

During the routine observation of nocturnal sky astronomers registered a new object in the Ursa Major constellation zone. According to observation data, the object was of mid-size comet class. Moving at a tremendous speed, the guest from another galaxy could soon be seen with the naked eye in the sky at night. After verifying the calculations, state authorities began preparing for the possible catastrophe and evacuated all major cities. Humans got ready for the worst though the worst was yet to come...

- Features 14 graphically amazing single player and co-operative environments.
- Stunning detail and extensive landscapes bring this futuristic battlefield to life.
