

Registering

We didn't make this product just to let you use it without getting a little for our work. You are allowed to use it in a trial period of 21 days, after which you must register.

The registration cost \$20, very cheap considering what you get. This will cover all versions until next major release with version 2.0, for which you of course as registered user can register to a special price.

Mail us a check of \$20, a name and return address, to one of the addresses found in the **ChroMa** section and you will get an registration-code as soon as possible, that is as fast as the mail-man can run. If you state your email address, this will be used for returning the registration-code.

To encourage you to register this program we have made some limitations. Whenever the program is started, a dialog is displayed, that first can be closed after 6 seconds. The number of groups are limited to 5 and the number of program-links are limited to 8. That totals to 40 links at the top. This should be enough for evaluation purposes. The registered version have of course no limits at all. As if this wasn't enough, the program will stop to work after the 21 days trial period.
