

## **MUZIDEX Music Database System Version 1.01 February 29, 1992**

Welcome to the wonderful world of MuZidex! It is one of a series of powerful and awesome software products from POD Associates, Inc. MuZidex is the inspiration of a music lover who wanted to fully manage and use his complete music collection in a windows based environment. MuZidex makes full use of one of the most powerful windows database development system available anywhere.

Since this is a windows based product, installation is very simple. Select a program group that you want to add the software to, then use Program Manager to add a new program item to the group. This is done by providing a program item name (Muzidex) and a path to the executable file. The database information file needs to be in the same directory as the main executable.

When you register with POD Associates, you will receive the latest version of the software with all print features activated, and technical support during normal business hours at the following numbers: (505-243-2287/Fax 505-243-4677). If there are any suggestions or ideas that you would like to see added, then please write, call or Fax us. Registration also entitles you to all future versions of MuZidex at no additional charge!

This software is shareware and can be distributed freely, if all of the associated files are included in the distribution. Please do not distribute just part of the package, or it may not work properly. If you recompress the files into a single archive, please use a name such as MuZidex.zip or MuZidex.arc, or whatever suffix applies, for your convenience.
