Coloring The World With Wave®

Wave Petunias Sweepstakes

15 lucky winners will receive both the Easy Wave Beachcomber Mix—a mix of Easy Wave Blue, Easy Wave Coral Reef and Easy Wave Shell Pink and the Easy Wave Plum Pudding Mixture - also new for 2010 and includes the Easy Wave Plum Vein and Easy Wave Violet

Known by its signature pink pot and a colorful petunia palette of unmatched performance, Wave® Petunias proudly celebrates 15 years of coloring the world. Wave continues to offer unique designer colors that perform, such as this year's Easy Wave® Burgundy Star, the first star-pattern in the series, Easy Wave Plum Vein, the series' first vein pattern, and Shock Wave™ Denim, which changes colors throughout the season, altering color just like your favorite pair of blue jeans.

It all started with the color purple – the first Wave® variety – introduced in 1995. This award-winning spreading petunia quickly became a favorite for many gardeners because of its easy-care maintenance and abundant vibrant color.

Today, the Wave family has expanded to include 5 series filled with many colors and habits to fit various garden sizes and uses: The original Wave® series features a low-growing habit; Easy Wave® series has a more mounded and controlled spreading habit, making it the most versatile ideal for the landscape, baskets or containers; the Double Wave® series is designed to give gardeners frilly flowers for baskets and planters; Shock Wave® series has petite blooms in beautiful and bold colors; and Tidal Wave® series grows tall and bushy as a dense, hedge petunia.
