

# DAIRY HERD MANAGEMENT

## 3 steps to save energy and money

SAVEENERGY IS A NEW TOOL NOW AVAILABLE TO HELP DAIRY FARMERS SAVE energy and improve their bottom-line.

Launched by the Innovation Center for U.S. Dairy, SaveEnergy is an online resource that connects dairy producers with financial assistance programs and educational materials to reduce on-farm energy use and related cost. The tool at [USDairy.com/Save Energy](http://USDairy.com/SaveEnergy) is part of the U.S. Dairy Sustainability Commitment, an effort established by dairy producers to reduce environmental impact and create business value across the supply chain.

The SaveEnergy tool follows an easy three-step process:

- 1. Learn how to cut costs of on-farm energy use.**
- 2. Decide if an energy audit is right for the dairy operation.**
- 3. Find financial assistance for on-farm energy audits and equipment updates.**

TO ACCESS THE SAVEENERGY TOOL, GO TO: [USDairy.com/SaveEnergy](http://USDairy.com/SaveEnergy)
