How to play Shepheld Boy ?

'Shepheld Boy' is a very simple game. Your goal is to gather white dots (on the screen) to the center of the screen, as if you were a shepheld driving sheep into the cage.

When you start 'Shepheld Boy', the screen would be like this. You have 120 seconds to gather sheep (white or yellow dots). They run away from your mouse-pointer, so you can gather them with it.

As the sheep are swarming into the center, the score is increasing(The score and the rest-time are shown at the menu-bar.). When the time is less than 20 seconds, the 'special sheep' appears. To gather it is 10 times important than other sheep to get hi-score.

You can change the speed of the game or the number of the sheep with [\[Options\]](#) at the menu.
