

Thank you for trying Chatter from Sawbuck Software.

This is the quick-start version of documentation. More complete documentation is provided by the hyper-text help file, CHATTER.HLP, included with this software. Any questions, suggestions, comments or criticisms can be E-mailed to Compuserve account:

**[72371,1075]**

If you prefer to use conventional mail, you may send it to the address listed below. Why not register the software at the same time?

Chatter runs in the background as an icon, periodically playing a sound file at a user defined interval. It sequentially selects sound files (.WAV and .SND) from a user defined list. This list is stored in a private initialization file so that it will be restored every time the program is run.

To run Chatter automatically, each time Windows runs:

Windows 3.0: Add the program to the run line of your WIN.INI file  
Windows 3.1: Add the program to the Startup group of the program manager.

Your Windows documentation for Progman will give you detailed information on how to do this.

NOTE: A Shareware notice dialog box will appear each time you start this software. This is to remind you that you have not registered (i.e. paid for) the software. Simply click on 'Continue' to resume normal execution. When you register the software you will receive a registration number which will prevent the dialog box from appearing.

To register Chatter, send \$5.00 to:

**Sawbuck Software  
2058 Belle Terra Rd.  
Knoxville, TN 37923**

Be sure to include your name and address. A registration form is present in the CHATTER.HLP help file. To print it:

Single click on the red-button to access Chatter's system menu  
Choose 'About Chatter...' from Chatter's system menu  
Click on the HELP button  
Click on the Software Registration  
Select Print from the File menu  
Fill it out, add a check, and mail it off.

Thanks again,

A handwritten signature in black ink that reads "Craig Hubbs". The signature is written in a cursive, flowing style.
