1991 MSU Hypermedia Contest

Statement of Originality

Contest Entered: Zenith

Entry Name: WinVN, a Usenet News Reader

Author's Name: Mark Riordan

Author's Affiliation: MSU Staff

WinVN is entirely my own work, with the exception of an insignificant public domain sorting routine. All work was done on my own time. Most of the work was done on my own equipment; however, debugging of the TCP/IP network interface was done with MSU equipment. (I do not have TCP/IP access to a news server from home.)

Signed,

Mark Riordan
