

About Norton System Genie

Do you wish you could change certain aspects of Windows 95? Do you wish you had someone to show you some Windows shortcuts and tricks? You're not alone. Norton System Genie automates many Windows customization and performance enhancing tasks and walks you through others with step-by-step instructions. Use Norton System Genie to change the way Windows starts, runs, looks, and feels.

To invoke the Genie, choose Norton System Genie from the Norton Utilities program group on the Start menu.

Why you should use Norton System Genie

Windows allows you some control over the user interface, such as letting you customize your desktop patterns and wallpaper. However, in many other areas, Windows is very inflexible. Norton System Genie can grant your wishes by adding a new level of customization to your Windows environment.

Norton System Genie knows a lot of shortcuts and tricks to help you get more out of Windows. Use System Genie to rename or hide Windows desktop items, change the way Windows context menus work, and determine how Windows shortens long filenames. In addition, Norton System Genie lets you modify how Windows displays icons, control which applications start when you double-click icons, and launch Microsoft Explorer automatically when you double-click My Computer.

When you should use System Genie

Use System Genie any time you wish to customize the Windows user interface or perform Windows tricks. System Genie can grant you three types of wishes:

● **Magic Turbans**

Norton System Genie automatically performs these tasks. Your wish is our command.

● **Magic Carpets**

Norton System Genie grants these wishes based on information you provide.

● **Magic Shoes**

Norton System Genie guides you through the steps you need to take to fulfill these wishes.

If you are ever displeased with the results of a wish, Norton System Genie can undo your wishes just as easily as they are granted.
