Introduction

Bonus Wheel Slots is a collection of three slot machine games. Each game has a special bonus wheel which can earn you up to \$3,750. In each game you get a bonus spin by getting the special bonus symbol on the third slot wheel. You have a 1-in-40 chance of getting a bonus spin for every 3-coin bet you place on the slot machine you are playing.

You have to bet three coins per spin to be eligible for a bonus spin. If you bet fewer than three coins, the bonus symbol acts like a normal wild symbol.

The three game have different graphics and somewhat different payoffs.

Bonus Sevens

In this game there are different color sevens (red, white and blue). Other than three wilds, the best payoff occurs when you get a red seven on the first slot, a white seven on the second, and a blue seven on the third. You also win with three sevens of the same color. You can get a small payoff for non-matching sevens of any color.

Three wilds offers the best payoff for this game. Three blanks provide the lowest payoff. Wilds can represent any other symbol except blanks.

Click on the PAYOFF CHART button to see all the payoffs for this game. The payoffs are based upon the current bet amount. Select BET AMOUNT from under the OPTIONS menu to change the bet amount (coin value).

Bonus Bars

In this game there are different kinds of bars (1-bars, 2-bars and 3-bars). You can win by getting three on any kind of bar. For example, if you get two 2-bars and a wild symbol, that counts as three 2-bars, and you win the corresponding payoff.

Three wilds offers the best payoff for this game. Three blanks provide the lowest payoff. Wilds can represent any other symbol except blanks.

Click on the [PAYOFF CHART](#) button to see all the payoffs for this game. The payoffs are based upon the current bet amount. Select [BET AMOUNT](#) from under the [OPTIONS](#) menu to change the bet amount (coin value).

Bonus Fruit

In this game you win with three matching symbols. You can also win with one, two or three cherries. Wild symbols can be cherries, so if you have a wild symbol on any slot wheel, you are sure to win.

Three wilds offers the best payoff for this game. One cherry provides the lowest payoff. Wilds can represent any other symbol. Three blanks do not pay off in this game.

Click on the PAYOFF CHART button to see all the payoffs for this game. The payoffs are based upon the current bet amount. Select BET AMOUNT from under the OPTIONS menu to change the bet amount (coin value).

Registration Information

If you are a registered user of BONUS WHEEL SLOTS, we thank you for your support. If you have not yet registered this game, then we thank you for trying it.

If you are using the shareware version of BONUS WHEEL SLOTS, then you will notice that not all the features found in the complete, registered version are active. The shareware version is functional enough for you to evaluate the game and decide if you wish to register. You can evaluate the shareware version of BONUS WHEEL SLOTS for up to 30 days without obligation. However, if you wish to continue using the game after 30 days, you must register it or else stop using it. This program is protected by U.S. and International Copyrights.

When you register, you get a much more complete game which allows you to borrow unlimited credits, save games, win credits on bonus wheel spins, starts a new game with 500 credits (versus only 200 in the shareware version) and lets you change the bet amount (coin value). All the shareware reminders and order screens are also removed in the registered version of BONUS WHEEL SLOTS.

The price is \$20 for BONUS WHEEL SLOTS which registers you for all 3 games BONUS SEVENS, BONUS BARS and BONUS FRUIT Slots).

You can order via telephone, FAX, email or postal mail.

Placing a Bet

Placing a bet is done by clicking on the BET 1 or MAX BET button. You must place a bet before spinning the slot machine wheels, however, once you place a bet and spin, you can continue betting the same amount by just clicking on the spin button.

You can bet from 1 to 3 coins per spin. The actual amount of the bet is the number of coins times the bet amount. If you have the machine set to \$1 and bet three coins, then you are betting \$3.

You must bet three coins to be eligible for a bonus wheel spin. If you bet three coins and get the bonus symbol on the third slot wheel, then you will get a free bonus spin.

Spinning

To spin the slot wheels, click on the SPIN button. Before spinning, you must place your bet, however, after placing a bet and spinning, you can continue to spin at the same wager amount by continuing to click on the SPIN button.

Borrowing Credits

You can borrow as many credits as you need or want. To borrow credits, choose the amount to borrow by first selecting BORROW from under the OPTIONS menu. You can continue to borrow by the available increments until you have borrow as much as you want.

You can also pay back credits that you borrowed. This is a good way to see exactly how much money you have made.

Note

Your starting credits are considered borrowed.

Payoffs

The payoffs are different from game-to-game. To see the payoffs for a particular game, run that game and click the PAYOFF CHART button. The payoffs are based on the coins you bet and the coin value you set by selecting BET AMOUNT from under the OPTIONS menu.

One thing to keep in mind is that betting two coins pays twice as much as if you had bet only one coin. However, when you bet three coins, the payoff is the same as betting two coins. Why is that? It's because of the bonus wheel. The reason to bet three coins instead of two is because you can only get bonus spins by betting three coins. Since the money you will make on the bonus wheel over the long-run is greater than one coin per spin, it is always better to bet three coins than two.

Loading and Saving Games

To load game, or to save the current game, select OPEN (or SAVE) from under the FILE menu.

This will bring up a new screen. Select the game you wish to load (or the "Game Slot" that you wish to save the current game to).

When you quit the program, the current game is automatically saved, so you can resume it the next time you run the program. Each time you run the BONUS WHEEL SLOTS program, the game will start where you left-off last time you played. If you do not wish to continue that game, you can select NEW GAME under the FILE menu, or you can load another saved game.

Bet Amount

Sometimes called "Coin Value."

This is the value of the coins being bet. To change this setting, select BET AMOUNT from under the OPTIONS menu.

You can set the coin value from 5¢ to \$5.

Sound

You can toggle the sound on and off by selecting SOUND from under the OPTIONS menu. When sound is on, then there will be a check mark next to "On."

You can also set sound on or off for several individual sounds and groups of sounds. You can set the bonus sound, wheel spin sound, spin sound, stop sound, coin sound, credit sound, and win sound.

Bonus Sound--A sound that plays when you are about to get a bonus wheel spin.

Wheel Spin Sound--Sound that plays while the bonus wheel is spinning.

Winning Sound--A sound which plays when you have a winning spin.

Spin Sound--A sound that plays when the slot wheels are spinning. This sound adds some realism, but you should turn it off if it causes the wheels to spin too slowly on your machine.

Stop Sound--This sound plays as each spinning wheel comes to a stop.

Coin Sound--This sound plays each time a coin is deposited.

Credit Sound--On a winning spin, this sound is played while the credits you won are counted off.

Spin Speed

This controls how fast the wheels spin. To change the speed setting, select SPIN SPEEN from under the OPTIONS menu.
