## About PrintEnvelope:

PrintEnvelope is designed to print any-size envelope or labels on your laser, postscript or dot matrix printer. PrintEnvelope can print your company logo and gives you access to your printer fonts, font sizes, attributes and graphic images . When printing envelopes, there is no need to manually change your printers orientation or to do a Printer Setup on most printers. The program is written in Microsoft's Visual Basic and requires Windows Version 3.x and the Visual Basic runtime VBRUN100.DLL.

## Installation:

VBRUN100.DLL must reside in your Windows Directory. VBRUN100.DLL is Microsoft's runtime DLL required for programs written in Visual Basic and is not included in the ZIP file you downloaded from a bulletin board. If you do not have a copy of this DLL, check your bulletin board or call our support line for information on how to obtain the runtime.

Copy ENVELOPE.EXE , ENVELOPE.HLP, PRINTENV.DLL and the SAMPLEx.BMP files to a newly created directory or to your Windows directory.

Install PrintEnvelope in the program group of your choice by:

Starting Windows 3.x as usual.  
Select **FILE** in the Program Manager and choose **NEW**.  
Click **OK** to select Program Item.  
In the Description box enter: **PrintEnvelope** and press the Tab key.  
In the Command Line box, enter the full path name of  
the PrintEnvelope directory followed by **ENVELOPE.EXE**.  
Click **OK** to complete the installation.

Run PrintEnvelope like any other Windows program by double-clicking the envelope icon. Begin your first use of PrintEnvelope by first selecting **FONTS** and choosing your default fonts and sizes. Select **FEED** to tell PrintEnvelope how your printer will feed your envelope. Select **DEFAULT** as the paper bin selection and **CENTER** or **SIDE** feed for your first envelope. Adjust only as necessary. Click **HELP** at any time for the Help system and online manual.

If this version of PrintEnvelope is an upgrade to a previous version, there is no need to delete, change or modify the ENVELOPE.INI file found in your Windows directory.

## Registration:

PrintEnvelope is a user supported shareware program. For more information, or to register your copy of PrintEnvelope, please refer to the **Help** system and choose the topic **Registration**.
