Logitech PlayGear Family of Products Optimises PlayStation Portable Experience

Range of Products Offering Superior Protection, Quality Audio, Excellence in Design

AUSTRALIA— August 10, 2005 — With just a matter of weeks until the much-anticipated PSP™ (PlayStation® Portable) handheld entertainment system arrives in Australia, consumers should consider optimising their mobile experience with the popular Logitech PlayGear family of products. Logitech, a leading manufacturer of personal peripherals for work and play, designed its PlayGear products to add to the PSP's stylish appearance and enhance its functionality, and to help protect people's investments in the PSP.

Logitech PlayGear products include two stylish cases that serve as versatile yet virtually indestructible body armor for the PSP; a protective screen cover; a powerful and stylish set of stereo headphones; portable speakers ideal for enjoying movies; as well as a selection of other premium audio options for enjoying all of the device's multimedia capabilities.

“With this family of products, Logitech is leveraging our expertise in design, leadership in audio, and history in interactive entertainment to help maximise the PSP's enormous potential,” said Marco Manera, general manager of Logitech Australia. “The PSP is a beautiful device, and we have taken great care in designing even the smallest details in our products to ensure they are completely complementary, both aesthetically and functionally. Each product in the PlayGear line will improve the overall ownership experience of the PSP.”

Logitech's PlayGear family of products includes:

Logitech PlayGear Pocket Case

The stylish Logitech® PlayGear Pocket™ case protects the PSP against wear and tear, scratches and bumps, with its virtually indestructible polycarbonate shell, while allowing complete accessibility to all the PSP functions. The versatile case's lid flips up and out of the way, allowing gamers to use the PSP without removing it from the case. The lid's tension hinge allows it to

rotate and stay open at any angle, so it can serve as a tabletop stand for hands-free viewing of videos. The case also provides easy access to the 3.5 mm audio port so that gamers can plug in their headphones while the PSP is protected in the case. The case has a suggested retail price of AU\$39.

The Logitech PlayGear Street Carrying Case

The versatile Logitech® PlayGear Street™ carrying case offers hands-free protection and mobility for the PSP. Featuring a clip-on strap, the protective case can be worn across the chest like a messenger bag or it can simply hang over a single shoulder like a camera bag. With the included carabiner, the case can also be clipped directly to a backpack, a piece of luggage, or even a belt loop. The Logitech PlayGear Street case features slots that hold up to three Universal Media Discs (UMD) and four memory sticks, so owners can bring their games, movies and music with them. The Logitech PlayGear Street carrying case has a suggested retail price of AU\$59.

Logitech PlayGear Amp portable Speakers

The sleek Logitech® PlayGear Amp™ portable speakers provide rich and loud stereo sound from the PSP device for music, movies and games. The speakers contain a PSP bracket that holds the device for easy, hands-free viewing. With a collapsible design and an included carrying case, the speakers are easy to pack up and take on the road. The Logitech PlayGear Amp portable speakers have a suggested retail price of AU\$99.

The Logitech PlayGear Mod Headphones

The Logitech® PlayGear Mod™ headphones match the sleek styling of the PSP, and deliver a powerful audio experience and a comfortable fit. Sporting a behind-the-head design, the headphones feature 30 mm neodymium drivers that deliver crisp, rich audio with superior bass. The headphones, which weigh only 1.8 ounces, feature unique comfort rings. Made of a soft, gel-like substance, these removable rings rest securely over the ear to make sure the headphones stay in place, even for the most active user. The Logitech PlayGear Mod headphones have a suggested retail price of AU\$49.

Logitech PlayGear Stealth Earphones

The Logitech® PlayGear Stealth™ earphones provide high-quality audio performance and a comfortable fit for hours of game play, music or movies. The product includes three soft rubber fittings – small, medium and large – to allow a custom fit, to keep the earphones in place inside any ear, and to provide a comfortable seal that improves the bass sound quality. The earphones also feature neodymium stereo drivers capable of producing large sound despite their compact form. The Logitech PlayGear Stealth earphones have a suggested retail price of AU\$39.

The Logitech PlayGear Visor Protective Screen Cover

The Logitech® PlayGear Visor™ protective screen cover prevents scratches and fingerprints from tainting the PSP screen. The clear polycarbonate hardcover overlays the screen, allowing complete access to all game controls, system keys and ports, so gamers can play their PSP and protect it at the same time. The cover securely clips to the PSP device with no tools required. The PlayGear Visor protective screen cover will retail for a suggested price of AU\$19.

Logitech PlayGear Share Audio Splitter

The Logitech® PlayGear Share™ audio splitter creates a pair of open 3.5 mm ports, allowing friends to use two sets of headphones or speakers simultaneously on one PSP device – twice the fun when listening to movies and music. The Logitech PlayGear Share audio splitter has a suggested retail price of AU\$19.

About Logitech

Founded in 1981, Logitech designs, manufactures and markets personal peripherals that enable people to effectively work, play, and communicate in the digital world. Logitech International is a Swiss public company traded on the SWX Swiss Exchange (LOGN) and in the U.S. on the Nasdaq National Market System (LOGI). The company has manufacturing facilities in Asia and offices in major cities in North America, Europe and Asia Pacific.

About PSP™ (PlayStation®Portable)

PlayStation Portable is a new handheld entertainment system that allows users to enjoy 3D games, with high-quality full-motion video, and high-fidelity stereo audio. With graphics rendering capability comparable to that of PlayStation®2, PlayStation Portable features a 4.3 inch widescreen, high-resolution TFT display. PlayStation Portable also adopts a newly developed compact but high-capacity (1.8GB) optical disc, Universal Media Disc (UMD), as its storage medium. With a wide range of accessories and connectivity options, including Memory Stick Duo™, USB 2.0, IR port and Wireless LAN.
