FACT SHEET – MICROSOFT® INTERNET KEYBOARD PRO

What's different about Microsoft®'s Internet Keyboard Pro?

The Microsoft® Internet Keyboard Pro is a high-quality keyboard featuring 19 Internet email and multimedia Hot Keys and two USB ports with a comfortable standard design that includes a detachable palm rest.

Microsoft's Internet Keyboard Pro offers quick Internet access and complete control over your work.

What features and functions make the Internet Keyboard Pro so good?

- **Internet hot keys** allow users with Internet access to launch a browser and surf the Web directly from the keyboard. Internet hot keys include Back, Forward, Stop, Search, Favourites and Web/Home.
- The **Email hot key** opens email programs with a single keystroke and allows users to check messages.
- **Two USB ports** allow you to easily plug USB devices directly into your keyboard, not the back side of your computer.
- **Two custom hot keys** can be programmed with IntelliType Pro software. For example, user can program the hot key link to a frequently visited document, application or Website or use the default settings of My Computer and Calculator.
- **IntelliType Pro software** enables users to customise hot keys to launch their favourite programs, documents or Websites.
- The **detachable palm rest** allows users to rest their palms or hands while not typing.

What are the system requirements?

To use IntelliType software and the hot keys on the Internet Keyboard Pro, users need the following:

- 486 or Pentium computer
- Microsoft® Windows 95 or Windows 98 operating system or later, or the Windows NT Workstation or Windows NT Server operating system version 4.0 with Service Pack 3 or higher.
- 16 MB of RAM
- 35 MB of available hard disk space
- CD-ROM drive
- PS/2 connection

To use the Internet hot keys, users need the following:

- Microsoft® Internet Explorer 3.x, 4.x or 5.x browser (Internet Explorer software is included and requires 45 MB of available hard disk space), Netscape Navigator 3.x or 4.x, or America Online 4.0
- Internet access

To use the USB ports on the back of the Internet Keyboard Pro, users need the following:

- Your keyboard must be connected to a USB port on your PC and your PC must be running Windows 98. The USB device must be rated at 100mA or below.

Note about using the Sleep Key

- Sleep hot key functionality depends on the operating system and PC. With Windows 98 or later on a PC with power management capability, the Sleep hot key provides suspend and resume functionality. With Windows 98 or later on a PC without power management capability, or with Windows 95 or Windows NT Workstation or Server 4.0 (Service Pack 3 or later) on any PC, the Sleep hot key provides screen saver, Windows log off and Windows shutdown functionality but not suspend and resume functionality.

Pricing: Recommended retail price is \$79.
