

LOOK HEAR! 1.0

You got Windows, you got a sound board; *NOW* what do you do? Use **LOOK HEAR** to make your own MultiMedia Presentations! **LOOK HEAR** is a simple program to use! **LOOK HEAR** will let you attach sounds to your bitmaps. You have ALL the tools with Windows 3.1! Paintbrush will let you make bitmaps and Sound Recorder let's you save sound.

By just followings a simple structure you can make dazzling presentations, or just have fun with your pictures. Whatever you choose **LOOK HEAR** will definitely be you new favorite program!

INSTRUCTIONS

- ☞ Make a directory and copy **LOOKHEAR.EXE** into it.
- ☞ Copy all your Bitmaps (*.BMP) and Waves (*.WAV) into the same directory.
- ☞ Rename each Bitmap and Wave to follow the structure of **1.BMP** and **1.WAV**, following this for all your files. (1-10)
- ☞ You can add **LOOK HEAR** to a Program Group in Program Manager or just double click on the filename in File Manager.
- ☞ Now you just click on the command buttons on the bottom of the screen (1-10) to bring up your Bitmap and Wave.

It's that *SIMPLE!*

WHAT YOU CAN DO

As long as you follow the renaming structure...

You can display any 640 x 400 x 16 color Bitmap (256 color Bitmaps will show, but the palette will be remapped to the Windows standard 16).

You can play any Wave file.

You can shock and amaze your friends!

WHAT TO LOOK FOR

In future releases there will be support for 256 color Bitmaps as well as larger screen sizes. Also a way to script the files you want without having to use the renaming structure.

Well, I hope you like this and find it enjoyable. If you do, let me know, I'd

love to get you feedback and suggestions. I can be E-mailed on America
OnLine at screen name **PCC BRIAN**.

ENJOY!!!
