```

1.2   Introduction

```
 .oO INTRODUCTION Oo.
This is the first Small MagicWB package from me, Tom Oszczepalski.
This  is  the  solution  for  those  who  like MagicWB but haven't multisync
monitors.
I was tired, All non-lace icons are ugly!!
So I took all the original MagicWB Icons (and some others) and I created new
icons  for  'non  proportional' resolutions. Either I added some new icons,
trashed some of Martin Huttenlohers and put them all.
I suppose this is new quality for no-lace icons.
I've have stolen lot of ideas from most of the MagicWB packages out there.
This package contains all standard System-Icons and more others.
```

1.3   Features

```
 .oO FEATURES Oo.
 o  Icons dimension are the same (As oirginal Commodore OS2.0, OS2.1, OS3.x)
 o  All Icons are 8 colors, 3 bitplanes.
 o  SmallBench features standard for the NON-LACE AMIGA workbench
    Image-Drawers!
 o  All  Icons  have  been  painted  'pixel by pixel' so All icons are High
    Quality.
```

1.4   Installation

```
 .oO INSTALLATION Oo.
Click on 'ClickForColors' for the MagicWB v2.0 palette.
Use  a  icon  update program, MUIReIcon or IconUpdate, which preserves
the tooltypes and position of the icon, to update your old icons.
Search in Aminet (ftp.luth.se:pub/aminet):
MuiReIcon223.lha   util/wb  68K  Program for comfortable changing Icon-Values
IconUpdate.lha     util/wb  20K  Icon Replacement Tool v4.05
MUI_IconUpd12.lha  util/wb  26K  Replacement for IconUpdate, req. MUI 2.0
```

1.5   Legal Stuff

```
 .oO LICENCE Oo.
MagicWB is Copyright by Martin Huttenloher.  For more details check out the
MagicWB  archive (Licence).  Many of the icons in this archive are based on
icons designed by Martin Huttenloher and others MagicWB creators.
(If your icons are in this package send me your credits)
The  distribution  and production modified icons is done with permission of
Martin Huttenloher.
 .oO DISCLAIMER Oo.
I'll  take  no  responsibility  for  you getting laughed at for using these
icons!.  Neither any damages caused to your Amiga.
I  also take no responsibility for any of the text in this guide file, as I
live in a free country with the right to speak freely.
```

```
 .oO DISTRIBUTION Oo.
This  icons  may  be  freely  distributed via InterNet/UseNet, BBSs, Aminet
CD-ROM,  software libraries as long as the archive is not modified.  And as
long as no profit is made by the distribution of this package.
Programmers  &  creators of PD-software are allowed to include single icons
of this package in their own package-distributions.
```

1.6   Requirements

```
 .oO REQUIREMENTS Oo.
-  You  will  need at least Kickstart 2.0.  Small MagicWB is supporting all
   Kickstart/Workbench versions beginning from version 2.0.
-  MagicWB supports OS3.x in a special way: OS3.x users will benefit from a
   better palette, a better color handling and AGA-Patterns.
-  You should use a 'non-proportional' resolution like Hires.
   (pixels are about twice as high as they are wide)
```

1.7   Credits

```
 .oO CREDITS Oo.
I want to thank the following persons.:
 - Martin Huttenloher - for creating MagicWB.
 - Paul Hernik        - for many icons for SmallBench (High Quality)
         - for ideas, inspiration, information ect.
 - Other Authors      - for wonderful icons (I based on)
```

1.8   History of Changes

```
 .oO HISTORY Oo.
version 1.0 (5-April-95)
- first release. (uff)
```

1.9   AT The End

```
                  .oO AT THE END Oo.
If you would like to add or see own icons added to this package send me mail.
If you have any suggestion send
              me
               mail either.
```

1.10   Author

1.11   Standard for Icons

```
                  .oO STANDARD Oo.
This  is proposal for all which have order on Workbench.  I suppose, Nobody
like unequal icons.
I  propos  for  standard  icons  dimension from original Commodore icons.  I
guess, Original icons dimensions are very good for non-lace icons.
So, If you want made icons profit by Templates.
All Templates are in:
As icons ---->   SmallBench/SPECIAL/Templates directory.
As IFFs  ---->   SmallBench/SPECIAL/MakeIcons directory.
If  you  have other opinion about standard send
               me
                mail or write.
```
