

## **Tips for Using KRUEGER Solitary**

### **1997 Edition**

This document contains information that will help you get the most out of KRUEGER Solitary.

To read this document on your screen, use the PAGE DOWN and PAGE UP keys on your keyboard. You can print the file by choosing the Print command from the File menu.

#### **To play Solitary**

The Handheld Personal Computer (HPC) Explorer must be installed on your desktop computer before you can copy the Solitary game. The Solitary trial version consists of two files: Solitary.exe and SolitaryLangcomp.dll. To install the trial version of Solitary copy the SolitaryLangcomp.dll file in the Windows-directory on your HPC and the Solitary.exe file can be copied wherever you like it.

#### **Problems During Setup**

To install Solitary, your HPC must be connected to your desktop computer. You must start the H/PC Explorer and wait until the H/PC is connected. Furthermore please copy the uncompressed Solitary executable file to the desired directory.

#### **Suggestions and Other Comments**

If you have suggestions for features you would like to see in future editions of Solitary or comments about the current version, please send your ideas to:
