EXIT
Version 1

I decided after seeing a few "exit" programs for Windows, that I didn't like them, and that I could write a better one.

So, here it is.

How to Use The EXIT button:
>If you wish to exit Windows **REAL** quickly, click the right button on the EXIT button. POOF! you are no longer in Windows. Nothing saves, no dialog boxes ask you if you really want to do this. That is why you click with the RIGHT button.

Where to Put The EXIT button:
>Down in the bottom right corner of the screen. Next to The CLOCK. (What CLOCK? you ask. Find and download CLOCK.ZIP)

How to Move The EXIT button:
>Push down the left button, and drag it around.

EXIT button by:
