Integrating Visual Basic and Word for Windows

Tech•Ed 3/93

Woody Leonhard

The WordBasic macro called SendBookmarks is attached to this document. To see it, click on Tools, then Macro, and make sure the Template button is clicked.

One caveat: you must run SendBookmarks with a *document* active; try to run it with a macro in the top WinWord window, and you'll crash, because WinWord won't be able to find any bookmarks.
