

Installation

Installing PhoneBar is easy. Simply copy the included .dll file BWCC.DLL to your WINDOWS\SYSTEM directory. This is an essential runtime library that allows use of the Borland custom dialog controls. The PhoneBar .exe file will be happiest in its own directory, though you can certainly put it anywhere you want.

To Order PhoneBar

Print out this form to order Phone Bar. Include five dollars (\$5.00) to legitimize your use of this program. The price is low enough that there is no reason for anyone who finds this program useful not to register it. I am a firm believer that most ShareWare authors charge outrageous sums for their software. As a consumer of software, as well as a programmer, I feel that ShareWare prices should be lower simply because they require no packaging or retail markup. Now enough about my soapbox; just let it be known that I dedicated to providing low cost, high quality ShareWare!

Customer Name: _____

Street Address: _____

City: _____ State: ____ Zip: _____
