# HPKZIP Index

# Overview

**HPKZIP** is a DLL that works in conjunction with Hviews that provides an interface to ZIP selected files. This DLL requires that the PKZIP® program from PKWARE® be installed in a directory that is in the PATH.

PKZIP and PKWARE are registered trademarks of PKWARE, Inc.

## Procedure

The User selects the file(s) to be ZIP and double clicks on the PKZIP action button.   A dialog box will be presented for entry of the ZIP filename (i.e. A:TEST.ZIP). One of the four options may be selected.   Press the OK button to perform the ZIP.

Current settings of the dialog are saved in the HPKZIP.INI file.
