SOUND PRODUCER SOFTWARE:
SOUND TRACKS: plays all of your favourite
songs from the list of 18 songs included or you can
add your own (Star Wars, Lone Ranger.) DOS
SOUND MASTER: this application which allows
you to record, play, edit, and enhance your own
recordings! Built-in editor allows you to edit
sound (ext, voc, wav, snd) files of nay length. DOS
SOUNDSCRIPT: an exciting, easy to use
multimedia authoring language that combines
sound and animation. Allows integration of
graphic animation files with sound capabilities of
Sound Producer, resulting in impressive graphics
and sound combinations. Ideal for use in business
presentations. DOS
JUKEBOX: Windows application that allows you to
see and hear "sound effects" entered into a play list.
You are also able to create and edit play list.
WinDAT: Windows application lets you play,
record, display, and edit digital audio files.
