Screen Saver Collection #1:

FISHES.SCR   Gives your screen that aquarium look.
CLOCKSVR.SCR   A nice analog clock which floats around.
QUILT.SCR   Shapes inspired by traditional New England quilt designs.
VARIOUS.SCR   A Post-Modern screen saver.
CYCLE.SCR   A saver which calls other savers..for that "what's next?" feel.

These screen savers are Copyright © 1991, by Gordon Harris.

The self extracting install program will copy the saver files to your windows directory, or to another directory if you so indicated. To try out the savers, start the control panel (CONTROL.EXE) and double click on the "DeskTop" icon. Use the combo-box in the screen saver group to select one of the savers just installed...e.g. the Clock Saver. Press the "Test" Button to try out the saver.

Use the "Setup" button to play with some of the options available with these savers. All of the savers support password protection. Another option available is the "Clear secondary mono monitor" feature. If you have both a VGA and a mono monitor connected to your system and if you enable this feature, the screen save will clear and restore the mono monitor along with the primary display. The "Change wallpaper on exit" feature will swap your wall paper in a cyclic fashion every time the screen saver restores the screen.

My favorite saver of this bunch is the CYCLE.SCR: Cycle through all savers. This screen saver, when activated, picks another saver either randomly or cyclically and activates it. This helps prevent boredom at seeing the same saver over and over. Just use the control panel and select this one as your saver and CYCLE.SCR will do the rest.

Please feel free to try these savers out for a week. If you keep them on your system after that, please send a check for $5.00 as a shareware fee to

> Gordon Harris
> Data Arts

> Minneapolis, MN 55408

If enough folks pony up the shareware fee, I'll make improvements and start to work on a new batch of savers.

Please let me know of any suggestions or problems with these screen savers. You can reach me at the above address, or via mail to my CIS account [72611,620] or by phone at (612) 825-5436.

Credits

The "Spheres" and "Fishes" screen savers are modeled after SPX modules which were developed for Screen Peace by John Ridges. The "Miscellaneous" "Lines" "Random" "Swerve" "Clock" and "Quilt" shapes are Copyright © 1991, by Gordon Harris.

Distribution
Feel free to distribute this saver collection to other Windows 3.1 users. If you make this collection available via mass distribution, you must obtain written or verbal permission from me before you distribute it, you must distribute the self extracting archive file SAVERS.EXE with this write file intact, and you may not charge more than a nominal distribution fee of $5.00.

Thanks,

Gordon Harris
