### ARCHIVER

ARCHIVER is an extremely easy to use archive management system/shell which acts as an interface between the user and the archiving program. ARCHIVER takes the mystery out of archiving syntax, and through the use of POP-UP windows and onscreen file selection, makes managing archived files easy to understand, much less time consuming and more efficient. ARCHIVER currently supports PKZIP (Including 1.10), PKPAK, PKARC, LHarc, & ZOO. Among its options, ARCHIVER has simple to use source and destination drive/path selection, on screen archive method selection, and a DOS Shell to allow you easy access to your operating system. It also comes with an assortment of option selections so you may customize your technique. This is the EASIEST TO USE non-Windows, archiving shell currently available. If you do archiving or un-archiving, this is a MUST HAVE program. **SYSTEM REQUIREMENTS:** MS-DOS, 384K RAM

### **ARCHIVER for Windows**

ARCHIVER for Windows is a complete Windows 3.0 environment for the PKZIP, PKUNZIP, LHA, ARJ file compression utilities. It also supports the ZOO and ARC-E decompression programs and the virus detection programs SCAN and VIRx. Whether you do small or large amounts of file compression work, ARCHIVER for Windows will greatly increase your productivity. ARCHIVER for Windows will allow you to create and maintain compressed files in multiple formats with speed, efficiency and accuracy. Once you start using ARCHIVER for Windows, you won't ever want to work without it! **SYSTEM REQUIREMENTS:** MS-DOS, MS Windows (Standard or Enhanced mode).

#### CATALOGER

If you are a shareware distributor or any business person selling a product with a catalog on disk, this is the program you have been waiting for. *CATALOGER* is a menu shell which allows you to advertise your products on disk, in a user friendly environment, with SUPER GRAPHICS and POP-UP WINDOWS. *CATALOGER* is compatible with virtually every IBM or MS DOS machine around. It allows you to display advertising screens, display or print your catalog and an Order Form. *CATALOGER* currently allows for up to 30 separate product categories, each maintained and displayed separately. This program is currently in use by many shareware distributors. The graphics included with *CATALOGER* will be tailored to your business. Please contact us for a free estimate. **SYSTEM REQUIREMENTS:** MS-DOS, 128K RAM,

#### **JOKE-A-DAY**

This program contains over 100 ADULT oriented jokes. The jokes range from outrageous to the unbelievable. Just remember, you only get one per day. If you are

easily offended, this may not be for you. SYSTEM REQUIREMENTS: MS-DOS , 128K RAM

### MATH PLUS+

This is a math teaching program with the youngster in mind. *MATH PLUS*+ will drill the child in addition, subtraction, multiplication and division using the latest educational techniques. *MATH PLUS*+ uses number set theory to give your child an amazing insight into why numbers mean what they do. *MATH PLUS*+ not only says 1 + 1 = 2 but shows why it is so. *MATH PLUS*+, coupled with parental assistance, could be that little extra which turns your child into an over-achiever and gives them a solid understanding of math to be applied to all future, more advanced, math. This program is designed to be used with children from 4 to 9 years old, depending on their developmental and educational level. **SYSTEM REQUIREMENTS:** MS-DOS, 384K RAM, CGA.

# LOTTO

A complete lotto management system with many advanced features including the ability to manage and select numbers for ANY state lotto, extensive system for maintaining lotto databases (including editing and sorting), flexible statistical analysis capabilities which make it possible to analyze or select lotto numbers based on all or only a portion of the historical database utilizing various proven number selection algorithms. *LOTTO* also has HOT/COLD trend graphics charting so you can see which numbers have been HOT and which have been COLD over periods of time YOU specify. Algorithms for number selection include HOT/COLD/ODD/EVEN with optional "wheeling" of up to 20 numbers and selection of up to 5 tickets at a time. *LOTTO* also has a complete print capability to enable you to print the historical databases or your lotto selections. This is all done with POP-UP WINDOWS and great graphics. *LOTTO* comes complete with the history of many state lottos. **SYSTEM REQUIREMENTS:** MS-DOS, 256K RAM

#### **SECURITY For Windows**

SECURITY for Windows is a security system to be used with Microsoft Windows 3.0 and later. With SECURITY for Windows installed on your hard drive, you will protect your Windows data and programs from unauthorized tampering, viewing, etc. SECURITY for Windows automatically loads when windows is invoked. SECURITY for Windows takes over the system and will not allow the user to access Windows without the proper password. That is all there is to it. You have complete control over passwords for they may be changed at any time. A screen blanker is included. All Registered users are provided with a special Serial Number which enables them to access the "Back Door" Password. **SYSTEM REQUIREMENTS:** MS-DOS, MS Windows.
