Fantasy:
Real. Ugly. Racing.
Unpredictable new action-packed racing game that captures the raw, unfettered joy and energy of Friday night derby racing where anything and everything goes.

High-level Concept:
Test Drive®: Eve of Destruction is a departure for the traditional road course roots of the Test Drive series, featuring dirt tracks, crazy events and school buses. Having the fastest car doesn't guarantee you success. You'll only be the last one standing in the Demo Derby or the winner of the Suicide Race if you can take out your opponents while avoiding being taken out yourself. It's no frills, unbridled fun. Courage is often your best weapon and bragging rights are your best reward in this less than pretty fight to the finish.

Core Gameplay:
- Real Life, Offbeat racing events
  - Suicide Race
  - Trailer Race
  - Figure 8 race with a jump
- Authentic, definitely UN-licensed vehicles! (over 30 vehicles including cars, school buses, hearse, ambulances and more)
- Phenomenal Driving Physics from Monster Games (NASCAR: Dirt to Daytona)
- Career Mode and Split-Screen Multi-player option
- Killer soundtrack and cool in-game track announcer
