An exciting and inexpensive way to bring the excitement back into your garden? Add new colors to your existing garden color palette for a dramatic change! Each winter at **GardenWise** we look forward to new and interesting colors for the upcoming year, and 2010 will not disappoint.

There are new Petunias, and one in particular, **Sophistica Blue Morn**, is being hailed by *Better Homes & Gardens* as "showstopping." I also like some of the other Petunia offerings, including the **Rhythm and Blues**, **Supertunia Pretty Much**

Picasso, **Famous Violet Picotee** and the **Shock Wave Denim** Petunias. Be sure to take a look at the **Tex Mex Hot Pink** Geranium, which is being hailed as one of the more heat-resistant Geraniums around.

Here are **more** 2010 flowers from *BHG*.
