

PINEWOOD DERBY ACME PROJECT

A few ACME (Architecture-Construction-Manufacturing-Engineering) high school teachers (Mr. Rodriguez, Mrs. Camp, & Mr. Rucker) and students (Ben Rodriguez, Loren Bohannon, Blair Brozinski, Cory Mowry, & Mason Smith) made a visit to the 2nd graders (classes of Mrs. Nunley, Mrs. Volkman, & Mrs. Wedgeworth) on Friday, September 20, 2013. The high school students and teachers worked with the 2nd graders helping them choose a pinewood car design and color. The high school students will then take these choices and cut out the style (dragster, sports car, or truck) and partially sand the cars. Then on October 30 a larger group of HS students will join the 2nd graders in working on the cars more. Ultimately, there will be a race in the spring with all of these 2nd grade classes receiving their own pinewood car to take home. There was excitement all around – High school and 2nd graders!!!
