Bitmap Changer 1.00

Written By: Sean Bishop

Copyright ©1993 Shortdog Inc.

For Windows 3.10
THIS PROGRAM IS FREEWARE

ANOTHER QUALITY PROGRAM FROM SHORTDOG INC.

REQUIREMENTS:

(1). Windows 3.10
(2). Mouse
(3). VBRUN200.DLL (Must be in your path somewhere. Found on most BBS')

CHANGES FROM LAST VERSION:

The previous version did not allow you to use .RLE files, and it also would not allow you to use files on drives other than the one Windows was on, I have fixed that problem in this version.

INTRODUCTION:

 Bitmap Changer is a small program that will allow you to easily change the background bitmap of Windows 3.10. You can choose from a filelist of .BMP and .RLE files. You can even preview the file before you change it permenantly.

USING THIS PROGRAM:

 To use this program you just either double-click on the filename of your choice or you can drag the file from the file-list to the change button or you can click on the filename and then click the change button.

 To preview the image you can either drag the filename either to the preview command button or to the preview box located at the bottom of the form or you can click on the filename and then click the preview button.

COMMENTS:

 If you have any comments or questions then please feel free to write to me or even call me at the number below. This program was written in Visual Basic 2.00 Professional Edition and requires the file VBRUN200.DLL to be somewhere in your path, you can find this file on almost any BBS.

 If you are a Visual Basic 2.00 programmer and would like the source code for this application then please send either $5.00 to cover the cost of

**the disk and shipping or send a disk with some Visual Basic source to trade
and I will send you the source.**
