Will Gabe Logan lose his shadow at Leipzig?

Syphon Filter™: Logan's Shadow showcased at Games Convention

- o **Logan is back on the case in a brutal new tale of gunplay and espionage**
- o **Gripping storyline by thriller novelist and DC Comics star writer Greg Rucka**
- o **The award-winning series returns with all-new features and even more action**

Leipzig, Germany, August 20-22: A piracy incident in the Indian Ocean will lead secret agent Gabe Logan on a round-the-world tour of espionage and enemy elimination in Syphon Filter™: Logan's Shadow for PSP™ (PlayStation®Portable) – and there will be an exclusive preview at the Leipzig Games Convention this August, courtesy of Sony Computer Entertainment Europe and developers Sony Bend. The sequel to 2006's critically acclaimed Syphon Filter: Dark Mirror, Syphon Filter: Logan's Shadow hits shelves this October – but you can see it first at Leipzig.

Logan's mission appears clear: to secure the contents of the ship's Cargo Hold 5 from the Somali raiders. But, as if this operation isn't challenging enough, Gabe is faced with the possibility that his long-term partner, Lian Xing, is a double agent. With his agency compromised and the US Government breathing down his neck, Gabe's resolve is tested to the absolute limit; not least when he also realises that a mysterious figure is shadowing his every move... He wants answers - and he's going to get them by doing what he does best - stealthy reconnaissance and ruthless elimination of his enemies.

In a storyline written for Syphon Filter by comic book luminary Greg Rucka, you'll travel from the depths of the Indian Ocean to the deserts of the Middle East to prevent a revolutionary new weapon falling into the wrong hands – all the while with the mysterious agent following you in the shadows. You'll encounter new gameplay features such as underwater combat, blind fire and grappling as well as realistic environment physics which enable you to bring down structures on top of your enemies. And, once you've mastered the tactics that your new weapons allow for, you can take on your friends in multiplayer Ad-Hoc Mode.

- **Play a story written by a master:** Logan's Shadow is a story of political intrigue with an emotional edge, developed by DC Comics star Greg Rucka, writer of Batman, Gotham Central and Queen and Country.

- **All-new gameplay features including underwater combat:** explore and fight in sub-aqua environments with realistic underwater physics. Use “blind fire” to provide cover in life-threatening situations and turn enemies into human shields with the new “grapple” feature.
- **Incredible new weapons:** Logan’s Shadow gives you more combat options than ever before. New underwater arms including spear guns and bolt pistols bolster your arsenal of grenade launchers, sticky mines, smoke grenades and flash bangs.

Can you return a deadly weapon to safe hands, find out the truth about your colleague and shake your Shadow? Syphon Filter: Logan’s Shadow is on show at Leipzig this August – and look out for Syphon Filter: Dark Mirror for PlayStation®2 at the same event.
