

Penny's Arcade

Copyright 1996-97 [WinGames.Inc](#)

How To Play:

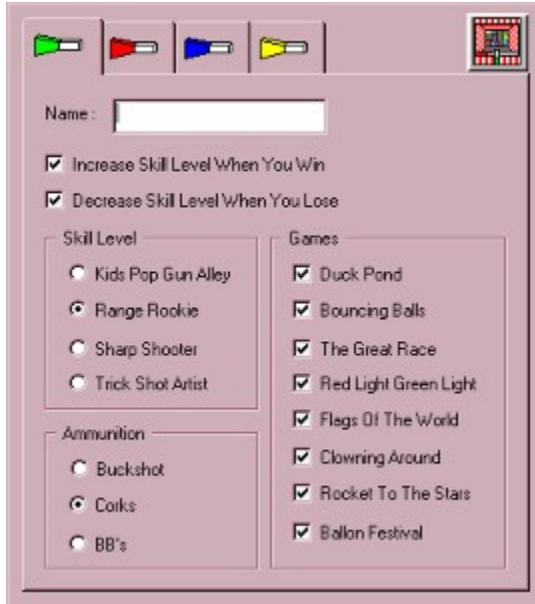

Penny's Arcade is not a trivial game. Using the settings, you can adjust the artificial intelligence of the game to play just about anything you'd like. In fact, each player can be adjusted separately. So you could have the whole family playing at the same time, each at their own level.

There are a total of 5 skill levels for each game. Each level has any number of tasks you will be asked to complete. All in all, there are thousands of situations and hundreds of tricks to learn.

When you 'Buy Tickets', you start a new game. The 'Prize' you are playing for will ask you to complete a task. If you complete the task successfully, you win that 'Prize', and also are awarded points based on what skill level you are at. If you do not complete the task, you lose a ticket. When you lose all of your tickets you collect your 'Prizes' and the game is over.

Game Settings:

Click on a 'Tab' to select each player's settings. While you can change a player's settings during a game, you must 'Buy Tickets' for them before they can play.

Name:

Enter the name of each person who is playing and select the appropriate options.

Increase Skill Level:

This allows you to adjust how the game is played. When it is checked and you win a task, your skill level will increase for that particular game the next time you are asked to play it.

Decrease Skill Level:

This allows you to adjust how the game is played. When it is checked and you lose a task, your skill level will decrease for that particular game the next time you are asked to play it.

***NOTE:** If neither of the above are checked your skill level will stay the same whether you win or lose. 'Kid's Pop Gun Ally' is not effected by these options.

Skill Level:

Select the appropriate level to play.

Level	Points	Description
