Classification: G

Archer Maclean's **Mercury** has been specifically designed to take full advantage of the unique gaming experience offered by the Sony PSP. Using the PSP's powerful graphics processing abilities and wi-fi modes, Awesome Studios have produced a brand new genre-defining puzzle game, which is quite possibly the most imaginative and compelling game to be released in recent years.

The aim of the game is quite simple. Without spilling too much, you guide your various coloured mercury blob around each 3D maze simply by "tilting" the level. Watch as the liquid blobs ebb and flow around the countless challenges encountered along the way.
