic* 4.0.

Fro fast, convenient and attractively-priced solutions,
choose the Conner 7000 Series to meet your backup
requirements. Call your dealer and ask about Conner
7000 Series.

Setting the Pace for Backup Performance in all
Capacities.

Conner 7000 Series

1/4" Data Cartridge Drives
* 112.5 KB/sec Transfer Rate
* 150 to 500 MB Capacity

EzTape Software Features

                    2
                  S /
                  O S
                  D O

Two levels of data compression   *   *
Menu-driven   *
Batch files for quick backup and restore   *   *
Unattended backup   *   *
Bindery and trustee file backup   *   *
Logging of critical information   *   *
Tape librarian for fast file location   *   *
Data encryption   *
High Performance File System support   *
LAN Manager* and LAN server* support   *

OS/2 workstations in Novell* LANs support   *

Simplified Software Solutions For Every Network
Operating Environment

EzTape for DOS

EzTape for DOS makes backup simple, fast and uniform
across multiple desktop platforms and operating
environments. With two levels of data compression,
EzTape dramatically increases drive capacity and
throughput.

EzTape for DOS fully supports Novell* NetWare* v 2.x
and 3.11, including all bindery and trustee rights
information.

EzTape Presentation Manager - For OS/2
(available as a separate package)
The first true OS/2 Presentation Manager backup package
for standalone and networked PCs. EzTape PM for OS/2
provides complete support for lAN Server*, LAN Manager*
and NetWare. With its data encryption feature, your
valuable data is safe from unauthorised access.
