

Thank you for trying Fret from Sawbuck Software.

This is the quick-start version of documentation. More complete documentation is provided by the hyper-text help file, Fret.HLP, included with this software. Any questions, suggestions, comments or criticisms can be E-mailed to Compuserve account:

[72371,1075]

If you prefer to use conventional mail, you may send it to the address listed below. Why not register the software at the same time?

Fret will compute and display finger positions for notes and chords on a guitar. Different display modes may be selected to:

Allow beginners to quickly identify any note on the fret-board.
Clicking on any position will instantly display the pitch and octave of the indicated position on the information bar.

Display all possible positions on the neck that will produce the same identical pitch as the position clicked on.

Display all possible positions on the neck that will produce the same pitch as well as all positions that will produce the same note at different octaves. Finger positions of octaves are color coded based on their distance from the original pitch.

Display all possible positions of multiple notes (chords). Pitches are color coded to easily identify which position corresponds to which pitch.

NOTE: A Shareware notice dialog box will appear each time you start this software. This is to remind you that you have not registered (i.e. paid for) the software. Simply click on 'Continue' to resume normal execution. When you register the software you will receive a registration number which will prevent the dialog box from appearing.

To register Fret, send \$5.00 to:

**Sawbuck Software
2058 Belle Terra Rd.
Knoxville, TN 37923**

Be sure to include your name and address. A registration form is present in the FRET.HLP help file. To print it:

Single click on the red-button to access Fret's system menu
Choose 'About Fret...' from Fret's system menu
Click on the HELP button
Click on the Software Registration
Select Print from the File menu
Fill it out, add a check, and mail it off.

Thanks again,

Craig Hubbs
