'CHEYENNE SPIRIT' ECHINACEA

(*Echinacea xhybrida* 'Cheyenne Spirit') 75 x 65 cm, Zone 5

New for 2013 from Kieft Seeds, 'Cheyenne Spirit' is the first echinacea seed strain to produce cream, yellow, orange, scarlet, pink and purple flowers on sturdy, well-branched plants. With a high flower-bud count, deadheading is recommended but not essential for non-stop blooming. Preferring average to rich well-drained soil, it's drought tolerant once established. Breathtaking when massed together. AAS winner, 2013.

Echinacea purpurea
'Prairie Splendor' also
flowers from seed in year
one, producing large,
deep rosy pink flowers.
Bred in the Netherlands
and introduced in 2007.

***Always follow the directions on the
seed packet to the letter. Seed
producers know their varieties best.***
