Wave Petunias offer an easy-to-grow high-impact color option for your Texas garden. They grow beautifully in the landscape or in containers to provide fast color you can enjoy all Spring! The Wave Petunias at Calloway's and Cornelius Nursery garden centers are grown in Texas, raised in our state and our climate.

Wave Petunia Care Instructions for Texas Gardeners:

Plant Wave Petunias in well drained soil that receives lots of sun. Cover the roots with mulch and water regularly to get new plants established. For best results, feed Wave Petunias weekly with Calloway's Amazing Blooms Water-Soluble Plant Food. This water soluble food is perfect for Wave Petunias because it provides an immediate high-impact feeding to enhance blooms and boost flower production. Then sit back and enjoy the colorful show.

Share your tips, stories and comments about Wave Petunia gardening below. See you at the Wave Festival on April 17!

Last year I planted petunias from Calloway's and we enjoyed through the fall amazing color. There were enough blooming flowers not only for the rabbits from our neighborhood, but also much more left for us each day new. For the best care and rich blooming I took out the old not nice looking flowers each morning and watered with on mist position. The violet color was georgeous and fresh all the time!

I have had great success with Waves in all parts of my landscape. Last year the Blue original waves flourished so much, people would stop at the house and ask, what the flower was. Now, I've found one lone plant on the southeast side of my house has come back. Who knew they might be a "perennial"! They are fast becoming my favorite annual.

I've grown original and Tidal Waves in my gardens and in planters for 6 or 7 years now and never had a problem with them. Do they grow well in our full sun? OH YES THEY DO!! I just keep the waves from drying out and they have provided tons of color and magnificent beauty in my gardens from spring till late fall.

Another fan of the Waves! Last year I bought several pink waves from Calloway's which I planted both in pots and beds. The waves cascaded over the pots and were really eye catching. They performed perfectly in my flower beds by spreading and filling in the blank spots with colorful flowers.

I was extremely pleased with them, and would recommend them to anyone interested in lush color throughout the hot summer. I know I'll be back for more!
