Calibracoa and Wave Petunia Smiling In My Garden

Love, love, love this [Simply Beautiful® Calibracoa](#) - 'Can-Can Orange' and [Wave Petunia](#) – 'Easy Wave Violet' combination mixed in the ground with my [Coreopsis 'Moonbeam'](#).

Purple, orange, and yellow – a daring combination that works like magic!

I have not fertilized these flowers yet and you can see they are thriving heartily in an all organic soil mix. The soil is a combination of [Organic Mechanics](#), rotted manure, and my horrid clay soil.

Annuals do require more watering and adding some of the new "crystals" to your soil will help reduce watering demands.
