OVERVIEW

The game has a full interactive environment; this means that everything in the game react to collision with the car and the car itself get damaged. The player will drive along NY areas such as: West Central Park, 5th Ave to 34th Street, Sea and Air Museum, Brooklyn, Time Square. The player will receive an overall score at the end of each route. The overall score depends on different factors (time, damages, power-ups, finish position) and if you reach higher score you can access the hidden bonus stage in each of the three working shifts.

STORYLINE

You're in the cab and have to deliver passengers all around New York City, using all kinds of daring driving manoeuvres and assorted power-ups. You compete against an AI driver or a buddy. You may be racing to reach Little Italy or Wall Street and other cool areas in NYC. To help you in the traffic that can be found on the streets, there are several power-ups along the way. There are also shortcuts to add more fun to the experience. The cab is completely damageable,
