VISUAL BASIC CODE FILES (w/registration only!), **+**$5 ___

TOTAL REGISTRATION FEE ENCLOSED: $ _____

Please make check payable to David Stewart. Send cash at your own risk. Sorry, we're not big enough to take credit cards.

Survey

I take very seriously what users say about PowerBar/Write; among the features in 3.x and 4.x, the clock toggle, time/date stamps, printer orientation toggle, and smart quotes, among others, began with user suggestions. For future versions, I'd like to know how PowerBar/Write fits in with how you work and what you'd like to see on it--or even what you'd like to see off of it.

Do you use PowerBar/Write every time you use Write? _____

Have you replaced your Write icon with one that launches PowerBar/Write? _____

Have you reassociated your Write files with PowerBar/Write? _____

 If not, why not? _____

Did you use Write regularly before getting PowerBar/Write? _____

If not, do you (or do you think you will) now? _____

Does PowerBar/Write answer needs you felt Write had before? _____

Do you like the option defaults:
1) Menu bar clock ON: _____
2) AutoSave ON: _____
3) AutoSave 5 minutes: _____
4) Write max on launch: _____
5) Bar floating on top: _____
6) Bar screen position: _____
7) AutoMenu off: _____

What features on PowerBar/Write do you like best?

Which features do you like least?

Which ones are good, but too numerous? E.g., are there too many AutoSave interval options, or too many time/date stamp options?

What would you like to see added?

What would you like to see left off?

What would you like to see changed, and how?

Thanks for the help!
