Real World Navigation Plug-in dialog box

SmoothMove Viewer

## Real World Navigation Plug-in dialog box

You use this dialog box to establish the dimensions and other characteristics of your SmoothMove panorama.

### **Panorama Size**

Force 2:1 Aspect Ratio check box: When you check this box, if you change either the width or height, the other dimension is automatically updated to preserve a 2:1 ratio.

Width: Sets the width of your panorama.

Height: Sets the height of your panorama.

Compression: Click to open the Compression Options dialog box, where you can specify a compression method along with the desired image quality.

Suppress View Window check box: Check this box to create and save your panorama without displaying it.

OK: Click to accept your choices and close the dialog box.

Cancel: Click to discard your choices and close the dialog box.

## SmoothMove Viewer

In the SmoothMove Viewer, you can pan and zoom to examine your panorama.

- To pan, hold down the left mouse button near the center of the window and move the mouse in the direction that you want to pan.
- To zoom, hold down the Ctrl key and left mouse button simultaneously, and move the mouse up (to zoom in) or down (to zoom out).
