Product

Overview: Dead or Alive Xtreme Beach Volleyball will be the first-of-its-kind “fantasy sports simulation” starring the renowned female characters from the famous Dead or Alive fighting video game series. With the tremendous power of the Xbox video game system and the implementation of a new engine created by Team Ninja, this game will showcase the most advanced game-making technology of today. The new engine and advanced technology promises to give the beautiful ladies of Dead or Alive a more realistic appearance than ever before.

Story: Dead or Alive Xtreme Beach Volleyball takes place on a beautiful tropical island that has been transformed into an exotic vacation resort called Zack Island. The ladies of Dead or Alive are tricked into coming to the island under the false pretense that this is the location of the next Dead or Alive fighting tournament. They quickly realize they have been fooled but decide to strip off their fighting clothes, throw on their bikinis and set, spike, and kill their way to becoming queens of the volleyball court.

Special Features:

- Dead or Alive Xtreme Beach Volleyball stars all of the ladies from the Dead or Alive fighting series, including a new character named Lisa.
- In the game, the women play vigorous games of volleyball during the day and partake in other activities that the beautiful tropical paradise offers at night.
- Players will have a variety of recreational activities to choose from on the island, including a Las Vegas-style casino!
- A variety of mini games will be featured in the game.
- Players will be able to cultivate friendships with their volleyball

teammates. The stronger the relationship between the two characters is off the court, the better the team is on court.

- “Fantasy Sports Simulation” means that everything in the game can be customized by the player. Players will be able to personalize each character, with over 300 different swimsuits and accessories to choose from.
- The local radio station on the island will broadcast licensed music throughout the game or players can opt to listen to their own custom soundtrack. The game supports user ripped soundtracks, allowing players to copy their favorite music tracks from CDs and play them back during gameplay.

**Developer
Information:**

Founded in 1967 and based in Japan, Tecmo has developed many popular game series such as Dead or Alive, Ninja Gaiden, and Tecmo Bowl. Dedicated to providing top-quality video games, Tecmo constantly strives to improve its titles by responding to feedback from fans, professional game reviewers and console manufacturers.
