

Superior Shareware

[Click here](#) for information regarding precautions before installing Shareware

You can find most of this software, and in some cases, more current versions (or Shareware featured in more recent issues) on America Online (Keyword: WinMag), CompuServe (GO WINMAG).

You can also find this Shareware (and that from more recent issues) on the Internet via anonymous ftp (<ftp.winmag.com/superiorshare>).

[Click here](#) for alphabetical listing of Shareware. You can also find programs by name if you click on the search button at the top of this screen. You'll find a chronological listing at the end of this topic.

[Click here](#) for information about listing by category.

If you are new to Shareware, you should **REALLY** take a moment and read about [VBRUN](#) files and the [Definition of Shareware](#).

You can view the information on these topics by clicking on the green words. You can return here by pushing the "Contents" button at the top of any screen.

You can use the   keys at the top of the screen to navigate between months in 1994 or between programs in 1995.

Please note that when you click on an icon to unzip software, the cursor may not change to an hourglass while the software is being loaded into your decompression program. Please do not be alarmed; your system is not hung. It is just working.

Shareware by Category

A categorial listing would duplicate the work already done in the index of this file. To find a piece of Shareware by category (alarms or animation, for example), simply click on the search button at the top of any screen and enter the category name. You can then see if there are any programs of that type on the CD, assuming we chose the same name for a category that you would. Try looking up several different categories, or even, in the last resort, scrolling through the index, before you give up and assume the category you are looking for is not represented here.

WINZIP Tutorial

This brief tutorial provides introductory information, but requires that you specify the relevant filenames and directory names. You'll understand it better if you [Install Winzip\(to decompress Shareware\)](#). Please note that, after you install Winzip (or any other decompression program), when you click on an icon to unzip software, the cursor may not change to an hourglass while the software is being loaded into your decompression program. Please do not be alarmed; your system is not hung. It is just working.

To print the tutorial, click on **Print Topic** in the Help windows File pull-down menu. The tutorial assumes the following:

- You know how to use standard Windows features, such as dialog boxes, menus, and the drag and drop interface. If you are not are familiar with these features, please consult your Windows documentation.
- You are familiar with the concept of archives.

If you are new to the Windows online help system be sure to choose **How to Use Help** from the Help menu. The time you spend on that will pay off quickly!

Terminology

Archives are files that contain other files. ZIP files are the most common archive format. Typically the files in an archive are compressed. WinZip uses the term Add to mean compress files and add them to an archive. Extract means decompress files in an archive, creating separate files on a disk. Some people use the verbs zip and pack instead of Add, and unzip or unpack instead of extract.

Working with Existing Archives

The first step is to open an archive. Select **Open Archive** from the WinZip File pull-down menu to activate the standard **Open Archive** dialog box. Then select the archive you want to open in the **Open Archive** dialog box. Opening an archive is just like opening a document in Write or a spreadsheet in Excel; the only difference is that you open an archive instead of a document or spreadsheet. Use the **Drives** and **Directories** list boxes to select the appropriate directory and click on the archive in the **Archive Name** list box. Press the **OK** button when you have made your selection.

Once an existing archive is open you can work with the files in the archive. The files in an archive are listed in a list box in the main WinZip window. You can

- View a file with the associated program by double clicking on the file in the main WinZip window, or view a file with the built-in text viewer or a viewer of your choice by selecting **View** from the Actions pull-down menu.
- Extract the files from an archive to a directory on your hard disk by selecting **Extract** from the Actions pull-down menu.
- Install or try out software distributed in the archive.

- Scroll the list of files in the archive using the scroll bar, or sort the list by file name, file date, or file size using one of the **Sort** entries in the Options pull-down menu.

Creating New Archives

To create a new archive, select **New Archive** from the WinZip File pull-down menu. This activates the **New Archive** dialog box. Type the name of the archive you want to create. **Do not enter the name of the files you want to compress.** This dialog box works almost like the standard Windows **Open** dialog box. You can use the **Drives** and **Directories** list boxes to choose the drive and directory where the archive will be created. For example, to create an archive on your floppy drive select **A:** from the **Drives** drop-down list box. The names of any existing archives on the selected drive and directory will be listed in gray to help you choose a name that is not already in use.

Normally after creating an archive you will want to add files to the archive, so verify that the **Add Dialog** check box is checked to automatically activate the **Add** dialog box. Press the **OK** button to complete your selection. See the next section for instructions on adding files to an archive.

Adding Files to an Archive

You can add files to an existing archive youve opened (as described above in the section **Working with Existing Archives**) or to a new archive youve created (as described above in the section **Creating New Archives**). If the **Add** dialog box is not displayed select **Add** from the Actions pull-down menu. **Error! Bookmark not defined.**

In the **Add** dialog box you can select the files to add to the archive in one of two ways:

1. Type the name(s) of the file(s) you want to add to the archive. Multiple names can be separated by spaces, for example, ***.TXT *.DOC** will add all TXT and DOC files.
2. Click on files listed in the **Select Files** list box on the right side of the **Add** dialog box. . Use the **Directories/Drives** list boxes to choose the drive and directory of the files listed.

When you are done selecting files, press the **Add** button. Once WinZip finishes adding the files it will update the list of files in the main window to reflect the new files in the archive.

You can also add files to an archive by dragging the files you want to add from the File Manager and dropping them on the WinZip window.

Note: when you add files to an archive the original files on disk are *not* deleted unless you select **Move** from the **Action** drop-down list. However, since the **Move** action deletes files, practice using test files before using this feature.

Shortcuts:

The WinZip toolbar (below the menu bar) provides shortcuts for many of the menu actions mentioned in the tutorial. The **New** and **Open** buttons perform the same function as clicking on **New** or **Open** in the File pull-down menu. Similarly, the **Add**,

Extract, and **View** buttons on the toolbar perform the same action as the equivalent menu entries in the Actions menu.

You can quickly sort the main window by clicking once on the header (e.g. click on Name in the header above the list of files to sort the list by filename).

It is often easier to open an archive by double clicking on the archive in the File Manager, or by dragging the archive from the File Manager to an open WinZip window.

Configuration:

Many WinZip operation can be tailored using configuration options. For example, you can change the default directories for the **Extract** and **Add** dialog boxes. Most options are intended for advanced users.

Conclusion:

This concludes the brief tutorial. If you have questions, feel free to contact the author at the address listed in the **About** dialog box of the program itself.

Effects Of Installation

Copy

Close

Installing Shareware can affect system files and **MAY** affect other programs. Please exercise caution (back up CONFIG.SYS, WIN.INI, SYSTEM.INI and AUTOEXEC.BAT.) before installing Shareware. If you don't know how to back up files, DON'T INSTALL SHAREWARE until you're more comfortable with your Windows skills.

VBRUN files

Copy

Close

If a Shareware description indicates that a program requires VBRUN300.DLL, look to see if you already have a copy of this program in your \WINDOWS or \WINDOWS\SYSTEM directory.

If VBRUN300.DLL hasn't already been placed there by some other application, copy it from the root directory of this CD-ROM to your \WINDOWS\SYSTEM directory. You need only do this once; VBRUN300.DLL will then be available for all future Visual Basic programs to use. The same instructions apply to programs which require VBRUN200.DLL or VBRUN100.DLL.

Definition Of Shareware

Copy

Close

Shareware distribution gives users a chance to try software before buying it. If you try a Shareware program and continue using it, you are expected to register. Individual programs differ on details--some request registration while others require it, some specify a maximum trial period. With registration, you get anything from the simple right to continue using the software to an updated program with printed manual.

Copyright laws apply to both Shareware and commercial software, and the copyright holder retains all rights, with a few specific exceptions as stated below. Shareware authors are accomplished programmers, just like commercial authors, and the programs are of comparable quality. (In both cases, there are good programs and bad ones!) The main difference is in the method of distribution. The author specifically grants the right to copy and distribute the software, either to all and sundry or to a specific group. For example, some authors require written permission before a commercial disk vendor may copy their Shareware.

Shareware is a distribution method, not a type of software. You should find software that suits your needs and pocketbook, whether it's commercial or Shareware. The Shareware system makes fitting your needs easier, because you can try before you buy. And because the overhead is low, prices are low also. Shareware has the ultimate money-back guarantee--if you don't use the product, you don't pay for it.

Install Winzip (to decompress Shareware)

[Click here](#) for a tutorial in how to use Winzip.

After reading the tutorial, [Click here](#) to install Winzip on your PC.

Please note that, after installation of Winzip (or any other decompression program you may already have), when you click on an icon to unzip software, the cursor may not change to an hourglass while the software is being loaded into your decompression program. Please do not be alarmed; your system is not hung. It is just working.

Some of the Shareware and Freeware on this disk comes in what is known as a "self-extracting executable" file, a file with an .EXE extension which, when run from DOS or Windows, decompresses the program files so they can be run.

Most of it comes in the form of .ZIP files, which contain many files compressed together, often with directory information as well as all the files required to install and run an application. Decompressing a zip file requires a separate program. There are many such programs; one Shareware program which performs this task is Winzip, which is available on this CDROM.

It is usually a good idea to create a new directory and place any .EXE or .ZIP files in that directory before decompressing them. That way, all the files associated with a program installation are in one place, and are easy to discard after the installation is complete. You install most Shareware and Freeware by running INSTALL.EXE or SETUP.EXE after decompressing or unzipping the file.

January 1994

[Click here](#) for information regarding precautions before installing Shareware

ClipMate 2.0

With ClipMate, you can capture items from Windows' Clipboard and save them for future retrieval. A changing title bar lets you access features like PowerPaste, Magnify and ThumbNail View. You can also drag and drop documents into ClipMate without opening applications.

\$25 Chris Thornton, Thornton Software Solutions

CLIPMT.ZIP, 226,541 Bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

Drag And View 2.0

View the contents of files quickly, without running the programs that created them. Drag And View lets you choose among 24 file formats from popular word processing, database, spreadsheet and graphics programs. You can also open multiple windows and search for text, cells or records.

\$25 Dan Baumbach, Canyon Software

DRAGVU.ZIP, 382,692 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

Invoice-It 2.08

This program lets you generate professional invoices. Invoice-It shows you unpaid invoices, gives you the total outstanding amount and lets you mark them when paid. Save invoices as ASCII-delimited or dBASE-compatible files; print them using any installed font.

\$35 John Rigdon, Eastern Digital Resources

INVIT208.ZIP, 141,260 bytes

NOT AVAILABLE ON CD-ROM

More Control 2.0a

Customize Windows with this Control Panel add-on. More Control gives you access to many settings in WIN.INI and SYSTEM.INI that are not found in the Control Panel dialogs. Among the settings you can change are icon title fonts, the color of help file text and the alignment of drop-down menus.

\$12.50 Sloop Software

MORECN.ZIP, 128,684 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

SecureGroup 1.0

Protect your Program Manager groups with passwords and set restrictions to Program Manager's functions with SecureGroup. This utility lets you choose which groups you want to protect and gives access rights to only those users and user groups you specify.

Freeware Andres Furrer

SEGRP112.ZIP, 21,776 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

Voodoo/Assassin a.01

This utility helps you share resources by temporarily swapping out one application (such as a fax program that runs continuously) and starting a second application (such as an e-mail package), with the option of resuming the first application when you exit the second.

\$20 Wayne Erfling and Rich Johnston

ASSA04.ZIP, 40,192 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

Windows UnArchive 2.22

Windows UnArchive extracts and decompresses files from ZIP and ARJ format and archives 60 to 90 percent faster than Windows UnZIP (which has been discontinued). With this utility, you can try out programs before downloading them and even multitask while unarchiving.

\$10 James N. Hughes

WUNA222.ZIP, 47,050 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

WinMatch 1.01

Compare old and new versions of text files with this MDI (Multiple Document Interface) application. Arrange files vertically or horizontally and view them with synchronized scrolling. Toolbar buttons help you jump back and forth. Choose split or composite viewing, and full or abbreviated listings.

\$20 Thomas Crosley, Softwest

WINMAT10.ZIP, 139,575 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

WinSince 3.3

Searching for files is easier than ever with this customizable file-processing utility and

program launcher that helps you find files by date, time, size or name. You can search in one directory, in subdirectories or across multiple drives. WinSince works with Windows and DOS programs.

\$20 Rob Hueniken

WINSNC.ZIP, 224,700 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

WizManager 1.1

WizManager adds color and ease to File Manager. A color, scrollable button bar has 56 buttons and a command-line box to start programs, open files and enter DOS commands. Buttons include Print Directory, Control Panel, Associate, Select Drive, and Lock and Restore.

\$39.95 Mijenix

WIZMGR.ZIP/338,438 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

February 1994

[Click here](#) for information regarding precautions before installing Shareware

Above & Beyond 3.0

This PIM (personal information manager) includes a pop-up calendar that lets you view a week or month at a glance, a contact database and attachable notes. If you're connected to a LAN, you can even use Above & Beyond to arrange meetings and track the status of other users' tasks.

\$149 (site licenses also available) 1Soft Corporation

AB.ZIP, 247,625 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

Folders 4.0a

Expand your Program Manager groups with Folders. Each folder becomes a separate group that can hold any type of file or even more folders. The utility also lets you cross link, drag and drop, associate, set passwords and quickly execute any of your last twelve commands.

\$29 Sloop Software

FOLDER.ZIP, 160,643 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

PixFolio 2.0.98

Get a grip on your graphics. This utility lets you build image catalogs, even of images from different disks. You can display catalogs as thumbnails and convert to and from .BMP, .CGM, .CLP, .DRW, .FLC, .FLI, .GIF, .JPG, .IFF, .IMG, .MAC, .PCX, PICT, .TIF, .TGA, .WMF and .WPG file formats.

\$39 (\$15 more for AVI and Photo CD support package) Allen Kempe

PIXF20.ZIP or PIX20.ZIP (v.2.0.85), 1,018,544 bytes

Not available on CD

PrintSwitch 2.0

Now you can change your default printer with just one click. PrintSwitch configures itself for your system and displays all installed printers; you can place PrintSwitch anywhere on your screen. The utility also gives you quick access to Printer Setup and Print Manager settings.

\$12.50 (site licenses also available) Michael Kaschka, Graphic Impact

PSW20.ZIP, 72,828 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

SysRes 2.5

With SysRes, you can monitor your system resources at a glance. The application provides graphical and text displays of your resources, which you can view two ways: CPU Usage or CPU Free. And you can scale SysRes' 3D graph for a quick view of how hard you're taxing your CPU.

\$15 Edwin R. Eby, EB-Software

SYSRES.ZIP, 17,792 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

TextManager 2.0

Replace your current text editor with TextManager and you'll get drag-and-drop support, a toolbar and a built-in menu for editing Windows system files. TextManager works with .TXT, .INI, .BAT and .C files; you can edit files using any font installed in Windows.

\$10 Digital Software

TEXTMAN.ZIP, 94,419 bytes

Not available on CD

Visual Help 2.0e

You don't need to be a programmer to create professional-quality help files. Visual Help is an authoring tool that provides full WYSIWYG editing and runtime testing, and supports drag and drop, bitmaps and sound files. This program requires Microsoft Windows Help Compiler 3.1 or higher.

\$49 Firas Bushnaq, WinWare

VH.ZIP, 388,527 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

Whalex 1.2

This utility lets you write and run scripts for the Windows front-end communications package. You can use Whalex to automate any AOL task you perform by hand. The scripting language is easy to understand and use, and the program comes with several useful sample scripts.

\$29.95 Tartan Software

WHALEX12.ZIP, 102,090 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

WinEZ 3.1b

WinEZ makes Task Manager obsolete. Not only does this utility quickly switch between open applications, it also launches and closes all your apps, without

requiring you to be in Program Manager. The Task Switch icon lists all open apps; the Fast Path icon shows all your program groups and items.

\$34.95 New Generations Software Ltd.

WinEZ3.ZIP, 97,791 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

WinZip 5.0

Built-in zipping is just one of the new features you'll find in the latest version of WinZip. This popular archive manager also provides improved support for Windows-based virus scanners and allows you to open multiple WinZip windows for simultaneous zipping and unzipping.

\$29 Nico Mak Computing

[Click here](#) for a tutorial in how to use Winzip.

After reading the tutorial, [Click here](#) to install Winzip on your PC; it is the equivalent of typing SETUP after you UNZIP the file containing WINZIP, which we have done for you.

March 1994

[Click here](#) for information regarding precautions before installing Shareware

File Locker 2.3

Safeguard information such as e-mail exchanges and private documents with File Locker. This utility lets you encrypt up to 200 files with the same password. You can specify wildcards (for example, all files with the same file extension) and directory trees.

\$10 Rodney M. Savard

Needs VBRUN300.DLL

WINLOCK.ZIP, 100,564 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

Find-It 3.62

Now you can search for files in every way possible. Given one or more specifications, Find-It will locate files on any drive in any subdirectory and list files by full path name. It even searches through .ARC, .ARJ, .ZIP, .LZH, .DWC, .PAK and .ZOO files. Once found, you can copy, delete and move the files.

\$25 RME Enterprises

FINDIT.ZIP, 90,801 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

FontSpec Pro 5.2

This utility lets you manage font collections by dividing them into smaller groups. FontSpec lets you print and install fonts, and compare them to avoid duplication. You also can preview fonts with different effects before you install them. FontSpec works with TrueType and PostScript fonts.

\$25 Nick Naimo

Needs VBRUN300.DLL

FSP520.ZIP, 266,640 bytes

If you have installed an Unzipping or Decompression program, [Click here](#) to unzip the program listed above. For instructions on unzipping/decompression, [Click here](#).

Phone Master 1.9d

Organize your phone numbers and data with Phone Master's configurable interface. Features include Smart Directory, which launches a terminal package for modem dialing, as well as sorting, searching and check boxes that you can set up for different tasks, such as sales cold calls.
