

AMINET

Aminet is the world's largest collection of freely distributable Amiga® software. Up to 10,000 users access the archives daily, and countless programmers publish initially via Aminet. It holds the equivalent of 5000 floppy disks of software, and since the release of Aminet CD 6, more than 500 MB of new software has appeared. The current edition has a special focus on images, 10,000 images for DTP and multimedia were included.

WORLD-INFO '95

Schatzruhe has announced the release of World-Info '95, your virtual guide around the world. Travel to places you have never seen before, get informed about your next holiday destination beforehand, and spend some time in the sun. This CD contains information regarding all of the 194 countries and about more than 700 cities, covering all sorts of subjects. Some of the information areas included are Geography, Maps, Climates, Timezones, People, Language, and even an opportunity to see and hear the national anthems. Difficult definitions are thoroughly explained. In addition to this is a massive amount of pictures available from all parts of the world. Also, everything is available in English and German, and a printout of any information is no problem at all. Minimum system requirements are a computer with Mosaic or NetScape (e.g. Amiga, Mac, OS/2, Unix, Windows).

SCHATZTRUHE

Schatzruhe proudly announced the release of Guru-Rom V6. This penultimate product condensed the world's best Amiga software and hardware engineering. Now the user can productively and comfortably use SCSI, without sacrificing performance, risk of incompatibility, or waste of resources. Some features that help the user are its universal compatibility, unparalleled transfer rates of up to 3.5 MB/s raw (Zorro-II limit), 3.1 MB/s measured. It is multifaceted, flexible, and has maximum compatibility with nearly all hardware and software through special handling of all known firmware bugs of the most popular SCSI devices and DMA hardware bugs in the A3000 and A4000.

SCHATZTRUHE

Schatzruhe proudly announced the release of their new product, "Cd-Write." This program enables you to virtually write to CDs with an ordinary CD-ROM drive. You can write, delete, and modify data on your CDs. You can store programs and configuration data on any CD, rearrange directories and adapt the CD's appearance on the Workbench to fit the user's particular configuration and preferences, and add index files for use of CDs in BBSs. *Cd-Write*'s minimum system requirements are an Amiga 500, A600, A1000, A1200, A1500, A2000, A3000, or A4000 with at least 1 MB of RAM, OS 2.04 or higher, CD-ROM drive; hard disk recommended.

The Amiga Audio Expander™

Contraption Industries, a division of Apogee Technologies announces the availability of the Amiga Audio Expander. The end result of over a year of design work and extensive beta-testing is this state of the art filtering system that actually increases the audio range of your Amiga's sound. Your Amiga can now deliver high quality music and sound for normal Amiga use as well as your multimedia and video productions at a new level. The Expander comes with a full one year manufacturer's warranty and is compatible with all Amigas except for the A100 and CD32. As an added bonus, three disks of audio software is included in the package. These contain several high quality music modules in Protracker format, a collection of audio utilities ranging from sound creation to sample

recording direct to hard drives, and Protracker version 2.99 by Apogee Globalsoft. Suggested retail price in the US is \$79.95 plus \$5.00 S&H. Florida residents add 7% sales tax. A demonstration audio cassette of the Expander's abilities is available by sending \$3.00 to: Contraption Industries, 1851 University Parkway, Sarasota, FL 34243. For further information, please contact their Tech Support and Press Relations in the US at (813) 355-6121 or Fax (813) 3550-7767 or our toll free order line at (800) 820-7068. They can also be reached via the internet at Apogee@Cup.Portal.Com.
